TO OUR CUSTOMERS.

The many years of successful and continually growing business assure our patrons of the fact that we sell only

Choice High-Grade Tested Seeds.

We would impress on our friends the importance of sending us their orders early. Please do not wait until Spring, when we are so busy that there is sometimes unavoidable delay in filling orders.

NOTICE.—While we exercise the greatest care to have all Seeds, Plants, Bulbs and Nursery Stock of the best kind, we do not give, and our agents and employees are forbidden to give, any warranty, express or implied. If you do not accept the goods on these terms, you must return them at once and all payments therefore will be refunded.

JOSEPH BRECK & SONS (Corporation),

Register Your Name for Next Year's Catalogue.

Our customers and friends, doubtless, to some extent appreciate the expense annually incurred in producing and mailing our General Catalogue, and also the necessity imposed on us through this expense of mailing only to customers or to those who are likely to favor us with orders.

With this in view we endeavor to keep our mailing list up to date by crossing out, after a year or two, all names of persons who have not an account on our books, or who have not left their names either with the salesmen or on the Catalogue Register when making a cash purchase at our store.

We, however, desire that no one who wishes a Catalogue should be slighted, therefore we request all interested persons who visit our store to register their name and address on the books provided for that purpose.

This kindness will be appreciated and will be an advantage to our patrons as well as ourselves.

JOSEPH BRECK & SONS' PUBLICATIONS.

(Corporation)

We publish the following, and gladly mail any of them free on application.

Annual Catalogue and Gardener's Guide, published in January.

Holland Bulbs and Plants, published in September.

Market Gardener's Catalogue, published in February.

(For those who grow for market.)

The Lawn, The Garden. Sixth edition.)

New Method Sweet Pea Culture.

Success with House Plants.

Points for Poultry Raisers. A vade mecum for all interested in poultry. Ninth edition revised and enlarged.

The Most Complete and Best Illustrated Catalogue of

AGRICULTURAL HARDWARE, IMPLEMENTS, MACHINES AND WOODENWARE

In the United States or the world is published by us. It contains about three hundred and eighty-four large pages (8½ x 11¾), nearly fifteen hundred illustrations, and is, in fact, the result of our experience covering a period of over 75 years.

Will be sent free, on request, to all who send us an order from this book, and to others on receipt of 15 cents to cover transportation.

Bureau of Registry and Information.

Located at 406 WASHINGTON STREET, BOSTON.

SUPPLIES THROUGH ITS

Mercantile Department:

APPROVED Bookkeepers, Cashiers, Stenographers, Salesmen, Clerks, Shippers, Entry Clerks, Boys, Porters, Watchmen, Janitors, Hotel Help, Engineers, Firemen, Etc. Help for Institutions and Hospitals.

Women's Mercantile Department:

APPROVED

Women Bookkeepers, Cashiers, Stenographers. Saleswomen, Young Women for Office Work, Matrons, Nurses, Etc.

When this Bureau was established in 1890 our purpose was to secure to employers a better class of help than they had been obtaining.

Its rapid growth and many voluntary statements testify to its convenience and the high grade of employees furnished.

We mail free on application circulars descriptive of our Bureau, and blank forms whereon employers can

state particulars necessary to guide us in selecting suitable employees. Our Bureau of Registry and Information has certainly improved and elevated the service, and we believe

it will continue to do so, besides supplying a long-felt want. Through our large clientage we can serve both employer and employee more promptly and satisfactorily

than can any house not having our resources. The knowledge gained through experience is at the service of employers who desire our aid or advice in the

selection of suitable persons for the places they wish to fill. Bear in mind that no person is sent out from this office whose previous record for character and habits

In order that Breck's Bureau might be most conveniently located for our mercantile patrons, both men and women, we have recently secured commodious quarters at No. 406 Washington Street, which we have fitted up in an appropriate and attractive manner. Here our manager, Mr. Wm. E. McGerigle, with an experienced and courteous corps of assistants, is prepared to give the best service in Boston or the country to all persons

desiring employees or employment in mercantile lines. We take this opportunity to thank our customers for the business given us, and to invite those who have not as yet patronized our Bureau to do so, and give us an opportunity to practically demonstrate the benefits to be derived from its use. Yours respectfully,

REMEMBER THE NUMBER:

406 Washington Street.

has not been carefully investigated and approved.

TELEPHONE:

RICHMOND, 1660.

ECK'S Horticultural and Agricultural Registry.

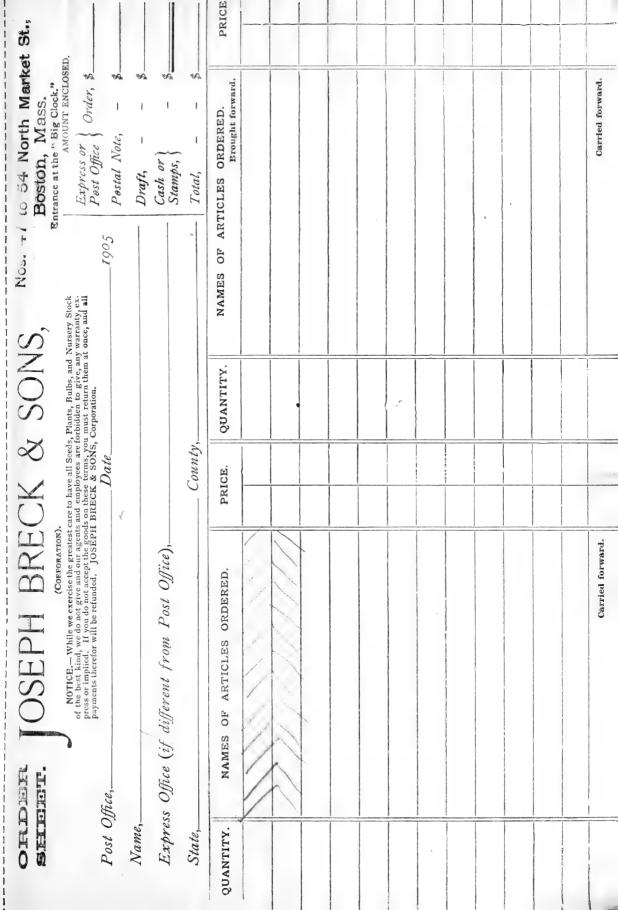

Employers and Employees in these lines will be served at 51 and 52 North Market Street, as formerly, where our Mr. James MacGregor, with competent assistants, will use every endeavor to give satisfaction to all who favor us. Approved Gardeners, Florists, Farm Managers, Coachmen, Superintendents of Country Estates, Public and other Institutions. Men for general work on country places, etc., will here find prompt, efficient, and courteous service, while employers of such help can rest assured that only persons who have been deemed worthy of entry in our register will be recommended to them.

As no charge is made to either employer or employee for the services of Breck's Horticultural and Agricultural Registry, our desire being to improve the service in the general interest of our business, we solicit your hearty co-operation, and it cannot be better expressed than through a liberal use of the facilities we offer.

Entrance at the "Big Clock," 51 and 52 North Market Street.

GOLDEN ROLL OF HONOR

"A continuous business relationship of 40 years or more is certainly a fair test of integrity and honorable dealing."

The continued growth of our Golden Roll of Honor is very gratifying to us. It is one of the sources of strength which enables us to maintain the standard that satisfies so many thousands of customers. It indicates the mutual confidence that exists between our patrons and ourselves. It shows that our methods are right, and that we supply our trade with "the best goods at fair prices."

Our business, established over eighty years ago by the grandfather of the Brecks now in control, is still conducted under the same roof, but with its growth, it has spread on all sides, so that we now occupy the entire block bounded by North Market Street, Merchants Row, North Street and Bendall's Lane. Five floors of 10,000 square feet each constitute our salesrooms, offices, and accommodation for a working stock for our retail business.

Our great storehouse of eight floors in the massive State Street block, affords facilities for carrying and handling goods for our wholesale trade.

For this growth, we are in a great measure indebted to the friends who constitute our Golden Roll of Honor, and to the many new customers they have made for us, through their recommendations. We take this opportunity to thank all our friends for their many favors, and we beg to assure them that no effort will be spared to maintain the high standard of goods and service.

This year we are privileged to increase our list by seven more names, and reproduce on another page photographs of five old and valued friends.

Mr. H. M. Osborn, of Peabody, Mass., when sending us photographs of his father and himself wrote as follows:—

"I enclose photograph of my father, who passed away in August, 1903, after fifty years in the grocery business. Years ago a good share of trade was Hardware, Woodenware and Seeds,—these he always bought of Jos. Breck & Sons.

"Have often heard him say, after years of business relations with your firm, 'I have traded with Breck's for fifty years and have always found them reliable and honorable, and when you want anything in their line go to Breck's.'"

MAJ. JOHN J. COFFEE, of Dorchester, wrote as follows: --

"Ir. 1853 I commenced trading with your house through my employer at that time; since 1865 up to the present time I have purchased goods of you for my own use, and it is with pleasure I inform you that the seeds purchased were of excellent quality, and the tools the best of the different kinds wanted. During this time I have sent many of my friends to make purchases of you, and in every case they have told me that the treatment received was all that could be desired.

"I hope that our business relations will continue for many years more."

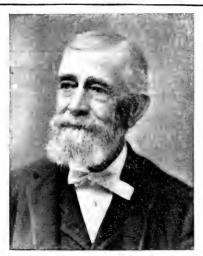

DR. EDWARD M. SKINNER, of Newton Centre, Mass., says: -

"I look back with much pleasure at the almost never failing success of seeds purchased of your house continuously for over forty years, and particularly for the success I had on my ten acre farm in Jamaica Plain, from 1871 to 1886. As the city acquired that place for the Arnold Arboretum, I must be contented with my present location at Oak Hill, Newton, where I hope to continue using your seeds for forty years more."

Mr. Moses Underwood says: --

"I commenced trading with the house of Joseph Breck in the year 1864, and since that time have continually traded with them for seeds and agricultural tools, and I must say that after forty-one years of consecutive trading I would still recommend to all my friends, when wanting anything in the seed or agricultural line, to go to 'Breck's for the best goods and most satisfactory treatment."

Our records this year also include Mr. Ira E. White, of Melrose Highlands, Mass., a customer for sixty years; also Mr. B. L. Alley, Danvers, Mass., a customer for forty years.

A New Group of Old Friends.

Mr. HENRY M. OSBORN, Peabody. Father and Son, Customers for 72 Years.

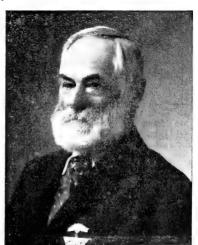

Mr. H. M. OSBORN, Peabody.

Dr. EDWARD M. SKINNER, Newton Centre, A Customer for 40 Years.

Major JOHN J. COFFEY, Dorchester, A Customer for 51 Years.

Mr. MOSES UNDERWOOD, Waltham, A Customer for 41 Years.

PLEASE NOTICE. We will esteem it a special favor if purties who have traded with us for forty years and upwards will advise us of the fact, with particulars as to length of time of their dealing with us, and of any features of interest that may be connected with the same during these long periods of years. One cannot but agree that when a silvery-haired customer remarks to us, as is not infrequently the case, "I have traded with this house, father, son and grandsons," 40, 50 or even 60 years, as the case may be the relation between us is a little nearer than that of mere buyer and seller, and that it is not surprising we feel it to be so.

BRECK'S Invincible Novelties and Specialties

... 1905...

BRECK'S PRIDE POTATO

BRECK'S PRIDE POTATO

Is by far the best main crop variety ever introduced.

BRECK'S PRIDE POTATO

Is unsurpassed in productiveness.

BRECK'S PRIDE POTATO

Has proved its claim to keep longer than any other potato.

BRECK'S PRIDE POTATO

Has no peer for table use.

BRECK'S PRIDE POTATO is the result of the careful cultivation of selected tubers; it is eval in shape and large, the flesh being white, dry and mealy, and is a prolific yielder, free from blight, scab or rot. It is medium early, and we strongly recommend it for the table or market.

We would suggest to our customers the importance of sending us their orders for **BRECH'S PRIDE POTATO** as early as possible, since our stock is limited, and we are reasonably sure that our supply will become exhausted before the planting season is over.

PRICE:

Per peck (15 lbs.) \$0.75.

Per bushel (60 lbs.) \$2.50.

Per sack (165 lbs.) \$5.50.

Allow me to say that the Seed Potatoes purchased of you last year I found of very high grade quality, and true to name.

H. V. LAWRENCE, Falmouth, Mass.

The Seed Potatoes purchased of your house last year gave me entire satisfaction, and you certainly can depend on having my order again this year.

W. B. CHAMBERLAIN, Carlisle, Mass.

Golden Garmine Podded Horticultural Pole Bean.

Throughout New England there is no class of shell beans so popular as the horticultural varieties. In recent years there have been material improvements effected in the several strains—both pole and bush—but in this new sort we cap the climax. It is a wonderfully robust grower, a week to ten days earlier than Worcester Horticultural Pole. In comparison the pods are equally as large, stringless bright golden color when very young. As the pods approach full size they are mottled and streaked with an unusually bright carmine color on the bright golden, which gives the pods a strikingly beautiful and attractive appearance. This, together with its productiveness, will make it the most desirable strain of this well known and popular bean. Pkt. 10 cts.; qt. 40 cts.; pt. 25 cts.; pk. \$2.50.

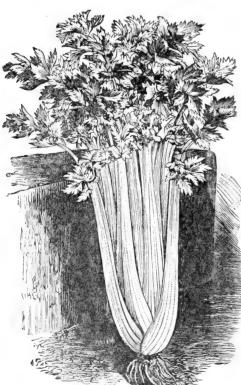

The green podded Kentucky Wonder is a general favorite because of its immense productiveness and fine quality. This wax variety is superior to its namesake in every way. It begins to bear when scarcely higher than the average bush variety and keeps on producing until killed by frost. The pods are so fleshy that they are frequently greater in width than breadth. They are solidly meaty, entirely stringless, and when cooked deliciously rich. Pkt. 10 cts.; pt. 25 cts.; qt. 40 cts.

Breck's Improved Dwarf Red Granberry Bean.

An excellent green podded string or shell bean. It is abundantly productive, and being a vigorous grower keeps the pods off the ground, free from mildew or blight. The pods are large, broad and flat, and the bean when ripe is of a rich red color. Pkt. 10 cts.; pt. 25 cts.; qt. 40 cts.; pk. \$2.50.

Breck's Preferred Stock Rust Proof Golden Wax Bean.

Breck's Paris Golden Celery.

The seed we offer under this name is grown especially for us by a leading grower; the strain is generally acknowledged to be superior to the ordinary Golden Wax Bean Pkt. 10 cts.; pt. 25 cts.; qt. 40 cts.; pk. \$2.50.

Breck's Preferred Stock Rust Proof Golden Wax Bean.

Breck's Boston Market Gelery.

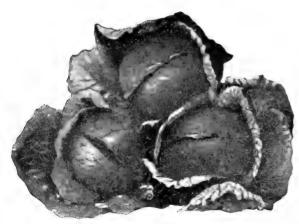

The seed we offer under this name is grown especially for us by a leading Arlington market gardener. The strain is generally acknowledged to be the best raised in that town and always realizes the highest prices in the market. Our stock this season is rather limited, therefore we recommend those who wish to grow some of the "real thing" to place their orders early. Pkt. 10 cts.; oz. 40 cts.; ½/4 lb. \$1.25: lb. \$5.00.

Breck's Paris Golden or Self-Blanching Gelery.

This strain has become deservedly popular. Many leading growers use it exclusively. Already many gardeners who planted it last season have bought for spring of 1905. The seed is originator's stock, French grown. It contains only a very few green plants, and is of unusually firm, crisp quality. Our customers consider it without a peer. Pkt. 10 cts; 02. 50 cts.; 1/4 lb. \$1.50; lb. \$6.00.

All the seed which I purchased of you has given entire satisfaction, being of very high grade quality and true to name.

P. J. KELLEY, Supt. for P. C. & S. Brooks, West Medford, Mass.

Glory Cabbage.

This new variety possesses two very important qualities, namely, Earliness and Size. It comes as soon as Henderson's Early Summer, but is larger than that sort. The heads are round, ball-shaped, firm, heavy and with few outer leaves. The color is a very attractive pale green. Sure to become popular when known. Pkt. 10 cts.; oz. 40 cts.; ¼ lb. \$1.25.

Breck's Glory Cabbage.

Breck's Private Stock Warren Stone Mason Cabbage.

We consider this selection of this popular variety the best yet offered. It is grown in Essex County. Massachusetts, especially for our trade. It has few loose leaves, is very round and perfectly solid. Great care is exercised in selecting perfect heads from which to save seed. We recommend Breck's Private Stock as the best and most popular that is offered in the Boston Market. Pkt. 10 cts.; oz. 35 cts.; 1/4 lb. \$1.00; lb. \$4.00.

Greatly Improved Strain of Danish Ball Head Cabbage.

This famous Hollander variety is absolutely unequalled for its great solidity and fine keeping qualities. The heads are nearly round in shape, very hard and firm, and keep in finest condition when buried through the winter. The seed we offer is imported by us from a leading grower in Denmark. Pkt. 10 cts.; oz. 35 cts.; 1/4 lb. \$1.00.

Breck's Forcing White Spine Cucumber.

Breck's Forcing White Spine Cucumber.

This strain is without doubt the best in all respects that is brought to the Boston market. The fruit is of uniform size and color, and is of mild flavor, very firm texture, with few seeds. It is a pedigree strain

selected by an Arlington market gardener for a great many

years. Pkt. 10 cts.; oz. 40 cts.; 1/4 lb., \$1.25.

Burpee's Golden Bantam Sweet Corn.

An extreme early variety of a rich golden color; its flavor is delicious, and on account of the firm substance of the dried

grains it can be planted earlier than any other Sweet Corn on the market to-day. Pkt. 10 cts.; pt. 25 cts.; qt. 40 cts.

Boston Crumpled Leaf Lettuce.

This Lettuce is of unusual size and unsurpassed firmness for shipping. It forms a very solid head. The outside leaves are slightly crumpled and of a dark green in color that enables it to retain a fresh-cut appearance longer than any other sort. It is of delicious flavor and very tender. Although of great size it is a sure header and of extremely quick growth; heart decay hitherto has not affected it. The plants should not be set less than 8 in. apart, as they usually attain a size that packs three dozen to a barrel box. Pkt. 10 cts.; oz. 40 cts.; 1/2 lb. \$1.25; lb. \$4.50.

Giant Golden Heart Lettuce.

A gigantic new variety selected from a "sport" of the Giant Crystal Head, from which it differs in its greater size, deeper yellow color of heart, and the almost entire absence of red on the outer leaves. The heads often measure 15 in. across, and are unusually solid. It has but slight tendency to run to seed, and will remain fit for table use for many weeks, even in summer weather. Pkt. 10 cts.; oz. 30 cts.; 1/4 lb. \$1.00.

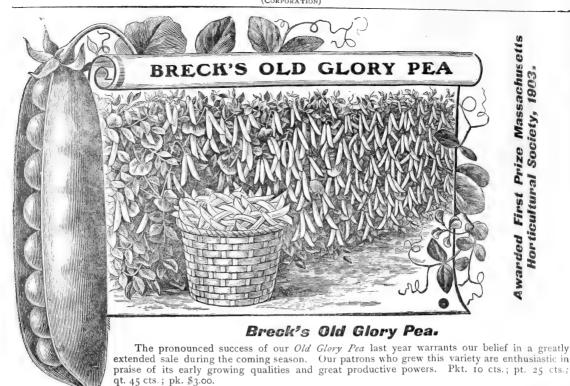

Golden Bantam Corn.

Breck's Yellow Globe Danvers Onion.

We believe we are safe in saying that three-fourths of all the Onion seed now offered is California grown. fact accounts for the low price and also for the frequent disappointment met with in the crop, late ripening, flat and scallion bulbs being common results.

The strain we here offer is totally different. It is home grown, and has been brought to the highest state of excellence by continued selection and care in growing. There is more of it sown by the leading onion growers of New England, who know what the market wants and what brings the highest prices, than all other special strains combined. We will take pleasure in furnishing to interested persons the names of a sufficient number of these leading growers who plant Breck's Yellow Globe Danvers to convince them of the facts. Pkt. 10 cts.; oz. 30 cts.; ½ lb. 85 cts.; lb. 83.00.

What Mr. Joseph Wood, Pittsfield, Mass., winner of the fifty dollar prize for suggesting the name Old Glory, says: On May I I put in four sowings along with the your 999 pea under the same conditions, and on June 27 I had the

pleasure of gathering several pounds of well-filled pods from a fifteen cent package, being six days earlier than Breck's Excelsior and Probatum, and nine days earlier than Gradus and Claudit. The pods averaged eight to ten fine peas, so that I had no hesitation in naming it Good "Old Glory," which is always foremost:

I shall certainly grow it largely next year.

Thomas Laxton Pea.

A decided improvement on Gradus, from which it is crossed with an extra early sort. It is the best early wrinkled pea yet produced. It grows about 3 ft. high, is very productive; the well-filled pods are as large as those of *Gradus*, and of a darker color. It is said to be earlier and hardier than Gradus. Pkt. 10 cts.; pt. 25 cts.; qt. 45 cts.; pk. \$3.00; bu. \$10.00.

New Dwarf Champion Pea.

In offering this new pea, we are filling a long felt want. A pea with all the merits of the well-known and reliable Champion of England, being hardy and excellent quality, but less vine, larger pods and more of them. In this pea we have a hardy, robust and vigorous grower, productive of handsome dark green pods of good size and in great abundance, and the quality is unsurpassed. Height of vine about 26 in. Season, coming in after the Little Gem. For a reliable staple market variety we believe it will fully meet the conditions required. Pkt. 10 cts.; pt. 20 cts.; qt. 40 cts.; pk. \$2.50.

Breck's Green Crest Parsley.

The plants of this variety are of very strong growth, and produce great, beautiful fern-like leaves on very strong stems. The color is very attractive; an unusually deep green. The flavor is especially good both when for an unusually deep green. The flavor is especially good both when fresh and CHAMPION in the dried state, and gives the desired aroma and taste to some sauces dressing, etc. This variety will be found suitable alike for the open ground, frames in winter, or the kitchen window-box. Pkt. 10 cts; oz. 15 cts; 1 lb. 30 cts.

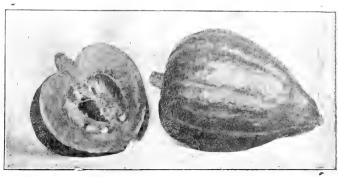

Crimson Giant Forcing Turnip Radish.

This new type differs radically from all forcing sorts heretofore offered in so far as its roots attain to more than double the size without getting pithy or hollow. The present forcing favorites as a rule measure two to three inches in circumference, and weigh only about one-fourth of an ounce when in best condition for use. This new sort develops roots six to seven inches in circumference and over one ounce in weight, the pure white flesh remaining firm and crisp, and of the mildest flavor. This new sort is bound to take the leading place, as soon as known, both with market and private growers. Pkt. 10 cts.: 02.120 cts.: 4 lb., 60 cts.

Delicious Squash.

Presumably because of Mr. Gregory's fame as a raiser of squash there was a very large demand last season for his latest production, the Delicious. The strong claim made for it was quality. We are glad to report that hundreds of our customers who bought a packet or two of the seed are prepared to fully endorse all that the originator says in its favor. It is not quite so large as the popular Hubbard, but it is thicker meated, and of decidedly better quality. We expect it will be very generally planted this year. Mr. Gregory says of this, his latest production: "From the resulting cross we have been selecting every season for our seed stock the thickest meated specimens, and the

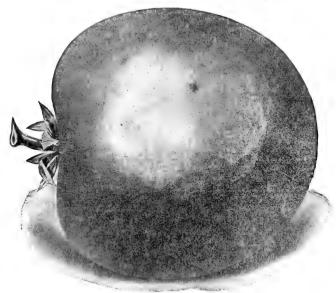

Delicious Squash.

very best for quality. The final result is a squash that, by the universal agreement of those who have tested it, in quality surpasses every one of the fine varieties that I have from time to time introduced. In form the Delicious ranges between the types shown in the illustration. Its color is almost uniformly of a green shade, with occasionally a blue specimen. In size it ranges between five and ten pounds. The flesh is very thick and of a dark orange color. It is a good full variety, but its unusual quality is most apparent when fully ripe." Pkt., 10 cts.; 0z., 25 cts.; ½ lb., \$3.00.

Giant Summer Straightneck Squash.

As early as the summer Crookneck. While the squash grow to a much larger size, measuring from eighteen inches to two feet in length, most of them will be straight-necked. Pkt., 10 cts.; oz., 20 cts.; 1/4 lb., 60 cts.

Livingston's New Globe Tomato.

Tomato, Livingston's New Globe.

The fact that this is another new tomato. originating with the Livingstons, of world-wide tomato fame, will be sufficient to warrant most growers of fine tomatoes to give it a liberal trial. It is of beautiful globe shape, with quite a percentage of elongated (stem to blossom) fruits, which permits of a greater number of slices being taken than with flat-fruited sorts. Among the very first to ripen, although of large size, very smooth, firm-fleshed, few seeds, ripens evenly; color a beautiful glossy rose, tinged Flavor very delicate and agreeable; splendid slicing variety. The fruit is borne on short jointed, branching plants in great abundance - literally loaded with fruit. A good general cropper, and one of the very best for greenhouse growing or first early crop on stakes or trellis. An entirely distinct and fixed new sort. Every grower of Livingston's New Globe, whether he grows for private or market pur-poses, will be pleased with the beautiful and attractive globe-shaped fruit. Offered this season in packets of 40 seeds each. Per pkt., 20 cts.; 3 pkts., 50 cts.; 7 pkts., \$1.00.

I cannot allow the season to pass without writing you in regard to seeds, plants, etc., etc., purchased from your house. Our lawns speak well for your grass seed, and in fact everything we got from you gave the utmost satisfaction. I would recommend your house to all seeking the very best in garden and field supplies.

Wishing you success, I remain yours, etc.,

GEORGE H. CRAIG, Gardener to W. H. Ames, Esq.

Livingston's Dwarf Stone Tomato.

This is another splendid variety from Livingston. In habit of vine it resembles Dwarf Champion, but is of stronger growth and more erect. The fruit resembles Livingston's Stone in color and shape, and, what is more remarkable for an erect sort, it is practically the same size. Ten fruits picked from one vine at the same time weighed five pounds three ounces. Five fruits selected by eye for average size weighed two pounds nine ounces. This was under field cultivation on farm land, with no fertilizer. Specimens weighing one pound each are quite common The new Dwarf Stone is fully double the size of Dwarf Champion, and yet equally as early. It is fully as prolific, and consequently vastly more productive. Livingston's New Dwarf Stone admits of very close planting, at least a half closer each way than the distance required for the ordinary vining varieties. In small gardens the plants may be set 18 x 24 inches apart each way, and yet produce an abundant crop. The shape of the fruit is perfect, with a good skin, which is free from cracks about the stem end. It is very solid, ripens very even, and is of most excellent quality. Pkt., 10 cts.; oz. 50 cts.

Early Red Top Globe Turnip.

A variety that for a number of years has been very popular in England on account of its quick growth, sound, plump flesh and mild flavor. Recently it has also become a favorite with the market gardeners who grow for the New York market. It is a cut leaf sort, globe shape, and quite as early as the well known Red Top Flat Strap Leaf kind, which we believe it will supersede as soon as it is generally known. Pkt., 5 cts.; oz., 10 cts.; ¼ lb., 20 cts.; lb., 50 cts.

The Twentieth Century Rock Turnip.

A decided improvement over the white French from which it was selected, being fully three weeks earlier. It is extremely hard fleshed, brittle and sweet. Its keeping qualities are excellent. Pkt., 5 cts.; oz., 10 cts.; $\frac{1}{4}$ lb., 25 cts.

The Commonwealth Strawberry.

What the originator, Mr. W. H. Munroe, Beverley, Mass., says:

"In the Commonwealth we have a berry that is as large as the largest, as productive as any of the largest, as fine flavored as solid and as dark colored as any. It is smooth, similar to the Jocunda in shape, and very juicy. It has a strong staminate blossom.

"It is late. On the 17th day of July, 1902, as good berries were picked as during its season and in quantity, the

Marshall, Glen Mary and McKinley, side by side with it, being gone. The last berries were picked July 22.

"The plant is a good strong grower, not so rank as the Marshall; hardy, shows no signs of rust, a fair plant maker, setting its plants at medium distance from the parent.

"The Massachusetts Horticultural Society, always ready to recognize especial merit, awarded the Commonwealth First Prize in competition with the Marshall, July 5, 1902." \$1.25 per doz., \$8.00 per 100.

The Pan-American Strawberry.

This is the only everbearing strawberry worthy the name of everbearing.

It is a sport from the Bismark. In walking over his bed of strawberries, in September, 6 years ago, the grower discovered the parent plant with 16 young plants all of which had either blossoms or green and ripe fruit on them. From these 17 plants he has propagated this variety.

It is a very strong, healthy plant, with no signs of rust or blight, and the most persistent bloomer from May to November.

It will bear fruit when the common varieties bear, but it is better to nip off the first stems as they appear so the plant will grow stronger and bear a larger crop after the others are gone. Very soon after the first stems are nipped off more will appear and they will continue to appear all summer and fall. In 25 or 30 days from the time of removing the blossoms is discontinued, ripe fruit may be gathered.

The fruit is cf good size and nice quality They make large plants and some single plants will bear a quart of fruit or more. The young runner plants when three weeks old will blossom and bear. Plants set in the spring will bear a full crop in the fall With a little protection cold nights they will continue to bear until most Thanksgiving time. \$1.00 each, \$100 per doz.

For complete list of strawberry plants see page 136.

The above cut represents a plant taken from the field and photographed Sept. 26th.

Your shipment of strawberries on the 1st were received on the morning of the 2d, and planted before night. I am thoroughly pleased with them, particularly the Belmont and Marshall. Yours faithfully,

JOHN GRAY, Holden, Mass.

In buying most commodities it is possible to determine their quality and value by examination; therefore in many cases the seller's experience, integrity and reputation need not necessarily count for much. This rule, however, does not apply in the seed business, for although one may readily be able to judge as to whether certain samples are free from admixture of foul or weed seeds, are of new crop, well matured, etc., this knowledge does not cover the assurance planters desire when buying. In order that a profitable crop may be raised, in addition to satisfactory texture of soil, sufficient manure or plant food, skilled sowing and cultivation, and proper weather conditions, seed that has been grown in localities which ensure perfect development, and selected through a series of generations to obtain only the best types, are also necessary. It is needless to say that this class is neither the most abundant nor cheapest on the market. In fact it is rarely found at all except in the hands of the trained seedsmen, who realize the responsibility of their business and endeavor to protect their customers accordingly.

THIS IS OUR EIGHTY-SECOND ANNUAL CATALOGUE. We believe our knowledge and reputation acquired through all these years is of value. We have built up through experience and integrity a business that in this country stands second to none in reliability and only one or two in volume. Our Golden Roll of Honor shows that we are both able and willing to satisfactorily serve the gardening and farming public, else we would not be privileged to retain these gentlemen as customers for such periods of years. We always consider our goods our best recommendation; and they continually bring us new patrons. If you have not had experience with our goods, or methods of doing business, surely some of your neighbors can tell you of them. If you desire "the best," inquire, and if results warrant it, send us a trial order, and you will be satisfied.

NOTE. — Prices may vary as the season advances. Ours will always be as low as the lowest for goods of equal

Please see Special Offers on third page of cover.

Artichoke.

German, Artischoke. - French, Artichaut. - Spanish, Alcachofa.

Culture.—A rich sandy loam is desirable, but any soil made fine by deep culture, and enriched with plenty of well rotted manure, will answer. Sow seed in hot-bed early in spring, in rows six inches apart; transplant when large enough into boxes or pots. After danger of frosts is past plant in the open ground, two feet between the plants and three feet between the rows.

This method of cultivation will produce heads for culinary purposes by September. Seed may, if desired, be sown in the open ground in May, but the little tender plants should be given protection until the

cold weather of spring has passed.

Plants raised from seed sown outdoors will not give edible heads until the second

Jerusalem Artichoke.

A species of sunflower (Helianthus tuberosus). A tuber that thrives well upon light dry soil and is cultivated for feeding sheep and swine. It is also used for pickles. The tops when cut and cured make an excellent dry fodder. It is propagated by tubers, which should be set in rows four to five feet apart and one foot apart in the rows. Three bushels are required to plant an acre. Qt., 25 cts.; pk., \$1.00 net.

Asparagus.

German, Sparget — French, Asperge. — Spanish, Esparragos. (For price on Asparagus Roots, see Vegetable Plants.)

An asparagus bed may be made from one or two year old roots, planted in October, or during April and May. The bed should be made very rich with well-rotted manure, and thoroughly worked over to a depth of nearly two feet. Plant the roots in rows four feet apart, leaving about 12 inches between the plants in the row. Lay the roots flat in trenches, spreading them well, and using care to have all the crowns placed in the same direction. Cover lightly at first, gradually filling the trenches as the plants grow. Every fall a liberal dressing of coarse manure should be spread after the tops have been cut, and in spring forked in. The second season after planting bed may be cut two or three times. Do not cut too closely, as the roots require the benefit of some foliage. Seed may be sown in April in drills one inch deep and one foot apart. One ounce of seed will sow 60 feet of drill.

Beans — English.

German, Grosse Bohnen.—French, Feve de Marais.—Spanish, Haba.

Plant as early in spring as the ground can be worked. The rows should be three feet apart; set the seed in the rows six inches deep, four inches apart. As the pods get formed, top the plants, thereby preventing too much running

Broad Windsor. The best variety for general use. Pkt. 10 cts.; qt. 30 cts.; pk. \$1.50.

German, Bohne. - French, Haricot. - Spanish, Frijorenano.

To afford a regular succession of crops throughout the season, plant every two weeks, from about the beginning of May to the end of summer; but not until the soil becomes warm, as they are very sensitive to cold. Plant in rows 18 inches apart, two inches deep; cultivate frequently, but only when dry, as the scattering of earth on the foliage or pods, when moist, will cause them to become damaged with rust. One quart will plant 100 feet of drill.

Please find enclosed an order for seeds and bulbs, which you will please ship by Adams Express.

Everything that I had of you last year proved very satisfactory, and I am pleased to send you another order this year.

DANIEL J. COUGHLIN, Newport, R. I.

Beans-Pole or Running.

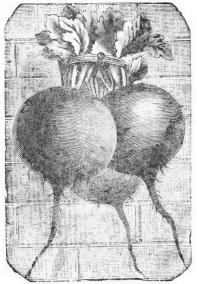

German, Stangen Bohne.—French, Haricots à Rames.—Spanish, Jidas. It is desirable to make the planting of Pole Beans at least a week later than the first planting of the bush sorts, as they are more tender. Plant in hills three to four feet apart, putting four or five beans in a hill, and leaving space in the centre for the pole. A liberal quantity of well-composted manure in each hill is of value.

One quart of Limas will plant 100 hills. One quart of the smaller seeded sorts about 200 hills.

German, Runkel Rube. - French, Betterave. - Spanish, Beteraga

Sow from April to beginning of July, in deep rich sandy loam, one inch deep, in drills about one foot apart. Thin the young plants to the distance of six or eight inches, and fill up any vacant places with those taken out. The turnip rooted are the earliest, and are of fine quality. When young, the leaves make excellent greens. One ounce will sow 50 feet of drill, 5 to 6 lbs per acre.

Borage.

The young leaves of this annual are used as a salad, or boiled like spinach. Sow in the spring, in light soil, and thin out to eight inches apart. The flowers are a pretty blue and afford excellent food for bees throughout a long season. Borage, pkt. 5 cts.; oz. 20 cts.

Borecole or Kale.

German, Blatterkohl. - French, Chou Vert. - Spanish, Breton.

Sow early in the spring in prepared beds, covering the seeds thinly and evenly; transplant in June, and treat in the same manner as for cabbage. are extremely hardy, and will endure quite a low temperature. The Siberian variety is also sown in September for early greens. One ounce will sow 150 feet drill

Dwarf Green Curled Scotch. Leaves of a bright green and very tender and closely curled. The quality is improved if the plants are touched by frost before being used. Pkt. 5 cts.; oz. 10 cts.; ¼ lb. 25 cts.; lb. 80 cts.

Dwari Brown. Similar to the preceding, but of darker color, very hardy. Pkt. 5 cts.; oz. 10 cts.; 1/4 lb. 25 cts.; lb. 80 cts.

Siberian or German Greens. Sown in fall for spring use. Pkt. 5 cts.; oz. 10 cts.; 1/4 lb. 20 cts.; lb. 70 cts.

Tall Green Curled Scotch. Similar to the dwarf, but of more vigorous growth. Pkt. 5 cts.; oz. 10 cts.; 1/4 lb. 25 cts.; lb. 80 cts.

German, Spargelkohl. - French, Chou Brocoli. - Spanish, Broculi.

This vegetable closely resembles the cauliflower, but is hardier. Like cabbage and cauliflower, it succeeds best in deep, rich, moist soil and in cool weather. The seed should be sown at the same time and the plants receive the same general culture

Green Curled Scotch Kale.

ounce of seed will produce about 1.500 plants. 1/4 lb. Early Purple Cape. Hardy, heads of medium size, and compact \$0.10 \$0.35 \$1.25 Veitch's. Self-protecting, large, compact head .10 1.25 .35 White Cape. Like Purple Cape, but of a creamy white color 1.25

as cabbage. Broccoli completes its growth from seed in from 120 to 140 days; five to ten degrees of frost will not injure the plants when they are approaching maturity. One

I have traded with your firm twenty-nine years, and during that time I have been very much pleased with the articles bought, mostly seeds, shrubs, bulbs, etc., and I have sent you quite a number of small customers. Yours truly B. H. CHAMBERLAIN.

Brussels Sprouts.

German, Sprossenkohl. - French, Chou de Bruxelles. - Spanish, Berza de Brusela.

Species of the Cabbage family. It produces along the whole length of the stem small sprouts resembling miniature cabbages. These heads are a great delicacy boiled in the same way as cauliflower. Seed should be sown about the middle of May in a seed bed, and the plants afterwards set out in rows two feet apart and cultivated like cabbage. Being small and hard, the sprouts are not in the least affected by frost. One ounce of seed produces about 1,200 plants.

Aigburth. The finest variety. Pkt. 5 cts.; oz. 20 cts.; 1/4 lb. 60 cts. Improved Paris Market. A most desirable strain. Pkt. 5 cts.; oz. 15 cts.; 1/4 lb. 50 cts.

Cabbage.

German, Kopfkohl. - French, Chou Pomme. - Spanish, Berza. (For price on Cabbage Plants, see Vegetable Plants.)

Paris Market

Brussels Sprouts.

All the Cabbage tribe requires is the soil to be rich, deep, well-drained, and abundantly manured. For the early kinds, plant 30 inches between the rows and 16 inches between the plants. For the late kinds, three feet between the rows and two feet between the plants. For very early use, sow in January or February, in hot-beds. Set out when the plants are strong enough into other hot-beds, or set in cold-frames in March. Transplant when danger from frost is past to the open ground. For a succession, sow in the open ground last of March or early in April. The late or winter crop seed can be sown in May and the plants set out in July. Late plants are sometimes subject to attacks of the cabbage fly, which destroys them as fast as they appear above ground. To prevent this destruction, sprinkle the plants with wood ashes, air-slacked lime, plaster, slug-shot, or tobacco dust, when the plants are wet with dew.

Early Summer Cabbage.

(CORPORATION)

Cabbage — Continued.

To destroy the green worm that attacks the leaves and head of cabbage, dissolve one ounce of saltpetre in three gallons of water and with a short handled whisk broom thoroughly sprinkle the plants with the solution. One ounce of seed produces 2 500 plants.

Cauliflower.

German, Elumenkohl. - French, Chou-fleur. - Spanish, Coliflor. (Price on Cauliflower Plants, see Vegetable Plants.)

Cauliflower is the most delicate and delicious of the Cabbage family. For the production of the cauliflower a rich, deep loam is required, a low moist situation being preferable. A liberal supply of water when possible produces very marked results. Seed of the very early variety should be sown in a hot-bed in February or March and set out by the end of April. For later supply, sow seed in May, choosing a cool, moist place. When large enough, transplant, making the rows about 2½ feet apart, and 18 inches between the plants.

Transplanting should be done in damp weather.

To destroy the cauliflower-maggot, try one ounce of sulphuret of

Breck's White Bouquet Cauliflower

potassium dissolved in one gallon of water. Heat the liquid to about 100 degrees, and apply a tablespoonful to the stalk of the plant just above the ground. One ounce of seed produces about 2.500 plants.

Chervil.

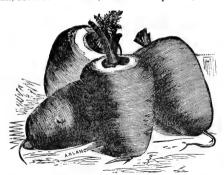

German, Gartenkerbel. - French, Corfeuil. - Spanish, Cerafolio de Cafe.

Chervil, Curled. An aromatic sweet herb that resembles parsley. The young leaves are used in soups and salads. Sow evenly, in May, in drills half inch deep, one foot apart. 5 cts. per pkt.; 10 cts. per oz.: \$1.00 per lb. Chervil, Tuberous Rooted. Sow in May or June, after treatment same as for carrots. 5 cts. per pkt.; 20 cts. per oz.; \$1.50 per lb.

Early Scarlet Forcing.

Carrots.

German, Mohre, - French, Carotte. - Spanish, Zanahoria.

Early Scarlet Horn.

Carrots are grown largely both for feeding to stock and culinary purposes; the long varieties used for the former, the "Horn" and medium sorts for the latter. The "Horn" sorts can be grown on thin soil and are mostly for early use. The others prefer deep, sandy loam that was well manured the previous year for some other crop, such as potatoes or onions. Sow in April or May or for late crops for table use, up to the end of June, about one inch deep in drills 15 inches apart for garden sorts. The rows in field cultivation should be two feet apart. Thin out the plants from three to eight inches apart, according to variety. One ounce of seed is sufficient for 100 feet of drill, four pounds to an acre.

Cardoon.

Cardoon.

German, Kardon. - French, Cardon. - Spanish, Cardo Hortense.

Cardoon is grown for the midrib of the leaf, which requires to be blanched in the same manner as celery. Sow early in spring, where the plants are to remain, in drills three feet apart, and an inch and a half deep, and thin out the young plants to a foot apart in the drills.

German, Cichorie. - French, Chicorée. - Spanish, Achivoria de Cafe.

Large Rooted. Sow and treat in the same manner as carrots.

This is the chicory of commerce used to mix with coffee. The roots are taken up, washed, cut in small Pkt. Oz. 1/4 lb. pieces and carefully dried before being used \$0.05 \$0.10 \$0.30

Witloof. Sow in May or June in drills, thin out to six inches apart, treat as *Endive* until end of summer, when it should be banked up

like celery. The blanched stalks are used as a salad. It is also used as a boiled vegetable dressed in the same way as cauliflower.

.05 .10 .35

Collards, or Colewortz.

German, Blatterkohl. - French, Chou Cabu. - Spanish, Cabu.

Sow seed as for cabbage, in June, July and August in succession. Transplant when one month old into rows three feet apart and two feet apart in the rows. This vegetable is closely allied to the Cabbage family, used as greens; it is grown to a considerable extent in sandy sections, particularly in the South. One ounce of seed will produce about 3,000 plants.

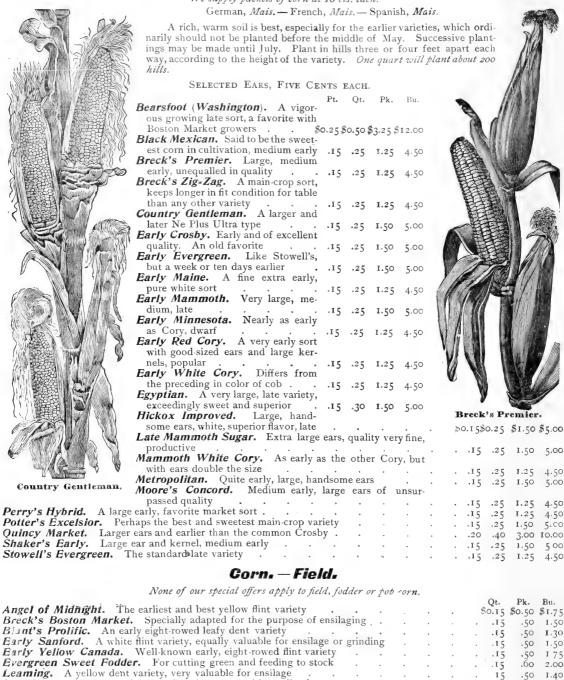

Georgia. Per pkt. 5 cents; oz. 10 cents; lb. \$1,00.

Large Rooted Chicory.

Corn. — Sweet.

We supply packets of corn at 10 cts. each.

Corn Salad. or Fetticus.

German, Lammersalat - French, Mache. - Spanish, Macka Valerianilla.

Used as a salad. It is sown in very early in spring, rows one foot apart, and is fit for use in six or eight weeks. For early spring use sow in September, and winter in cold-frames, or cover with litter. One ounce will sow 100 feet of drill. Large-Leaved. Per pkt. 5 cts.; oz. 10 cts.; lb. 50 cts.

Paris Golden Celery.

Celery. German, Sellerie. - French, Celeri, - Spanish, Apio. (For price on Celery Plants, see Vegetable Plants.)

Sow seed the first or second week in April in hot-bed or cold-frame. As soon as the plants have attained a height of three inches, transplant in prepared border, setting them four inches apart. In order to secure "stocky" plants, cut off the tops once or twice before again transplanting into richly manured soil, in rows four feet apart, and from seven to nine inches plant to plant. Keep down all the weeds, and as fall approaches draw earth up to the plants, keeping the stalks well together. When well blanched it is ready for use. For winter use it is usually placed in frames and covered with litter, or stored in pits or cold cellars. Some of the varieties, such as Golden Self-Blanching and White Plume, may be blanched by simply placing a board 12 to 15 inches wide on edge on each side of the row, and to hold them in place tack bits of laths across the rows at the top. The turnip-rooted variety does not require blanching, and may be planted in rows one foot apart. One ounce of seed produces about 3,000 plants.

Pink Plume Celery.

Pkt. Oz.

Cucumber.

German, Gurken. - French, Concombre. - Spanish, Pepino.

The first planting should be made early in May on partly spent hot-beds; inverted sods form an excellent medium for both planting on and carrying the young plants to their permanent location, or small paper pots can be used. Such plantings are usually ready for transplanting to the open ground in from three to four weeks, and are seldom troubled with the striped bug. Transplanting, when practical, should be done in the evening, into hills four feet apart each way. Thin out to about four plants to a hill when established. The seed may be planted in hills late in May, thus giving a succession. For pickles, plant a during the last two weeks of tune. during the last two weeks of June.

Plaster dust, or an infusion of hellebore powder in water will destroy the striped bug. One ounce will plant about 50 hills.

These are mostly grown by private gardeners. They attain a length of from 12 to 3c inches, and are of fine quality.

Rollinson's Telegraph. Blue Gown. Carter's Model. Each per pkt. 25 cts. Dandelion.

German, Pardeblum. -- French, Pisse-en-lit. - Spanish, Amargon.

Sow seed in May or June, in drills half an inch deep and 12 inches apart. Cultivate, to keep down the weeds during summer, and the following spring the leaves will be fit to cut. Upon the approach of severe weather cover with litter, which should be removed early the following spring. Dandelion that has been blanched is much more tender and entirely lacks the bitter flavor of the plant matured in the open. The blanching is accomplished by placing two boards inverted V-shape over the rows. One ounce will sow 200 feet of drill. One pound will sow an acre.

Endive.

German, Endivien. - French, Chicorée. - Spanish, Endivia,

Sow for an early supply about the middle of April. As it is used mostly in the fall months, the main sowings are made in June and July. When up, thin out to eight inches apart, and water well afterwards if dry. When the leaves are six to eight inches long, blanch by gathering together and tying near the top with varn or raffia. This must be done when the plants are quite dry or they will rot. Before cold weather, take up carefully with a ball of earth to each plant, and place close together in a cold frame or cellar for use. Keep dry and give plenty of air, or they will rot. One ounce will sow 150 feet of drill.

Lettuce.

German, Lattich-Salat. - French, Laitue. - Spanish, Lechuga. (For price on Lettuce Plants see Vegetable Plants.)

The most easily grown of all open-air plants used for salads. It requires a warm soil that has had a liberal dressing of well-rotted manure and abundant moisture. To be of satisfactory quality, the growth should be rapid and vigorous. Seed may be sown in a frame in February or March, the plants set out as early as the ground can be worked, as light frosts will not injure them. Set the plants nine inches apart in the rows, and 18 inches between the rows. For successive crops, sowing may be made every two weeks up to the end of August. To grow Cos successfully the seed must be sown early in a hot-bed, and when large enough transplanted to a cold-frame in order to have good plants ready to set out when the ground becomes workable. They require tying for a few days, when grown, to blanch them. Breck's Boston Market, Big Boston and Hittinger's Belmont are varieties especially suitable for growing under glass. One ounce of seed will produce about 4,000 plants.

All the Year Round. Medium size, firm heads that Pkt. Oz. 1/4 lb. Lb. do not readily run to seed Big Boston. Suitable for cold-frames or open ground.

Breck's Black Seeded Tennisball, Arlington strain. One of the most popular sorts for outdoor cultivation. The heads are tender and compact with outer

Mushroom.

German, Champignon. - French, Champignon. - Spanish, Hongo. (Our special offers do not apply to Mushroom Spawn.)

Mushroom.

Mushrooms may be grown in cellars, out-houses, sheds, under greenhouse benches. The amateur, however, is more likely to meet with success in cellars than elsewhere, as the cool moisture of the atmosphere and the uniform temperature are more congenial to the growth of this vegetable than in the structures above ground. The temperature should range between 55 and 60 degrees. Use a mixture of equal weights, fresh horse droppings and loam that has no manure in it. Before placing this mixture in the bed turn it over every day for a week, so that it does not heat violently, and be careful to keep it under cover, so that it cannot get wet. Then begin to make the bed by spreading thin layers of the mixture, and pound each firm, until you have in all a depth of eight to ten inches; leave it thus for a few days until the heat runs up to 100 degrees or over and then declines to 90 degrees; when this point is reached it is ready for spawning, which is done by making holes, three or four

inches deep and 12 inches apart each way; into each hole put a piece of spawn about as large as a hen's egg and fill in the hole with compost. At the end of 10 or 12 days the spawn will have run through the whole bed. There should then be spread over the entire surface about two inches of fresh loam. Over all place a few inches of straw. All that remains to be done is to keep the temperature as near 60 degrees as possible; it should never be allowed to fall below 50 degrees, or the crops will be both reduced and delayed. Ordinarily, if the conditions are right, mushrooms will appear in about six weeks and continue to come for about a month. In the event of the surface of the bed becoming very dry sprinkle it freely with water at a temperature of about 100 degrees. After the crop has been taken off the bed, it should receive a dressing of fresh loam to a depth of half an inch, thoroughly firmed, over the entire surface, and when dry a sprinkling with water as above recommended, and a second crop will soon be had. A brick of English spawn is sufficient for nine square feet of bed.

To Grow in Pasture. Insert pieces of spawn about three inches square in holes about three inches deep, fill up the holes with loam and cover with the turf, making it quite firm over the spawn. It should be done in a dry time to admit of the spawn spreading, the end of May or early June being the best time. With favorable weather mushrooms should appear in August

Mushroom Spawn. Original English Milltrack, superior to all others. Lb. 15 cts.; 50 lbs. \$4.50; 100 lbs. \$8.50 Mushroom Spawn. Genuine French Virgin. Lb. 50 cts.; 100 lbs. \$45.00.

Melon (Musk).

German, Melone. - French, Melon. - Spanish, Melon,

Melons prefer a warm, light, sandy loam; being tender, plantings should not be made before the middle of May. Plant about six seeds, half-inch deep, in hills five to six feet apart each way. The hills should have at least a peck of well-rotted compost thoroughly stirred into each of them before the seed is planted. When well grown thin out to three plants in a hill. If an earlier crop than this method of cultivation allows is desired, the directions given for growing early cucumbers may be followed. Slug shot, tobacco dust, coal ashes or dry lime are excellent to sprinkle over the young plants to prevent the attack of insects. One ounce will plant about 60 hills. Two pounds will plant an acre.

| | | | | |

Nasturtium, or Indian Cress.

German, Indianische Kresse. — French, Capucine. — Spanish, Capuchina.

PLEASE NOTE: The nasturtium seed we offer is very superior. It is not the old hard colored sorts usually

grown in mixture in Holland and generally offered at lower prices than ours. We ask those in doubt when comparing prices to try a little lot of ours side by side with the cheap seed and note the difference.

Cultivated both for you and amounts the goods while young and speculant are nicked and used as copars. The

Cultivated both for use and ornament; the seeds while young and succulent are picked and used as capers. The young leaves are also useful in salads. The many beautiful colored flowers, which bloom freely all summer, add a charm to the garden. One ounce will sow 40 feet of drill.

Okra, or Gumbo.

German, Essbarer. - French, Gumbo. - Spanish, Quibombo.

This vegetable is of the easiest culture, and grows freely, bearing abundantly in any ordinary garden soil. Sow early in May, in drills two inches deep, thin out the plants to about three feet apart. One ounce will sow 40 feet of drill.

Onion.

German, Zweibel. - French, Ognon. - Spanish, Cebolla.

White Portugal.

The onion thrives best in rather strong, deep, loamy soil, which should be well enriched with old well-rotted manure or compost, or what is better, deeply trench, add manure the autumn previous to sowing, and lay upon ridges during the winter to soften. Sow the seed thinly in drills about one-quarter inch deep and one foot apart. To ensure quick and safe germination after sowing the seed, the drills should be trod along evenly with the foot, and then raked even, so that the hot, dry atmosphere may not dry up and destroy the sprouting seed. When three inches high thin to three inches apart. Hoe frequently to keep down weeds. In the seed rows where the hoe cannot be used, the soil should be stirred with the fingers, otherwise weeds will quickly grow up and choke the crop. One ounce of seed will sow 100 feet drill; four Tall Green Okra pounds per acre.

The seed we offer, with the exception of the imported varieties, is Eastern grown, and calculated to give more satisfactory results than the Western grown seed.

[AMES F. CROWELL, Hyannis, Mass.]

Parsley.

German, Petersilie. - French, Persit. - Spanish, Perejil.

Soak the seeds a few hours in tepid water, and sew early in the spring in drills one foot apart; thin out the plants to three or four inches apart; a single row forms a very good edging for beds or walks. The seed germinates very slowly, and sometimes two or three weeks will elapse before the plants make their appearance. To preserve in winter, transplant to a light cellar or cold-frame. The Turnip-Rooted variety should be thinned out while the plants are quite young, and afterwards treated the same as carrots. One ounce to 150 feet of drill.

Pumpkin.

German, Kurbis. - French, Courge. - Spanish, Calabaza.

The pumpkin is now little used except for agricultural purposes, the squashes being so much sweeter, drier and finer grained for the kitchen. The farmer, however, finds the pumpkin a serviceable addition to his feed. The most common and least troublesome method of cultivation is to plant among the corn in hills eight feet apart, four seeds in a hill.

Breck's Excelsior Peas.

Peas.

German, Erbse. - French, Pois. - Spanish, Chicaros.

Peas come earliest to maturity in light, rich soils, but for a general crop a deep loam or moderately heavy soil is better. Some time may be saved in getting an early crop, by sowing a quantity in a shallow box filled with moist sand, and planting outside when well sprouted, but if the soil is dry at the time of transplanting a good watering must be given to prevent injury. Sow the smooth sorts as early in spring as the ground can be worked, and make successive sowings every ten days, the wrinkled sorts being given the preference as soon as the ground is warmed up. Plantings of the earlier sorts, such as Breck's Excelsior, may be made through July and even up to the 10th day of August with reasonable hope of a crop. Sow in rows, from two to five feet apart, according to the height of the variety. The first sowings will be earlier if covered only one inch deep; those following should be covered two to six inches deep; the deep planting prevents mildew and prolongs the season. Fresh manure and wet soils should be avoided, as they cause a too rank growth of vine The wrinkled varieties are sweeter and of more delicate flavor than the smooth sorts, but are liable to rot if sown too early. The holes which are sometimes found

in peas are produced by the pea weevil (Bruchus pisi). These holes do not affect the growing of the peas, for as great a percentage of growth is obtained from infested peas as from those not stung by the beetle. For the past few years, late peas in some sections have suffered much from a new pea louse (Nectarophora destructor). If this pest is thrown to the ground by striking the vines with a feather duster or other light weapon and the space between the drills promptly hoed or raked little injury will result to the crop. The well known ladybug is a natural enemy of the pea louse and if seen on the vines should not be disturbed, as it does much to prevent the ravages of the louse. Kerosene emulsion is fairly effective in freeing the vines of insects. One quart of peas will sow about 100 feet of drill.

The seeds of the sorts to which an asterisk (*) is prefixed are wrinkled.

Special Prices on Large Quantities Quoted on Application.

We supply packets of Peas at 10 cts. each.

| Extra Early Sorts. | TP+ | Ot | Pk. | Bu. |

Edible Podded Peas.

Special prices per bushel quoted on application. For Canada Field and other Forage Peas see page 45.

Potatoes.

(Prices subject to market changes.)

Special prices on large quantities quoted on application. Special offers do not apply on potatoes.

Of the many varieties of potatoes that claim public favor, we have selected only a few, and these the best

in cultivation We aim to include in our list only those sorts which we have found by actual test are worthy of cultivation. Orders will be booked as received, and shipped in rotation, after danger of freezing is over; and as potatoes are of a perishable character, we assume no responsibility for damages incurred in transit, but we will, of course, exercise the greatest care to guard against the transit.

curred in transit, but we will, of course, exercise the greatest care to guard against sudden changes in the temperature. All the potatoes we offer are grown in Aroostook County, Maine, from selected stock especially for seed purposes. They are calculated to give the best results to planters and when compared with common stocks will more than pay in increased crop for the small extra cost of seed, while the quality will be better and more uniform. Ten to 12 bushels will plant an acre.

Pepper.

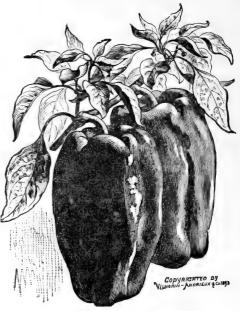

German, Pfeffer. - French, Piement. - Spanish, Pimiento.

Plant in hot-beds in March, and transplant into the open ground the latter part of May, in rows about 20 inches apart and eight inches apart in the row. Repeated hoeings promote their growth. One ounce of seed will produce about 2,000 plants.

Cayenne, Long Red. The pods of this variety Pkt. Oz. are from three to four inches in length, coneshaped, and coral red when ripe Celestial. Fruit at first yellow, but becomes deep scarlet when matured Golden Dawn. Shaped like the bell; color, golden vellow Large Bell, or Bull Nose. Fruit large; an early sweet variety **Procopp's Giant.** Long and large, fine scarlet Chinese Giant. Grows very large and uniform; as early as Ruby King and very mild Red Cherry. Fruit round very productive and ornamental. Used for pepper sauce; small, narrow Red Chili. pods, about five inches long; fine flavor Ruby King. Pods about five inches, fine flavor Squash, or Tomato-Shaped. The kind most generally grown for pickling; an excellent sort

Sweet Mountain, or Mammoth. Similar in shape to the large bell, but of much larger size

Rhubarb.

German, Rhabarber. - French, Rhubarbe. - Spanish, Rhubarbo Bastardo. (For price of Rhubarb Roots see Vegetable Plants.)

Sow early in the spring, in drills a foot apart, thinning out to about the same distance apart in the rows when a few inches high. In fall, or the following spring, transplant into deep, rich soil about three feet apart each way. If propagated by dividing the roots, it may be done either in fall or spring, planting it at the same distance apart as given above.

Linnæus. Early, large, and tender. Pkt. 5 cts.; oz. 20 cts.; ¼ lb. 50 cts. Victoria. Very large, later than Linnæus. Pkt. 5 cts.; oz. 20 cts.; ¼ lb. 50 cts.

Radish.

German, Rettig, Radieschen. - French, Radis, Rave, Petit Rave. - Spanish, Rabano.

Radishes require a light, rich, sandy loam; heavy or clayey soils not only delay their maturity but produce crops much inferior, both in appearance and especially in flavor. For a constant supply, sow from the middle of March until September, at intervals of two or three weeks. For an early supply they may be sown in a hot-bed in February. For winter radishes, sow the seed about beginning of July, and keep the roots during winter in a cool cellar, covered with earth. They should be placed in cold water an hour or so before using. One ounce of seed will sow 100 feet drill; 10 lbs. per acre.

Squash.

German, Kurbiss. - French, Courge. - Spanish, Calabaza Tontanera.

As all squashes are somewhat tender, they should not be planted out until danger from frost is past. They will grow on almost any soil, but a warm, mellow one that has been well manured suits them best. The hills for bush varieties should be about four feet apart; for running sorts. eight feet. Thin out to two plants to a hill, and in the early stages of growth keep well sprinkled to dust. Bush varieties, one ounce to 40 hills; running varieties, one ounce to 20 hills; two to four pounds

Spinach.

German, Spinat. - French, Epinard. - Spanish, Espinaca.

Spinach likes a rich soil, and should be sown for a main crop in August or September. When cold weather sets in, it should be protected from frost by covering it with straw and brush. Sow the seed of New Zealand Spinach (which must be scalded and soaked in hot water before sowing) in hills three feet apart each way, three or four seeds in a hill. This is fit for cutting all summer. One ounce will sow 50 feet of drill; 12 pounds per acre.

Tomato.

German, Liebsapfel. - French, Tomate. - Spanish, Tomate.

(For Tomato Plants, see Vegetable Plants.)

The seeds should be sown in a hot-bed about the first week in March, in drills five inches apart and half an inch deep. When the plants are about two inches high, they should be set out about four or five inches apart in another hot-bed. About the middle of May the plants may be set in the open ground; they are planted for early crops on light, sandy soil, at a distance of three feet apart, in hills in which a good shoveful of rotten manure has been mixed. On heavy soils, which are not suited for an early crop, they should be planted four feet apart. Water freely at the time of transplanting, and shelter from the sun for a few days until the plants are established. One ounce will produce about 2000 plants.

Purple-Top Flat Strap Leaf Turnip.

Arbor Vitæ, American

Turnip.

German, Steckrube. - French, Navet. -Spanish, Nabo Comun.

Turnips may be sown at all seasons from April to August in our climate, although those will be the best which are sown very early in spring for summer crop, and early in August for a fall and winter crop. A light soil well manured the previous year is the

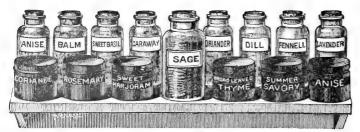

Purple-Top Flat Strap Leaf
Turnip.

best; no manure should be applied at the time of sowing, unless it be well-decomposed compost, or the roots would be liable to be bad-flavored. The ground should be dug or ploughed deep and made mellow and fine. Sow the seed of the flat sorts broadcast, and rake in evenly. After they are well up, thin to six or eight inches apart, and keep them clear from weeds. The Ruta Baga sorts should be sown in drills 15 inches apart, and for winter use may be sown from the 20th of June to the middle of July, on land that has been well manured for other crops in spring; thin out as for the early crop. One ounce will sow 150 feet drill. Two pounds will sow one acre in drills. One pound will sow one acre broadcast.

| acre in arms. One pound will sow one acre broadcast. | | | |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------|-----------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------|
| Early Snowball. Small and of quick growth, pure white Golden Ball. A small, golden-yellow flesh variety, unsurpassed for table use Long White or Cow Horn. Flesh white, fine grained and sweet, and of excellent quality Purple-Top Munich. One of the best earlies, of good form and quality. Purple-Top White Globe. A round, handsome turnip of superior quality. Purple-Top Milan. The earliest of the flat Red-Top Turnips, small, strapped leaves, white, sweet, tender flesh. Red, or Purple-Top Strap Leaf. The best of the flat turnips. White Egg. A handsome egg-shaped white variety, grows large. White-Top Milan. The earliest of all turnips, very mild flavor. White Norfolk. One of the best late varieties for stock. White-Top Strap Leaf. Similar to the Red-Top variety, but not so popular White Flat Dutch. An excellent early sort. Yellow Aberdeen. Very hardy and productive; good for stock and table; keeps well Yellow Stone, or Globe. Old Homestead Popcorn.

Lovers of popcorn will appreciate the Old Homestead brand of White Rice Pop Corn. No shelling, no dirt, no insects, no disappointment. It is one year old before being packed, thus ensuring good popping qualities. We clean this corn by a new process that frees it from dust, dirt, insects and other impurities. All the corn we pack is especially grown for us in New England, is cured in the old fashioned way; consequently is not only clean but is free from mixed and flinty kernels which do not pop. For Corn Balls, Candied Pop Corn and Nuggets the Old Homestead will be found superior.

White Rice Popcorn on Cob, Shelled.

New England grown, thoroughly cured, and in excellent condition for popping. Per lb. 6 cents; per roc lbs. \$5.00 net.

Vegetable Plants and Roots.

All are especially grown for our trade from choicest strains of seed.

We will be glad to quote special prices to Large Buyers.

MISCELLANEOUS SEEDS. For Forage Crops, Plowing Under, Etc.

OUR SPECIAL OFFERS DO NOT apply on goods under this heading.

The farmers of New England hitherto have not paid sufficient attention to, or given the many new and valuable plants for these purposes anything like a fair trial, but have been satisfied to get along with the old time fodder corn and Hungarian. We want every Agriculturist to plant, even if only in a small way, one or more of the sorts named in the following list this season. Larger crops of better quality and improved soil conditions will surely result.

Soya Beans. These grow to a height of two and one-half to three feet and have stiff stalks. The beans mature together, so can be cut down and thrashed afterwards. May be fed vines, stalks and all, or stock can be turned into field on them when matured. They are as valuable as a soil improver as clover. When sown broadcast for forage and soil-improving crops, Soya Beans should be sown at the rate of one bushel per acre. Sowing them thickly will prevent the stalk from growing too coarse, and enable them to be cut and turned under to better advantage. Sowing for ensilage, it is better

to sow in drills with the corn, at the rate of about eight quarts to the acre. Or they can be sown by themselves, in drills three feet apart, at the rate of two pecks per acre, and cultivated. They will make their largest yield of beans put in this way.

Breck's Soya. A large growing, yellow seeded variety, especially suitable for ensilage and ploughing under. Qt. 20 cts.; pk. \$1.00; bu. \$3.25.

Medium Green Soya. An early sort, that is likely to mature its pods in New England. The seed we offer is Massachusetts grown. Qt. 20 cts.; pk. \$1.25; bu. \$4.25.

Velvet Bean (Dolichos multiforus). Used by the farmers of Florida and other Southern States as a forage plant and also as a fertilizer plant for turning under. Stock readily eat the vines and leaves, and the beans when ground, with or without the pod, are used instead of oats or corn, and sometimes mixed with them. It is planted in rows four feet apart and one foot in the row, two or three beans in a place, as soon as danger from frost is past. This bean has been grown to a considerable extent in Maine and Massachusetts, and is increasing yearly in popularity. We do not believe the beans will ripen in ordinary seasons in Massachusetts, but the crop for forage or turning under will prove valuable. Qt. 20 cts.; pk. \$1.00; bu. \$3.25.

Beggar Weed. Florida or Giant Beggar Weed (Desmodium tortuosum). An erect leguminous annual, growing from three to eight feet high, with abundant foliage, valuable for forage or for soil renovation. It is especially recom-

mended for turning under on light, sandy soils. It also makes hay of a fine quality, and should be cut before the stems turn hard or woody, before it begins to bloom. Sow, after the ground is warm and moist, at the rate of 10 lbs. of seed per acre, and cover very lightly. Lb. 60 cts.; 10 lbs. \$5.00.

Broom Corn, Long Brush Evergreen.
Sow 12 quarts per acre, after danger from frost is passed. It succeeds best in a good, deep, moderately moist soil.
Lb. 15 cts.; 10 lbs. \$1.00.

Broom Scotch (Genista scoparia). The young growth of this shrub is chiefly valuable as food for sheep in winter. It is also used for making coarse brooms. The plants when covered with their bright yellow flowers are very ornamental. 10 cts. 02.; lb. 75 cts.

Corn, Jerusalem. See Sorghum. Corn, Kaffir. See Sorghum. Dhoura. See Sorghum.

Lupins, Vellow. This succeeds in the poorest soils, and is very valuable for ploughing under to improve sandy soil. It makes good forage, either green or as hay. Sow in spring when the ground has become warm, 90 lbs. to the acre. 20 cts lb.; 100 lbs. \$10.00.

E ...

Giant Beggar Weed.

—Blue. Used for ploughing under. 20 cts. lb.; 100 lbs. \$10.00.
Lotus Corniculatus (Bird's-Foot Trefoil). A clover that grows readily on the lightest and most sterile soils. It is very nutritious and is much relished by cattle and sheep. Being a perennial and having unusual ability for withstanding drought, it is recommended to sow in mixtures on dry

pastures. Lb. 40 cts.

Millo Maize. See Sorgham.

Millet, Pearl (Penicillaria spicata). A valuable and very productive fodder plant; should not be sown until danger from frost is over. This Millet has frequently been sold at very high prices under the names of Brazilian Millet and Pencillaria Zeavides. Drill, 18 inches apart, 10 pounds to acre. Lb. 15 cts.; \$10.00 per 100 lbs.

Barnyard Millet and Peas.

Barnyard Millet (*Panicum Crus Galli*) makes a desirable green feed for the first three weeks of August. It is not in the writer's judgment as satisfactory a feed as corn, but it has its place among the desirable forage crops. The Millet is a.

See Special Offers on third page of cover.

Our Special Offers do not apply on goods under this heading.

Barnvard Millet and Peas—Continued.

warm weather plant similar to corn. It will not stand dry weather as well as the former, is a heavy feeder and will do best upon a warm, moist soil. It makes a very rapid growth when the temperature is high. If sown by itself, 14 quarts of seed are sufficient for one acre; when combined with peas eight quarts of millet and one and one-half bushels of peas are the quantities required. The first seeding may be made together with peas May 10 to 15. The peas should first be sown and harrowed in deeply and the millet covered more lightly with an Acme or other harrow. Cutting should begin even before the millet begins to head and can be continued for 10 or 12 days. - From Bulletin No. 72, Mass. Agricultural College

Millet, Japanese Barnyard (Panicum Crus Galli). There have been many attempts to make capital out of this by dealers advertising and selling under various names. The seed was originally introduced to this country from Japan by Prof. W. P. Brooks of Amherst. It has proved through a ten years' test to be all, and more, that its introducer claimed for it. As a matter of fact there is nothing that compares with it. Three crops can easily be had from one seeding in a season; nearly 20 tons of green fodder at three cuttings. It is not especially recommended for hay, as its rather rank growth is somewhat difficult to cure properly. Distinct from other varieties, enormous cropper, grows six to eight feet high, excellent either green or cured as hav. It prefers a moderately moist soil and may be sown in an average season from the middle of May until the first of July. Broadcast at the rate of 25 lbs. per acre, or in drills 18 inches apart, 15 lbs. to the acre. Price per lb. 8 cts.

Siberian or Russian. We have made extensive inquiries regarding this variety and the general reports are that the plant grows larger than Common Millet, with beard and chaff similar to Hungarian; the plant making a ranker growth, produces more leaves than either Common Millet, German Millet, or Hungarian, leaves starting close to the ground and continuing nearly to top of stem;

Panicum Crus Galli, Barnyard Millet.

leaves wide and tender, making it preferable to other millets for hay. Yield of hay reported one-third to one-half more per acre, besides hay softer when cured, greener in color and preferred by stock to other hay or millets. It matures about the same time as Common Millet and Hungarian and earlier than German Millet; it is claimed that it will stand drought better than other varieties of millet. It has been a success in sections where season is too short to mature a corn crop. Pk. 50 cts.; bu, \$1.50.

Southern Cow Peas (Vigna Catjang)

Make Poor Land Rich.

Green crops plowed under are one of the best and cheapest ways of improving the soil. For this purpose the Cow Pea is most popular, especially for medium or light soil. They should be sown in May or June, at the rate of one and one-half bushels to the acre, and plowed under as soon as they have attained their full growth. While this crop is very largely grown wherever known, with the results attained from it the wonder is that it is not grown ten times as much as at present. There is no surer or cheaper means of improving poor soil than by sowing Cow Peas. In its capacity as a nitrogen gatherer its growth largely enables the farmer to dispense with the use of nitrogen or ammoniated fertilizers. Nitrogen or ammonia in commercial fertilizers is valued at 15 cents per pound. The Cow Pea, to a greater extent than any other leguminous crop, with possibly the exception of the New Velvet Bean, has the power to extract nitrogen or ammonia from the atmosphere.

Whippoorwill. One of the earliest. 15 cents qt.; bush., \$2.50.

Southern Yellow Eye. Early and a heavy cropper. 15 cents qt.; bush. \$2.75. Cay, or Wonderful. Has matured in New England. 15 cents qt.; bush. \$2.50.

Southern Black. Immense cropper. 15 cents qt.; bush. \$2.50.

Southern Black Eye. A favorite variety. 15 cents qt.; bush. \$2.75.

Peas, Canada or White Field. Unsurpassed as a green feed for milch cows. Sow with oats or Barnyard Millet. Broadcast two bushels peas and two bushels oats per acre or eight quarts Barnyard Millet. Pk. 50 cts.; bush. \$1.75. **Green Canada Field.** Used like the above. The dried peas are also used for boiling. Pk. 60 cts.; bush. \$2.00.

- Black Eye Marrow (See page 37).

- White Marrow (See page 37).

- Flat Forage (Lathyrus sylvestris). A valuable perennial forage plant, does well on poor, sandy soil, its deeply penetrating roots enabling it to stand severe drought. The forage is relished by all farm stock. Plant the seeds thinly in drills one foot apart. Per oz. 10 cts.; lb.

Dwarf Essex Rape. Our Special Offers do not apply on goods under this heading.

Farmers of the United States are just begining to find out what England has known for many years, that the Fodder Rape is the most valuable green feeding plant known, especially for sheep. Dwarf Essex Rape is easily grown and perfectly hardy, and possesses remarkable fattening properties. One acre will pasture 36 head two months, and lambs will make a gain of eight to 12 pounds a month. *Pigs and cattle are also very fond of it.* The plant is a rank grower and should have heavy manuring as well as high cultivation. Any corn soil will grow Rape. Sow the seed by the end of June, and the crop can be ready to feed at a season when it is most needed. By sowing different pieces several weeks apart a continuous supply of good feed can be had. When sown in June the Rape will have to be fed during August, though if the first crop were cut about four inches from the ground, there would be a second growth that would be useful after that time. For the breeding flock a piece should be sown about the first week in July, with some even later, and the chances taken on its withstanding the drought. It does well sown with oats. After the oats are cut the Rape grows rapidly. From half an acre there was cut nine and three-quarters tons of green Rape, or it yielded at the rate of 19 tons per acre.

If the soil is rich and clean sow broadcast; if not so clean, sow in drills and cultivate as for corn. Rape is especially adapted for a catch crop, succeeding well when for any cause other crops have failed; as it, like turnip, makes its growth late in the season, can be sown on stubble, and will furnish excellent pasturage when much needed in the fall. In drills sow 10 lbs. per acre; broadcast 15 lbs. per acre. Lb. 10 cts.; 100 lbs. \$6.50.

Spurrey (Spergula arvensis). Annual. This plant will grow on land that is too dry and too thin to support clover, and so rapidly that three sowings may be made in one season. The crop may be fed both green and as hay. It is in condition to pasture sheep or cattle on in about six weeks after sowing, and sowings may be made every month from April to August. Sow broadcast 20 pounds per acre. Per lb. 15 cts.; per 100 lbs. \$10.00.

Sunflower, Large Russian. The seeds are a valuable poultry feed, and in a rich loam from 30 to 50 bushels per acre are produced. The leaves, it is claimed, make excellent fodder for cattle. The whole plant, seed heads included, is sometimes cut up and mixed with the corn in the silo. Drill at the rate of 10 lbs. per acre. Lb. 8 cts.;

100 lbs. \$5.00.

Teosinte (Reana luxurians). A valuable fodder plant, that in growth resembles Indian corn. It seems to do well in New England, and if cut early when tender is much relished by cattle and will give two or three crops in a

season. Oz. 15 cts.; lb. 75 cts. Vetches, Spring Tares (Vicia sativa). Sown broadcast at rate of one to one and a half bushels to the acre, like wheat or barley, and sometimes mixed with oats for soiling. Used in France and Canada as a substitute for peas. Also ground up into flour, after which it is mixed with wheat flour for making bread. A valuable plant. Per qt. 20 cts.; per bush. \$3.25.

Sand or Winter Vetch (Vicia Villosa).

Vicia villosa succeeds and produces good crops on poor, sandy soils as well as on good land; grows to a height of four to five feet. It is perfectly hardy throughout the United States, remaining green all winter, and should be sown in the spring, mixed with oats, spring rye or barley; or during August and September, with winter rye, which serves as a support for the plants. It is the earliest crop for cutting, being hardier and nearly a month earlier than Scarlet Clover, and a full crop can be taken off the land in time for planting spring crops. Every dairyman and stock-breeder in the United States should have a field of it, and if you try it once you will never be a season without it. It is exceedingly nutritious, eaten with relish, and may be fed

with safety to all kinds of stock.

Wheat and Winter (Sand) Vetch. This mixture of a non-legume and a legume promises to be a very desirable spring green fodder. It has been planted for two years, and a third planting looked exceedingly well last autumn. The first planting — made in the late summer of 1898 — winter killed, owing in all probability to the fact that the seed was sown too early (August 1). The second year, 1899, the seeding took place August 25, and an excellent yield was secured the following spring. One and one-half bushels of wheat and one bushel of vetch were sown to the acre at one sowing, and covered with a wheel harrow. Cutting was begun May 31 just before the wheat began to head. The vetch began to blossom June 5. The yield was at the rate of 10 tons of green fodder to the acre, and cutting was continued for 12 days. The spring of 1900 was fully 10 days backward, and the rainfall quite deficient. Had the weather been as warm as usual and the precipitation normal, cutting would have begun earlier. If more of the fodder mixture has been produced than can be fed green the balance may be made into hay. The cost of the vetch seed is very high this season (\$5.50 to \$7.00 a bushel), due to the fact that in those sections where the seed is grown the drought was severe last year, and the crop was largely fed green. The usual price is one-third less. The vetch develops an abundance of root nodules, and must fix large quantities of atmospheric nitrogen. It has been found to be very digestible, and animals eat it freely.

Wheat itself when sown in early September at the rate of two bushels to the acre also makes a satisfactory spring green feed and is considered preferable to rye. If, however, it can be grown together with a leguminous crop, the nutritive value of the fodder mixture is decidedly enhanced. Land from which wheat or wheat and vetch have been removed can be immediately sown to corn, corn and beans or Hungarian grass. Per qt. 20 cts.; per bush. \$5.00.

Vetches.

I am happy to inform you that the goods received of you have given entire satisfaction both in regard to quality and prices. I may also remark that the orders have been promptly and satisfactorily attended to.

WM. MacCHLERIE, Oakley Country Club, Watertown, Mass.

Sorahum.

OUR SPECIAL OFFERS DO NOT apply on goods under this heading. Twenty-five pounds per acre is sown in drills. For dry fodder, broadcast 100 lbs, per acre.

Early Amber Sugar-Cane. Ripens where Indian corn matures. Per lb. 12 cents: per 100 lbs. \$7.00. Early Orange Sugar-Cane. Ripens about 10 days after Early Amber. Per lb. 12 cents; per 100 lbs. \$7.00. Brown Dhoura Corn. Per lb. 12 cents; per 100 lbs. \$7.00.

Yellow Branching. (Yellow Millo Maize.) It is non-saccharine; used only for the large amount of foliage, green feed, or cured fodder that it furnishes, and for its grain. Per lb. 12 cents; per 100 lbs. \$7.00.

White Branching. (White Millo Maize.) The merit of this non-saccharine sorghum is, that when cut for feeding 't starts again from the remaining stumps with renewed strength and vigor; thrives in the hottest and driest localities. Per lb. 12 cents; per 100 lbs. \$7.00.

Red Kaffir Corn, or Sorghum. Non-saccharine. The plant is low, stocky, perfectly erect. The whole stalks, as well as the blades, cure into excellent fodder, and in all stages of its growth is available for green feed. Per lb. 12

cents; per 100 lbs. \$7.00.

White Kaffir Corn. Per lb. 12 cents; per 100 lbs. \$7.00.

White African Sorghum, African Millet, or White Dhoura. Per lb. 12 cents; per 100 lbs. \$7.00.

Jerusalem Corn. One of the best and surest for dry countries and seasons. Grows about three feet high, with one large head on main stalk and several smaller heads on side shoots. The grains are white and nearly flat. Per lb. 12 cents; per 100 lbs. \$7.00.

Grasses.

Special attention is called to the fact that by advantageous arrangements with the parties who grow the different seeds for us, we are enabled to make a large reduction in the prices of Permanent Pasture and other Grass Mixtures, without impairing the very high standard of purity and germination that we have always maintained.

"And he gave it for his opinion that whoever would make two ears of corn or two blades of grass to grow upon a spot of ground where only one grew before would deserve better of mankind, and do more essential service to his country, than the whole race of politicians put together,"-

We desire to call special attention to the following list of AGRICULTURAL GRASSES, which will, we think, be found very comprehensive, both as to varieties and descriptions. We are devoting a great deal of time to this most important subject, and the department has already

become an extensive one with us.

Having learned by experience that the so-called imported grasses which are offered by those making a specialty of them in this country are very far from reliable, both as regards purity and quality, we have found it necessary to import all our seeds of this character direct. We have accordingly made arrangements for our stocks with one of the most prominent growers of Agricultural Grasses on the Continent, who, by virtue of many years' experience in growing seeds of this peculiar character, has become the recognized headquarters for same. This will enable us to furnish our customers with the very best, and that which we know to be free from all adulteration.

Grasses — Continued.

It seems almost unaccountable that at this day, when the different branches of practical agriculture are seemingly so thoroughly understood, that our American farmers should apparently ignore the importance of sowing upon their fields only those kinds of grasses which are adapted to the soil and climate, and which will produce in the shortest length of time a luxuriant crop of the desired character. The list of grasses now in use by most of our farmers can be counted on the fingers of one hand, which showing is indeed a small one, when we take into consideration the many species, valuable because of their respective merits, which should be in constant demand for the various soils and climates of America.

We invite special attention to our "Mixtures" for Permanent Pastures and Mowing Lands, which follow our descriptions. We have endeavored to bring into prominence a few important facts under the head of *Mixtures*, which, we think, cannot fail to be of interest to any one who is concerned in the laying down of profitable pastures, or who desires to obtain large crops of hay of choice quality from his fields.

Awnless, or Smooth Brome Grass (Bromus inermis). An erect growing perennial that attains a height of from three to five feet.

It is especially recommended for dry and arid soils where the more delicate grasses will not grow. (Per bushel 12 lbs.)

Creeping Bent or Firoin (Agrostis Stolonifera). The distinctive feature of this species is, as the name implies, its compact, creeping, rooting stems. It prefers low bottom-lands, especially if they are somewhat sandy. It is of rapid growth and spreading habit, and the stoloniferous roots form a strong enduring turf, that is positively improved by constant trampling. Being of fine texture, it is one of the most valuable of our lawn grasses. (Per bushel, 15 lbs.)

Meadow Brome Grass (Bromus pratensis). A hardy perennial useful in mixtures for both mowing and pasture. It should not be sown alone except in poor soil or dry hillsides. It withstands extreme cold and drought, and if cut before flowering it makes a good hay. (Per bushel 18 lbs.)

Timothy (Herd's Grass or Catstail) (*Phleum Pratense*). Root fibrous on moist soils; on dry soils often bulbous; perennial; flowers in June and July. While this grass is commonly known as Timothy, it is frequently called Herds Grass, as this is the name under which it was originally cultivated. It is, without doubt, a most valuable grass for hay, especially in the North. It thrives best on moist, loamy soils of medium tenacity. Grows very readily and yields large crops on favorable soils. Should be cut just when the blossom falls. The hay is of best quality, yielding, under favorable circumstances, three or four tons per acre. (Per bushel, 45 lbs.)

Orchard Grass (Dactylis glomerata.) Root fibrous; perennial; flowers in June and July. This is one of the most valuable and widely known of all the pasture grasses. Its rapidity of growth, the luxuriance of its aftermath, and its power of enduring the cropping of cattle, all commend it highly to farmers. Thrives well on light soils, and as its roots penetrate to a considerable depth, where the subsoil is favorable, it withstands droughts better than most species on dry sandy soils. It is very valuable to be used in a mixture with Timothy and Clover, and produces splendid crops of hay. This grass is sometimes condemned because of its coarse growth, which is only apparent when in a neglected condition, but with proper management no grass is more valu-

able. When pastured Orchard Grass should never be allowed to become coarse, but should be kept closely cropped. In this condition it is highly nutritive, and relished very much by all kinds of stock. (Per bushel, 14 lbs.)

Kentucky Blue Grass (Meadow Grass, June Grass, Spear Grass), (Poa pratensis). Root creeping; perennial; flowers in June. This valuable grass is very common in the soils of America, and is claimed by some to be the most valuable of all the grasses in our pastures.

Orchard Grass.

On the other hand, some claim that its creeping root impoverishes the soil. It is a fact, however, that it grows very luxuriantly, producing the most nourishing food for cattle until late in the season in the North, while in the South abundant herbage is furnished throughout the entire winter. It is a very valuable species in lawn mixtures. Kentucky Blue Grass requires about two or three years to become well set, and does not arrive at perfection as a pasture grass until the sward is at least four years old, hence it is not suited for alternate husbandry, or where the land is to remain in grass two or three years, and be then plowed up. (Per bushel, 14 lbs.)

Red Top (Herd's Grass), (Agrostis Vulgaris). Root creeping; perennial; flowers Kentucky Blue Grass. in July. This valuable grass has been commonly cultivated in our fields for over a century. It is a fine permanent grass, and forms a nutritious pasturage when fed close. It is valuable for all wet soils producing a large return in good hay. Red Top is often sown with Timothy and common Red Clover, in which case the Clover soon disappears, followed by Timothy, after which the Red Top usually takes its place, and with some wild indigenous grass forms a close sward. When sown alone three bushels per acre are required, or 15 lbs. of the clean seed. (Per bushel, 10 lbs.)

Fancy or clean seed per bushel, about 40 lbs.

Italian Rye (Lolium Italicum). This is one of the most valuable grasses brought into notice during the present century. In nutritive value, earliness and quickness of growth after it has been mown, it by far surpasses the Perennial Rye Grass. It is, therefore.

indispensable for alternate husbandry; but as it does not last over two years it

is of no use in permanent pastures. The soils best adapted to Italian Rye seem to be those that are moist, fertile, and tenacious, or of a medium consistency, and on such soils it is said to be one of the best grasses known to be cut green, affording repeated luxuriant and nutritive crops. (Per bushel, 18 lbs.)

Fowl Meadow (False Red Top, Duck Grass, Swamp Wire Grass), (Poa serotina). Root slightly creeping; flowers in July and August. This perennial native grass is found on lowlands in many places, though it seldom takes full possession of the soil unless seed is sown. It has been largely introduced into New England, and is particularly adapted to moist. rich soils, such as the borders of rivers, ponds, etc., owing to the fact that an occasional overflow will not injure its growth. It may be mown at any time from June to October, as it never becomes so coarse and hard but the stalk is sweet and tender and eaten without waste. It

Crested Dog's-Tail. makes an excellent grass for oxen, cows, and sheep, but is thought too fine for horses. It is easily

made into hay which is of a nutritive character. (Per bushel, 10 lbs.)

Meadow Foxtail (Alopecuris pratensis). Root fibrous; perennial; flowers in May. This is one of the best grasses for permanent pastures, and should always form a fair proportion of the mixtures for that purpose, because of its extremely rapid growth and great nutritive qualities. Thrives best on a rich, strong soil. As the Meadow Foxtail shoots up its flowering stalk much earlier than Timothy, it can be easily distinguished from the latter, which, at first sight, it greatly resembles. It endures the cropping of cattle and sheep probably better than any other variety of grass, making it, as stated above, well-nigh indispensable in all first-class permanent pastures. The nutritive qualities of Meadow Foxtail are most abundant at time of flowering. (Per bushel, 8 lbs.)

Crested Dog's-Tail (Cynosurus cristatus.). Roots fibrous and tufted; perennial. This is a most

valuable permanent pasture grass. It is very tender and nutritious at time of flowering. If, however, it is left until the seed ripens, cattle will not eat it on account of its wiry stems. For parks this grass is well suited, because of its fine, close growth, and pleasant green color. It should form a portion of all mixtures

for lawns. (Per bushel, 28 lbs.)

Meadow Fescue, or English Blue Grass (Festuca pratensis). Root creeping; perennial; flowers in July; one of the most valuable of the Fescue grasses. This grass is well adapted for permanent pastures, and is also sometimes used for alternate husbandry. It grows rapidly in rich and rather moist soils, and makes an excellent pasture grass, its long, tender leaves being much relished by cattle. It should be always sown mixed with other grasses. (Per bushel, 15 lbs.)

Sheep's Fescue (Festuca ovina). Somewhat creeping; perennial; flowers in June and July; especially desirable on light, dry, sandy soils. It is much liked by sheep, and should always enter into the compositions of mixtures for lands on which they are to be pastured. Its compact and fine growth make it suit-

able for lawn mixtures. (Per bushel, 12 lbs.)

Fine-Leaved Fescue (Festuca Tenuifolis). This is really a variety of Festuca Ovina, with much finer leaves. It will grow on very dry and inferior soils, and its dwarf habit of growth and fineness of leaf render it not unsuitable for dry slopes on lawns. It stands grazing well, is very hardy, and lasts long, and may therefore be recommended for

permanent pasture on high and dry situations. (Per bushel, 22

Tall Fescue (Festuca elatior). Root fibrous, somewhat creeping; perennial; flowers in June and July. In appearance this species resembles the Festuca pratensis, but is larger and of stronger growth. It thrives well on moist soils, and yields abundant crops Cattle and stock eat it greedily. It should form a portion of every mixture for permanent pur-poses on moist soils. (Per bushel 15 lbs.)

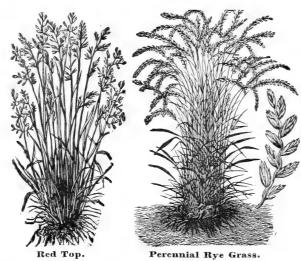

Sweet Vernal.

Meadow Foxtail.

Hard Fescue.

Rhode Island Bent (Agrostis canina). Root creeping; perennial; flowers in July. A most valuable permanent grass, largely used in New England for pastures and for lawns. For the latter purpose it is often sown by itself, and if cheapness is an object perhaps it is as good as could be sown, but we recommend the lawn mixture wherever practicable. Soil and treatment same as for Red Top (A. vulgaris). (Per bushel, 10 lbs.)

Fancy or clean seed, per bushel, 40 lbs.

Rough Stalked Meadow Grass (Poa trivialis). Root fibrous; perennial. This grass is valuable on account of its quick growth, productiveness, and nutritive qualities. Grows in perfection on moist, rich soils, and is also well adapted to ground shaded by trees. Grows early in the spring, and continues green until late in the fall. As it delights in shelter, its produce is always much greater when sown with other grasses. Does not thrive well on dry soils. (Per bushel, 14 lbs.)

Perennial Rye (Lolium perenne). A very valuable grass; arrives early at maturity and produces a good supply of herbage, of which cattle are very fond. It grows freely on almost any soil, and shows a very

early spring growth. Although a perennial grass, the root will not live over three or four years, and unless the plant is allowed to reproduce from self-sown seed it will die out in about that time. This is an objection to its extensive use for permanent pastures, but for hay crops it may be introduced to good advantage along with other grasses and clovers.

(Per bushel, 24 lbs.)

Hard Fescue (Festuca duriuscula). This is one of the best grasses of the Fescue family. It is regarded by some as a variety of the Red Fescue, though taller, and the panicle more open. It is found in all the finest permanent pastures of the country, and is much valued for its dwarf habit. It resists the summer drought, and develops remarkable werdure during winter. It should form a part of every mixture for lawn or pleasure grounds, and for permanent pasture and alternate husbandry. (Per bushel, 14 lbs.)

Red or Creeping Fescue (Festuca rubra). This grass is found growing on light, dry, sandy soils, and from its creeping habit will be found of great value on sandy seacoast lands. It is a grass of better quality than some of the uncultivated species, but is not usually cultivated in this coun-

try as an agricultural product, except on elevated sheep pastures. (Per bushel, 13 lbs.)

Sea Mat Grass (Ammophila Arundinacea). Valuable on the sandy seashore, canal and ments against the action of wind and waves. This grass is usually propagated by transplanting in the fall. Where it is necessary to use seed, it should be sown in spring, and ground covered with brush to hold the seed in place until it has taken firm hold. (Per bushel, 15 lbs.)

Upright Sea Lime Grass (Elymus Arenarius). Valuable on the sandy seashore, canal and railroad banks, etc. It tends, with its tough, wide-spreading and thickly matting roots, to form natural and permanent embankments, thus serving to prevent the drifting of the sand, and to protect an exposed shore from wind and waves. It is of no agricultural value. (Per bushel, 12 lbs.)

Sweet Vernal (Anthoxanthum odoratum). Root fibrous; perennial flowers in May. grass is valuable on account of its early growth and its hardy and permanent nature, which, added to the fact that it throws up its flower stalks till the end of autumn, upholds its claim to a place in all compositions where permanency is an object. It is very fragrant, and imparts a pleasant odor to the hay. Will grow in almost any kind of soil, but prefers those which are rich and moist. It is greatly relished by sheep, and is found growing naturally on upland pastures. A ment of "lawn mixtures" it is most valuable, and is largely used for this purpose. The

seeds of this grass are scarce and most difficult to be had TRUE. An inferior variety of Anthoxanthum being sometimes offered at a low price by unscrupulous dealers, care ought to be exercised in buying. Our seed is guaranteed to be the true Perennial Sweet Vernal. (Per bushel, 11 lbs.)

Yellow Oat Grass (Avena flavescens). This grass deserves to form a portion of all mixtures for permanent purposes, and is well suited for lawns, croquet and It thrives best on light, dry soils. The seed we offer is guaranteed to be the true Yellow Oat Grass. (Per bushel, II lbs.)

Tall Meadow Oat Grass (Arrhenatherum avenaceum). A fibrous-rooted perennial; flowers in July; of luxuriant growth, and valuable in permanent pasture mixtures, on account of its early and late growth. It succeeds best on deep, sandy lands, and is suitable for sowing in orchards or other shady places. (Per bushel,

Wood Meadow Grass (Poa nemoralis). This grass, as its name implies, is focuted naturally in woods and is well adapted for growing under trees. It is especially desirable, from its fine habit of growth, for sowing on shady lawns and under trees, om pleasure grounds. Root fibrous, flowers in June and July. (Per bushel, 14 lbs.)

Various Leaved Fescue (Festuca heterophylla). A very early hardy perennial, two to three feet high, thriving best in cool, moist soils. It yields heavily and is a waluable grass in mixtures for permanent meadows, either for mowing or grazing. Its great production of root leaves makes it an excellent bottom grass. It grows well in the shade and is suitable to form part of a mixture for shaded lawns. (Per bushel, — lbs.)

Sheep's Fescue.

White Clover.

Millets.

Hungarian Grass (Panicum Germanicum). This is a species of millet, growing less rank, with smaller stalks, often yielding two or three tons of hay per acre. It is very popular and valuable. Like the common millet, it is an annual, and requires to be sown every season, but will produce a larger return than almost any other crop. (Per bushel, 48 lbs.)

Japanese Millet, Japanese Barnyard Grass (Panicum Crus Galli). Distinct from other varieties, enormous cropper, grows six to eight feet high, excellent either green or cured as hay. It prefers a moderately moist soil and may be sown in an average season from the middle of May until the first of July. Broadcast, at the rate of 25 lbs. per acre, or in drills 18 inches apart, 15 lbs. to the acre. (Per bushel, about 35 lbs.)

Breck's Japanese Millet (Panicum Miliaceum var. Japonica). In growth and appearance somewhat like the best Southern grown Golden Millet, but of superior quality and immensely more productive. Everything considered, we believe it is the bes millet yet introduced. (Per bushel, 50 lbs.)

Common Millet (Panicum Miliaceum). Requires a dry, light, rich soil, and grows two and a half to four feet high, with a fine bulk of stalks and leaves, and is excellent for forage. For hay, sow broadcast one bushel per acre from May first to August first. For grain, sow in drills, half-bushel to the acre, not later than June 20th. (Per bushel, 50 lbs.)

German or Golden Millet (Panicum Miliaceum var). An improved variety, medium early, growing three to

five fee high. The heads are closely condensed, though the spikes are very numerous. (Per bushel 50 lbs.)

During the past few years, the fact has been established beyond doubt that seed of the German or Golden Millet grown in Southern latitudes will produce a much larger yield of hay than from seed grown in Northern or Western sections of the country, and for that reason is far better for farmers to sow.

Siberian or Russian Millet. A recent introduction and especially recommended for growing in New England. It

is quite as leafy and a heavier cropper than Hungarian. (Per bushel, 50 lbs.)

Clovers.

There are no plants so valuable for fertilizers as the Clovers. They have the faculty of absorbing nitrogen from the air, and also of rendering available much of the inert plant food of the soil. Their long, powerful tap roots penetrate to a great depth, loosen the soil, admit air, and by their decay add immensely to the fertility of the soil.

Medium Red (Trifolium prateuse). This is the common Red Clover in general cultivation, and too well known to need a general description. It is by far the most important of all varieties for the practical purposes of agriculture. When sown alone produces hay of splendid quality, and with Timothy or other grasses forms a desirable pasture. (Per bushel, 60 lbs.

large that stock will eat only the lands which have been exhausted where the common clover will

Alsike or Swedish (Trifomost hardy of clovers, and is sists cold and extreme drought yields an enormous amount of quality. Can be cut several suited to low lands liable to wash, over a large area and hold the rains. The heads are globular, much liked by bees, who obtain them. (Per bushel, 60 lbs.)

Lucerne or Alfalfa (Mediiety succeeds well it is probably It is not, however, clovers. ern or Northern States, but Southern. It requires a fine tablished, but when once thorfitable crop for a number of years. of green fodder, and should be som. White Clover (Trifolium

Alsike Clover. clover to the farmer is well nearly every natural pasture. It is adapted to all soils. Being a deep-rooted plant, it withstands drought on dry, sandy sections. It should form a part of all mixtures for permanent pastures, and is also valuable for alternate husbandry, when these crops are sown down for more than one year. (Per bushel, 60 lbs.)

Crimson Clover (Trifolium incarnatum). It is also known as Scarlet Clover and Carnation Clover. It is of rapid growth, and of great value where only one crop is desired, sown either alone or with Italian rye grass. It is an immense yielder, and can be fed green or made into hay. It may be sown in the fall for an early summer crop, or in

the spring for cutting in July. (Per bushel, 60 lbs.) Yellow Trefoil (Medicago lupulina). An annual or biennial suitable for pasture in wet meadows, or for stiff,

clayer soils which are too poor for Red Clover. (Per bushel, 60 lbs.)

Bird's=Foot Trefoil (Lotus corniculatus). Perennial; used in dry pastures. Cattle and sheep eat it readily and it is said to be quite nutritious. It does well on very light and dry soils, and is recommended for sowing in mixtures for dry pastures. (Per bushel, 60 lbs.)

Mammoth or Pea Vine (Trifolium pratense var). Grows five or six feet high; its stalks are so coarse and leaves, but by its judicious use can be reclaimed, as it will grow fail. (Per bushel, 60 lbs.)

Mixtures for Permanent Pastures.

"One thing is certain: that good pasture land is the foundation of the riches of a farm." - SINCLAIR.

The oft-repeated complaints of wornout and exhausted pastures, made to us by some of our best New England farmers, have long impressed us with the fact that there must be something radically wrong with the manner in which our pastures are formed and cared for. Some remedy for this state of matters is imperatively necessary, and it seems to us that one most important line of improvement would be the sowing

of a larger number of species of grasses in the laying out of these pastures.

As we have already expressed as our opinion, farmers, as a rule, in preparing their mixtures of grasses to be used in the laying down of permanent pastures, confine themselves to too few varieties, thus failing to arrive at the most profitable results. The chief properties which give value to a grass are nutritive powers, produce, early growth, and reproductiveness (that is, the property of growing rapidly after being cropped). If one species of grass could be discovered that possessed all these qualities in a superior degree to every other, there would be no necessity beyond that of botanical science for us to acquire the knowledge which enables us to distinguish the different species of grasses, the soils and subsoils best adapted to their growth, natural habits, and comparative value; but the results of all experiments have proven that a combination of all the merits and properties which give value to a grass is not to be found in any single species, or in fact in any two or three. In sowing a mixture or a number of different varieties we are but following nature, who can be always depended upon as the best teacher. This can be easily demonstrated by the careful examination of any old, rich, permanent pasture, on which will invariably be found fifteen or twenty species of grass or forage plants growing in great profusion. Where, however, it is left to nature to supply the necessary plants to make a rich and succulent pasturage, a great deal of valuable time is, of necessity, lost, or seven or eight years will elapse before the field will naturally assume the character of a rich and profitable pasture, while by artificial means the same result can be brought about in one-fourth the time.

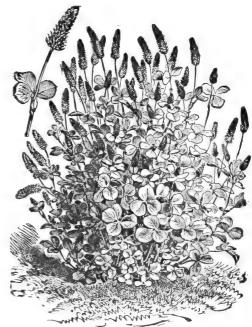

In compiling any table of grasses and clovers to be used for permanent pasture purposes there are several important features to be taken into consideration. First, the proportion of plants which would be produced from the amount of each kind of seed sown should be determined, so that the undue predominance of any particular variety may be avoided. We have given this point special consideration in preparing our mixtures. A selection of grasses should be made that blossom at alternate months of the year, as it is a well-known fact that there is no month from April to September inclusive, in which some of the val-

uable grasses do not attain their full perfection.

By using a mixture comprising these species, it will be at once apparent that a rich and luxuriant growth will be secured throughout the entire season, which result cannot possibly be obtained if the stereotyped mixture usually recommended composes the sward. It would be almost impossible for us to give a series of tables which would comprehend all the variations of soils, altitudes and climates. We think, however, that those we have compiled will be found sufficiently comprehensive to meet all the contingencies that arise in ordinary farming.

These mixtures, which we recommend only after careful study and consultation with the best authorities, are of little or no value unless the seeds composing them are absolutely pure and true to name. We, therefore, especially request those who desire to obtain the best results from their mixtures for alternate husbandry, mowing lands, and permanent pastures, to avoid the probability of disappointment which would naturally attend the placing of orders with parties who have never given any degree of attention to this most important subject, and buy from us direct (or authorized agents), who are the first in this country to make a specialty of this branch of the seed business. We doubt if a full stock of all the grasses which form the components of our mixture could be found anywhere in the United States outside of our own establishment, and know they cannot be obtained in the same quantities and of equal quality.

In conclusion, we would say, that although pastures be formed in the best manner as recommended by us, with a combination of MANY different species of grasses, yet a judicious mode of treatment afterwards is as necessary to continue their value. By proper stocking and top-dressing, very indifferent postures may be brought to active of the factories.

Crimson Clover.

ferent pastures may be brought to a state of great fertility; but, on the contrary, the richest pastures by neglect of proper stocking, top-dressing, or by the too frequent repetition of hay crops, will become so unprofitable as to require many years to bring them again to their original value. This fact every practical farmer is well aware of, and after the proper mode of sowing and stocking has been determined on, a suitable top-dressing should be found. Under the head of Fertilizers, in another part of this Catalogue, will be found a reliable top-dressing, which we can strongly recommend as being specially adapted for pastures of this character.

ALTERNATE HUSBANDRY. Mixtures for Mowing and Grazing Lands.

As the pioneers of grass mixtures in this country, we naturally have great pleasure in Learning from day to day and season to season that our remarks under the heading "Mixtures for Permanent Pastures" are fast becoming universally admitted facts; and we predict with confidence that the time is not far distant when the practice of sowing only one or two varieties of grass seeds with the hope of obtaining the best results from it will pass, and the better and more profitable one of following nature's plan be adopted.

Many of our statements regarding Permanent Pasture Mixtures are equally pertinent when applied to Alternate Husbandry. It does not require much thought to convince any practical agriculturist that there is no basis to a system that employs the same quantity and kinds of grass seeds on all occasions, without regard to soil, duration of lay, or the condition in which the crop is to be used. All mixtures for Alternate Husbandry should include, say for one or two years' lay, only annual and biennial or other sorts that attain full maturity within that period; for two or three years' lay a greater quantity of seed is required, which should embrace a larger proportion of permanent sorts, so that the

places of the dead annual kinds may be filled by the varieties that

are of slower growth.

If a mixture principally for mowing is intended to lay more than three or four years, especial care is necessary in selecting and adjusting the several varieties of grasses in proper proportion. A three or four years' lay sown with grasses that are only of annual or biennial duration must be either very thin or foul at the end of the period for which it was laid down—the spaces vacated by the annual and biennial grasses being in all likelihood occupied by objectionable weeds, when, if a proper selection of those species capable of lasting the whole of the desired period were sown, the lay would remain full of plants, free from weeds, and, consequently, much more profitable

during the whole time the land is in grass.

The practice of mowing grass for hay when the plants are in blossom is acknowledged to be a good one, in that it is not so exhausting to the soil, and a more succulent hay, freer from dust, is obtained; it has, however, from the fact that all natural reseeding is prevented, a tendency to weaken the plants and reduce their number; hence, when we see an old field of grass that was originally sown with Timothy, Redtop and Clover, and which has been mowed, perhaps, twice annually, we can readily account for either the enormous number of weeds or vacant places that are sure to be noticeable. Our system of mixture practically overcomes this difficulty by the continued growth and stooling out of some of the varieties included that do not attain full maturity under four to six years. Such mixtures, although in the first place more expensive than the ordinary orthodox seeding, are in the end more profitable; we have seen aftermaths from permanent mowing mixtures that more than equaled first crops of Timothy.

In making up the following tables the utmost care has been exercised, and we have no hesitation in recommending them to our patrons.

Lucerne Clover.

NOTE.

It will be noticed that the different tables are all based on the quantity required to sow one acre, so in ordering, our patrons will please state the number of acres for which the seed is desired. We shall, unless we are especially instructed to the contrary, put up each variety of seed in separate packages, packing the entire quantity necessary for one acre in a case. We recommend our friends to always buy their mixtures put up as above, and to refuse to receive them in any other shape. The advantage of buying the seed before it is mixed is very apparent, as it insures the purchaser obtaining the exact varieties and quantities which should compose the mixture he has ordered. This protection cannot be enjoyed where the seed is mixed before it is sent out.

PRICES FOR JOSEPH BRECK & SONS' SPECIAL MIXTURES FOR PERMANENT PASTURES AND MOWING AND GRAZING LANDS.

When ordering, simply give number and kind of mixture selected and the number of acres for which seed is desired; for example: "Send me No. 2 Mixture for Permanent Pastures for three acres."

Special prices for quantities for ten acres and upwards.

While it is true that the mixtures which we have recommended are SEEMINGLY much more expensive than what is commonly used, it should be borne in mind that a vastly increased value is given to the pasture not only for one year, but if the land is properly cared for it will remain in good condition for fifteen or twenty years without further sowing, and produce double the amount of fodder, while the ORDINARY sowing has to be repeated every three or four years; thus, in the end, costing more than four times as much as what would be paid originally for the proper mixture.

CAUTION.—Appreciating the fact that unscrupulous parties will probably offer mixtures for permanent pastures, mowing lands, and alternate husbandry, purporting to be the same as ours, we shall, as a matter of protection to both our patrons and ourselves, stencil or print on each case, and also on package containing each variety of seed, our name and address, and request our patrons before purchasing from any other source than ourselves direct, that they examine the case containing same, and if not stenciled as described they may know that IT IS NOT our mixture, and therefore not in any way entitled to our endorsement.

BRECK'S STANDARD LAWN GRASS.

By the courtesy of Mr. Thomas W. Lawson, Boston, Mass., we reproduce here a view of his beautiful country seat, Dreamwold, at Scituate, Mass. The fine lawn shown here is the product of Breck's Standard Lawn Grass Seed. The photograph was taken about three months from the time the seed was sown.

We have given much thought and made many experiments in order to ascertain just what is the best mixture for permanent lawns, and the grasses which are best suited to this climate. By the proper blending of the varieties which constitute Breck's Lawn Grass, we have obtained a mixture that from early spring to late fall will give to lawns made with it that rich, deep green so often admired upon the lawns and parks of England, but so seldom seen in this country. One quart will sow 300 square feet. Price, per qt., \$0.25. One peck will sow 2,400 sq. feet. Price, per pk., \$1.25. " bushel will sow 1,000 " "bush., 4.00. Four bushels will sow one acre.

Boston Park Lawn Grass.

The same mixture of grasses and clover as supplied by us to the City of Boston Park Commissioners for sowing on the Franklin and other parks administered by them. Per lb. 30 cents — will sow 680 sq. feet. 16 lbs. \$4.00 — will sow one-quarter acre. 64 lbs. \$15.00 — will sow one acre.

When desired we make special mixtures of grasses to suit different soils and conditions.

Breck's "Shady Spot" Lawn Grass.

This is a mixture of grasses that are naturally adapted for growing under trees and in places where the sun does not find ready entrance. If sown on such locations, in place of the ordinary Lawn Seed, bare and unsightly spots will be prevented. Per qt. 25 cts.; pk. \$1.25; bush. \$4.00.

Breck's Bank and Terrace Grass Mixture.

A mixture of deep-rooting grasses specially prepared for embankments and situations where it is impractical to get a successful catch of the less spreading rooted sorts. It produces a rich velvety turf throughout the season. No coarse-growing undesirable varieties are used in this mixture. Per qt. 25 cts.; pk. \$1.25; bush. \$4.00.

All seeds and other goods purchased of you the past season were very satisfactory. Your lawn grass seed is of a superior quality in germinating and producing a rich, deep green sward. I had to mow in thirty days after planting.

DAVID WEIR, Supt. to Mrs. C. F. Sprague, Brookline, Mass.

GOLF GRASSES.

THE COUNTRY CLUB, Brookline, Massachusetts.

Messrs. Joseph Breck & Sons (Corp.), 47 to 54 North Market St., Boston, Mass.

Dear Sirs:—I have used your seeds, grass seed especially, for the last four years and it gives me great pleasure to say that I have wondered that I was able to get such excellent results, and I think it speaks wonders almost for your concern that you are able to supply your customers with seeds of such excellent quality. I have never had occasion to doubt that the seed was always just what I bought and I have marvelled time and time again to notice that such a large percentage should germinate and grow strongly.

Sincerely, G. H. KELTON, Supt.

In order that we might be the better able to serve our friends in making selection of grasses that will give best results on Golf Courses and Putting Greens under the many varied conditions of soil, etc., that exist, our representative last summer visited Prestwick, Bogside, St. Andrews, and other principal Golf Links in Scotland, and carefully ascertained particulars as to the kinds of grasses used for the different situations and purposes. The soil and effect of climate on these grasses, as compared with those prevailing in New England, have had due consideration, and we now offer, under the name of the

Prestwick Golf Grasses,

A series of mixtures, modified as experience warrants for our needs, that we are sure surpass any hitherto offered in the United States. No. 1. For Putting Greens, sow at the rate of 80 lbs. per acre. Per lb. 16 cts. No. 2. For Courses, light and dry soils, sow at the rate of 50 lbs. per acre. Per lb. 14 cts. No. 3. For Courses, low and damp soils, sow at the rate of 50 lbs. per acre. Per lb. 10 cts.

The Grass Seed which I purchased from you lest spring, and have used the past season on our putting greens gave entire satisfaction. I found it brought forth a rich, strongly rooted growth of grass, free from weeds, etc. I shall certainly use no other in future.

E. F. YOUNG, Manager Merry Mount Golf Club, Norfolk Downs, Mass.

BRECK'S KNO-WORMS,

A Famous Scotch Preparation, Destroys and Prevents all Kinds of Worms in Putting Greens, Lawns, etc.

This ...as given satisfaction for years on the Golf Links of Scotland. It is cheaper than any other preparation offered and will be found more effective.

It is also a specific for cut worms and ants. Easily applied. Full directions for use on every package. Price, qt., makes 25 gals. solution, 50 cts.; ½ gal., makes 50 gals. solution, 85 cts.; gal., makes 100 gals. solution, \$1.50.; 5 gals., makes 500 gals. solution, \$6.50.

LAWN HINTS.

In forming a new lawn, care should be taken in preparing the ground before seeding, for desirable grasses, like other valuable plants, will not thrive unless properly planted and fed. Have the soil put into condition by draining, if necessary, manuring, deep digging and trenching, for it is vain to expect a lawn to retain its beauty during the scorching days of July and August unless the ground is thoroughly pulverized, so that the roots of the grass can penetrate at least 18 inches deep. After the ground is trenched it should be harrowed, all stones, roots and rubbish removed, and made perfectly level, —for if this is not done before the seed is sown it cannot be done after the sward is formed, without great expense and labor, — and left to settle a week or ten days. Then it should be raked smooth, after which it is ready for the seed.

To Renovate an Old Lawn.

When lawns are worn out from neglect or other causes, and where it is not convenient to renew them by spading up and reseeding, they may be greatly improved by a thorough raking, early in spring, with a short-toothed steel rake so as to remove the moss, dead roots, leaves and other useless incumbrances; then scatter evenly over the surface a coating of fine, clean loam, to the depth of, say, half an inch. Breck's Lawn Grass Seed should then be sown, using about halt the quantity of seed required for new lawns, again rake lightly and roll down firmly. All lawns are much benefited by a scattering of seed every season, and it may be sown with equal success either in spring or in the beginning of September.

Enemies.

For a year or two lawn owners in Massachusetts have been greatly annoyed with the Chafer Beeile or June Bug, the larvæ beginning their work of destruction early in June. It shows in small, round patches that turn red through the cutting off of the roots of the grass plants. If these patches are examined the plants will be found dead, the roots having been destroyed about an inch and one-half below the surface. If the battle is begun at this early stage there is little difficulty in overcoming the insects, but if they are allowed to make much headway the fight is more troublesome. As soon as the red patches show, obtain a wood beetle or paving rammer and thoroughly pound all such spots and a little over on to the green, healthy plants; this will kill the larvæ. Apply Breck's Lawn Dressing at the rate of five to make root and grow faster than the grub can work.

It however, the larva is allowed to get control, the cure consists in reseeding in August or September. On lawns that have been made within a couple of years the grade need not be disturbed nor the ground dug over, the new seed bed being prepared by using a manure fork or rake to loosen the surface soil and remove the dead turf. Put on sufficient soil to bring the ground to the old level, sow the seed, rake in and roll. In the case of old lawns where the soil is hard and where the ground has not been turned over for a number of years it will be better to apply a dressing of nitrate of soda at the rate of two or three hundred pounds per acre in warm, sunny weather, and, say, three days later, proceed

to remake the lawn, following the directions given above.

Bees and Bee-Keepers' Supplies. Prices subject to change.

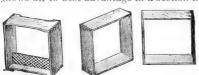

Having many calls from Market Gardeners, owners of Greenhouses, and Bee-Keepers, for articles in the Bee Supply line, we have made arrangements with a reliable apiarist to furnish full Swarms of Italian Bees, on Movable Frames, in Brood Chamber, all ready to be hived. By this method they can be examined at any time. Price upon application. We also have in stock Bee Hives, Section Boxes, Smokers, Brood and Section Foundation, Bee Veils, Rubber Gloves and many other articles necessary to the successful Bee-Keeper.

The Dovetailed (or Lock-Corner) Hive.

The particular feature of the Hive, and hence its suggestive name is the dovetailing. Unlike the old-fashioned lap, miter, or halving plan, it will not gap or pull loose, but will successfully resist all climates. This Hive is fitted with Danzentaker bottom board and cover. As we ship, it is fitted complete with starters in Brood Chamber and Section Boxes. have in stock but one size, the eight frame. All Hives set up ready for use. Net price, each, \$3.00.

Section Honey-Boxes.

Section Boxes, each, I cent; per 100, 75 cents; per 250, \$1.25; per 500, \$2.00. Our No. 1 Sections are made of the choicest white basswood lumber, and are all perfect in finish, and free from defects. They are not all snow white, but vary from that to a light cream color. Choice honey shows off to best advantage in a section not too white.

Section Honey-Boxes.

Bingham Smoker.

This is strong, well made, does not clog up and burns any fuel. It has recently been improved by the addition of a curved snout to prevent fire dropping, and a safety attachment to prevent burning the fingers in removing the hot cone for replenishing. They have wide shields; have wire handle to cone, and inverted bellows. Large 21/2 in., each, 70 cents; by mail, 90 cents. Bee Supplies not included in Special Offers.

Dovetailed or Lock-Corner Hive

MISCELLANEOUS REOUISITES.

Special Offer No. 3 only applies to articles on this page.

Baskets, Pansy or Verbena, Marston's Pattern. Wood or wire handles, standard size, 10 in. long 5 in. wide. 3 in. deep, per 100, \$2.00; per 1,000, \$18.00. Large size, 12 in.

Brushes, Flat Paint. For applying tree ink, and general use. Thoroughly well made and of good material all in the property of the material and in the property of the property

Caps, Hay, Breck's Improved, brown, medicated, complete with ropes and pins, 50 cts. each; \$45.00 per 100.

This color is famous the world over and is used wherever it is desired to impart the "golden tinge of June" to butter at all seasons of the year. Bottle sufficient to color 500 lbs. of butter,

25 cts.; for 1,200 lbs., 50 cts.; for 2,500 lbs., \$1.00. Cotton Batting. For packing flowers, etc., per sheet, 6 cts.

Food, Breck's Flower. This preparation is perfectly odorless and clean to handle. It is the most concentrated, safest and effective plant food on the market. Soluble in water, and no trouble whatever to prepare for use. It promotes a healthy, vigorous growth of wood, leaf and flower. Put up in two sizes - beautiful lithographed boxes.

No. 1, sufficient for 30 plants for one year, 25 cts.; by mail, 40 cts. No. 2, sufficient for 30 plants for three months, 15 cts.; by mail 25 cts.

Clay's Fertilizer. A famous English Fertilizer that is used by all the leading gardeners and florists in Britain who grow plants, flowers and vegetables for exhibition. It is not only perfectly safe to use, but lasting, effective, and the most economical for all horticultural purposes. It is equally valuable for the conservatory, greenhouse, garden and lawn, and will produce quicker and more lasting results than any other manufactured Fertilizer. Imported direct from the makers in original packages. 112 lbs., \$7; 56 lbs., \$4; 28 lbs., \$2.25; 2 lb. cans, 35c.

Glazing Points. The Peerless. The only durable and reliable points. Made of galvanized steel wire; no rights and lefts. No raising up when driving. Three sizes, Nos. 2, 2½ and 3. The Nos. 2 and 2½ are for general use; the No. 3 for extra heavy work. Price, per box of 1,000, 60 cts.

Pincers for driving same, 40 cts.

KILLER, FAIRMOUNT WEED. Kills weeds scientifically. Will keep your paths and roadways clear of all organic growth, and will not injure or discolor marble, or any kind of stone or gravel. One gallon of weed killer makes fifty gallons of treating liquid, and is sufficient to effectively cover (I 50 sq. yards of surface. ½ gal. tin, 75c.; I gal., \$1.25; 5 gal. keg, \$6.00.

Krop Kollar, Faye's Patent. This is one of the simplest, yet most useful articles that has been offered the farmer

and gardener for the protection of early crops from cut worms, cold winds and frosts. It consists of a flexible fibreboard collar that can be quickly adjusted around plants, a glass roof easily fastened on, and a shutter for use in extra cold weather. We believe it will prove of great value for protecting corn, melons and other early or tender plants. Net prices,

dozen, 70 cts.; 100, \$5.00.

We originally introduced Mastica to the horticulturists of New England. It is superior to any and all other preparations for the purpose, and when results and labor in setting or resetting glass are considered it is decidedly the cheapest article to use.

We are the Manufacturers' Distributing Agents for Boston.

For glazing greenhouses, new or old. The use of Mastica avoids the necessity of frequent re-glazing. It can be used to bed in or on the outside, with a machine; one gallon will cover about 290 running feet (one side). Gallon cans, \$1.25; half gallons, 65 cts. 6% discount allowed on orders for 6 gallons; 10% discount allowed on orders for 10 gallons. Net F. O. B. Boston.

Machines for applying Mastica, \$1.25 each. Net.

Mats, Straw. Hotbeds, 6 x 6, \$1.75 each, 3 x 6 \$1.25. Other sizes to order.

Paper, White. For packing flowers, etc., per lb., 10 cts. Paper, Waxed. For packing flowers, etc., per lb., 30 cts.

Paper, Wrapping. Strong manila, per lb., 8 cts. Paper, Tarred. For use with tree ink, in rolls about 50 lbs.,

per lb., 4 cts.

Pencils. Wolff's Indelible Garden. For writing on wood labels, with point protector, each 20 cts.; doz., \$2.00. Protectors, Arlington Plant. Protects from bugs, borers and fowls, also subdues wind, rain and cold, 15 cts. each; dozen, \$1.50

The Ross Patent. This protector consists of a heavy water-proofed hood, a U-shaped coppered wire anchor so attached to the hood as to secure it in position over the plant, and at the same time allow of its being raised and tilted to protect from the wind or admit sunshine. Occupy but small space and nest for storing. 5 in. high. Price, doz., 25 cts.; 100, \$1.60; 1000, \$15.00.

MISCELLANEOUS REQUISITES.—Continued.

Special Offer No. 3 only applies to articles on this page.

Protecting Cloth for Hot Beds. Used as a substitute for glass for protecting plants in early spring, in pieces of 40 yards, 10 cts. per yard.

Putty Bulbs. A simple and useful device for applying putty to sashes, \$1.00 each.

Roffea.

This grass, long used by gardeners for tying plants and bunching vegetables, has been adapted to new uses. While it is likely to hold its place as the best tying material yet produced, there will be a great demand for it for a few years for making baskets, mats, etc. In order to meet this demand we have made arrangements to supply a selected quality of the natural colored grass, also dyed in shades of green, blue, black, pink, yellow, red, and other favorites.

Price, Natural, 25 cts. per lb. Any of the above colors 50 cts. per lb. Not less than 1/4 lb. colored Roffea sold at

pound price.

Reeds, Round and Split, Nos. 2, 3, 4, 5, used with the Roffea in basket making. Nos. 2, 3 and 4, lb. 75 cts. No. 5, lb. 60 cts.

"Basket Making." The first book of the "How to Do It Series." Tells all about basket making. It contains over one hundred illustrations of working designs with full particulars of methods. By mail, 25 cents.

Silkaline. Used for growing smilax and asparagus on, also for tying in bouquet work, per reel 25 cts.; per lb. \$1.25.

Sprinkler, "Ladies' Favorite." This is the most practical sprinkler yet offered to use

on house plants, cut flowers or for the laundry. Each, \$1.00. Sprinklers, Scollay's Rubber. An indispensable article for showering plants, sprinkling bouquets, dampening clothes, etc.; three sizes, 50 cts., 75 cts. and \$1.00 each.

Sashes for Hot-Beds. Extra well made from thoroughly seasoned lumber, frame 1½ in., 3x6 ft., \$3.00; 1¾ in., Unpainted and unglazed sashes, from \$1.75 to \$2.00.

3x6 ft., \$3.25 each.

Hot-Bed, Sash and Frame, Complete. For Violets, Flower Seeds and Early Vegetables.

Having received numerous inquiries for a Hot-Bed Sash that was light, and easy to handle, we decided that it would be a good idea to construct a Sash and Frame Complete that would meet the requirements. After carefully studying several designs we adopted the one shown in cut,

as most desirable in all particulars.

The outside dimensions of Frame are three feet one inch long, and four feet eight inches wide, made of one inch Cypress; the back piece is nine inches wide and the front piece is six inches wide, grooved together, and held in place by eight strong hooks.

Being fastened together by the hooks enables one to take it apart at the end of the season and store away in a very compact form, which we consider an essential feature, as by so doing the frame may be made to last for years.

The Sash is also made of Cypress of one and one-half inch stock, put together and glazed in the very best man-On the under side of **Sash** is fastened a cleat, one inch from the outer edge, all around, thus forming a rabbet which makes the frame very tight, preventing the cold air from entering or the heat escaping.

The construction of the frame is so simple that any one with a hammer and screwdriver can put it together in a few minutes. We furnish hinges and screws for attaching the sash to back of frame; also the hook and eyes for

In offering this Special Hot-Bed to our customers we feel that we have something that will give entire satisfaction and will supply a long felt want.

Our price for Frame and Sash complete is only \$6.00 delivered at the railroad in Boston.

Sieves, Wire. For preparing potting soil, sifting loam, gravel, etc.; 16, 18, 20, 24 inches diameter; 75 cts., 90 cts., \$1.15, \$1.50 each, respectively.

Soil, Peat, Leaf Mould, Etc.

Prepared Potting Soil. Specially prepared with peat, leaf mould, loam, sand and fertilizer. Pk., \$0.30; bush., \$1.00; bbl., \$2.00, net.

Peat, Rotted Fibrous. Fine, light and sweet. For some varieties of plants this is invaluable. Pk., \$0.30; bush., \$1.00; bbl., \$2.00, net.

Leaf Mould. Vegetable humus, a desirable addition to all soil used for potting. Pk., \$0.30; bush., \$1.00; bbl. \$2.00, net.

Silver Sand. For rooting cuttings and mixing with potting soil. Pk., \$0.50; bush., \$1.50, net.

Fern Root or Orchid Peat. Bush., \$1.50; bbl., \$3.00, net.

Sphagnum Moss. Per bag of 2 bush., \$1.00.

Tape, Electric. Exceedingly useful for mending rubber hose. It is a strong, adhesive ribbon, three-quarters of a inch wide, can be wound tightly around a leaking part and thus stop it. Per coil, 25 and 50 cts.

Tinfoil. For bouquets. Per lb., 15 cts.

Twine. Soft, for tying cut flowers, vines, etc. Per ball, 25 cts.

Twine, Parcelling. All sizes. Per ball, 10 to 25 cts.

Wax Grafting. (Trowbridge's.) The best in the market. This brand should not be confounded with the many cheap makes now offered, that are not possessed of an even consistency, and give unsatisfactory results. Put up in 1 lb., ½ lb., and ¼ lb. packages, price 40 cts., 25 cts., and 15 cts., respectively.

Wire, Bouquet. Bright, cut in lengths of nine and 12 inches, in boxes of 12 lbs. (one stone) each.

Per box, either length, Nos. 20, 21 and 22 \$1.75 \$1.25 Per box, either length, No. 26 " 23 and 24 1.25 1.50

SPRAYING CALENDAR.

This calendar, in a concise way, gives our friends the benefit of the many experiments made by the Agricultural Colleges of the country for a number of years. It is believed they can be followed without danger to the crops and much profit to the grower.

The number of applications given in each case has particular reference to localities in which fungous and insect enemies are most abundant. If the crops are not affected at the time advised, the spraying is unnecessary. Know the enemy and the remedy, and apply them at the proper season, keeping in mind the fact that good judgment and prompt and persistent action is more necessary to success than any definite rules.

The applications to which an asterisk * is prefixed are of most importance.

| PLANT. | First Application. | Second Application. | Third Application. | Fourth Application. |
|---------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------|

For Aphides or Plant Lice use Kerosene Emulsion on all Plants.

See Special Offers on third page of cover.

About Insects.

Since *The Experiment Stations* throughout the country have given attention to *Fungi Diseases* and devised remedies for these and also for the destruction of *Insect Pests*, both those that eat up the foliage and those that simply suck the life blood of the plant, there have been a great many *preparations under fancy and mysterious names* put on the market. It is safe to say that many of these, while high in price, produce only inferior results. Therefore we wish to remind our friends that it is usually safest when having to deal with insect pest and fungus to use only tried and reliable *Insecticides and Fungicides*.

In general terms: ARSENATE OF LEAD and PARIS GREEN are specifics for leaf eating insects.

KEROSENE EMULSION, TOBACCO, WHALE OIL SOAP for sucking insects.

BORDEAUX MIXTURE and AMMONIACAL COPPER (Copperdine) for fungus.

Within a few years Massachusetts orchards and gardens have been badly affected by the **San Jose Scale**. When the trees are much affected it is usually best to cut down and burn them. In the early attack apply Whale Oil Soap, two pounds to a gallon of water, when trees are dormant, or Kerosene and water in the proportion of one to five. Both of these preparations should be applied before the buds start. During growth the best remedy is Kerosene Emulsion.

Insecticides and Fungicides.

Special Offer No. 3 only applies to articles under this heading.

Arsenate of Lead. The safest and best insecticide known for leaf eating insects. If applied according to directions it will not injure the foliage; one pound to 10 gallons of water has been used on young, tender leaves without scorching or burning them. It adheres to the foliage for weeks. It is white in color; sprayed foliage may thus be distinguished from unsprayed at a glance. It can be used with Bordeaux Mixture. See directions on each package.

I-lb. Tins, per lb. 20 cts.; 5-lb. Pails, per lb. 18 cts.; 10-lb. Pails, per lb.

17 cts.; 20-lb. Pails, per lb. 17 cts.; 50-lb. Kegs, per lb. 16 cts; 100-lb. Kegs, per lb. 15 cts.

Aphis Punk, Nikoteen. A special preparation of nicotine for the extermination of green and black fly, thrip, etc., contains no ammonia and does not injure delicate plants. Per box of one dozen rolls (720 grains nicotine) 60 cts. Breck's Liquid Anti-Ants. A preparation that destroys or drives away ants from lawns, trees, etc. ½ pt. 30 cts.; pt. 50 cts.

Breck's Dalmation Insect Powder. ("Bubach.") Manufactured especially for us from clean, dried flowers. It is put up in air-tight packages and keeps its strength indefinitely. It is invaluable to the housekeeper for the destruction of flies, fleas, roaches, and other noxious insects. Four sizes, 10, 15, 25, and 40 cts. In bulk, lb. 3c cts.

Bordeaux Mixture. Powell's. Ready for use by simply adding water. Bordeaux Mixture is, we believe, the best fungicide known, and is really a specific for the blight and other diseases attacking potatoes, tomatoes, grapes, apples, pears, etc. 1-lb. box, makes 5 gallons spray, 20 cts.; 5-lb box, makes 25 gallons spray, 75 cts.; 10-lb. box, makes 50 gallons spray, \$1.25; 25-lb. box, makes 125 gallons spray, \$3.00.

Bordeaux Mixture. French. In pulp form. One gallon makes 50 gallons spray, per gal. \$1.00; per 5 gals. \$4.50; per 10 gals. \$8.00.

Bordeaux Mixture. Lenox Brand. This preparation we consider the best of all the ready-made Bordeaux Mixtures on the market. It is chemically pure. It does not clog the nozzle. It adheres to the leaves and is not easily washed off. One gallon makes 50 gallons solution. Per qt. 35 cts.; 1 gal. \$1.00; 12 gals. \$10.00 net.

Boxal Paste. A combined insecticide and fungicide for use on potatoes. Kills slugs and beetles, and prevents blight and rot. Takes the place of Paris Green and Bordeaux Mixture. Sticks on the vines a very long time. 5 lbs. 50 cts.; 10 lbs. \$1.00; 25 lbs. \$2.25; 50 lbs. \$4.25.

Boxal Powder. A combined dust insecticide and fungicide for use on potatoes. Kills slugs and beetles, and prevents blight and rot. Takes the place of Paris Green and Bordeaux Mixture, and is superior to both. Sticks to the

vines throughout the season. Applied dry or as a spray; 1-lb. pkg. 25 cts.; 5-lb. pkg. \$1.00.

Bug Death. (The prices quoted on this article are net, and not subject to either of our special offers.) A patented, non-poisonous powder, entirely different from anything yet offered for the purpose, and as effectual as Paris Green. It is sure death to the potato, squash and cucumber bugs, currant and tomato worms, also other plant and vine-eating pests. If used according to directions injury cannot result to the most tender plants, and it has a tendency to assist growth. For potatoes a 12½-lb. package is sufficient for an acre. Bug Death may be applied with a shaker or mixed with water and sprayed. 1-lb. box, 15 cts.; 3-lb. box, 35 cts.; 5-lb. box, 50 cts.; 12½-lb. box, \$1.00; 100-lb. keg, \$7.00.

Canker Worm Exterminator. (Morrill's Tree Ink.) A sure protection to trees from the ravages of grub and canker worms. Directions with each can.

Caterpillar Lime. (Ermisch's Raupenleim.) This is a German preparation. Recommended by the Royal Ministry of Agriculture, and also by several U. S. Agricultural Experiment Stations, as being superior to any yet offered to prevent the ravages of grubs, canker worms, etc. It is applied in the same way as Tree Ink, and is more lasting and effective. 5-lb. cans, \$1.00; 10-lb. cans, \$1.75; 25-lb. cans. \$4.00; 50-lb. keg, \$6.75; 100-lb. keg, \$12.75; in barrels of about 250 lbs., per lb. 11 cts.

This article is higher in price than other preparations for the purpose, but the long effectiveness of a single application compared with that of others makes it really the cheapest.

Carbolic Purifying Powder. For removing unhealthy odors. Small pkg. 25 cts., 6-lb. pkg. \$1.00.

Carbolic Crystallized. Per lb. bottle 50 cts. Net.

Carbolic Solution. Per lb. bottle 40 cts. Net.

Copperdine, Powell's. (A Paste.) A combined fungicide and insecticide, used simply by adding water in proportion of one pound of paste to 16 gallons of water. As a fungicide it prevents black rot. As an insecticide it kills coddling moths, curculio, pear insects, peach and apple borers, crown borers, leaf rollers. 1-lb. box makes 16 gallons spray, 25 cts.: 5-lb. box makes 80 gallons spray, \$1.00: 25-lb. box makes 400 gallons spray, \$4.50.

Creosote Mixture. This mixture is sure death to the eggs of the Gypsy moth, Tussock moth and similar insects. Made on the formula used for years, and recommended by the Massachusetts Gypsy Moth Committee. I qt.

50 cts.; 2 qts. 75 cts.; 1 gallon \$1.00.

Dip, McDougall's Sheep. An effective, non-poisonous preparation for killing vermin on sheep, cattle, and domestic Per lb. 50 cts.; qt. 75 cts.; 1/2 gal. \$1.50; 1 gal. \$2.50.

Dip, Cooper's Sheep. A world-famous preparation, in powder form. It is easily carried, quickly prepared and most effective. Large pkg., sufficient to make 100 gallons, \$2.00; small pkg., to make 25 gallons, 50 cts.

Disparene. A powerful remedy for all leaf-eating insects; will not injure foliage, and adheres a long time. 2 lbs. 50 cts.; 5 lbs. \$1.00; 10 lbs. \$1.80; 25 lbs. \$4.25; 50 lbs. \$8.00.

Disinfecting Powder. Searle's. A powerful deodorizer, in powder form. Per can, 25 cts.

For other Disinfectants, see Carbolic, Oil of Tar, Sulpho=Napthol, etc.

Eciffo. A sure cure and prevention of water bugs, cockroaches, etc. Per tin, 50 cts. Fir Tree Oil. Soluble. An invaluable preparation for destroying all insects and parasites that infest fruit trees. plants and animals, whether on the foliage or at the roots of the plants. Per gal., \$4.00; per qt. \$1.25; pt. 75 cts.. % pt. 50 cts.

Fostite. Destroys mildew, black rot and rust. A favorite with florists. It is a light powder that can be evenly

applied with a bellows. 2 lbs. 30 cts.; 5 lbs. 60 cts.; 25 lbs. \$2.50.

Fungiroid or Dry Bordeaux Mixture. In the form of a fine powder, applied with bellows or a shaker when the foliage is damp. Said to be as effective as the liquid preparation. 1 lb. 15 cts.; 5 lbs. 75 cts.

Fungiroid and Paris Green Compound. An insecticide and fungicide combined. Kills potato bugs and prevents

blight, easily applied and desirable for fruit trees, etc. 1-lb. box 20 cts.; 3-lb. box 60 cts.

Grape Dust. Destroys mildew on grape vines. Can also be used in the garden for mould, mildew, or rust mites.

5-lb. pkg. 35 cts. Hellebore. Breck's Pure Powdered. We furnish a guaranteed pure article, ground from fresh roots. It is easily applied either in liquid or powder form and destroys currant worms, rose slugs, etc. Each package has special

directions for its effective use. Packed in 3 sizes, air-tight packages, 10, 15 and 25 cts. each. In bulk, 20 cts. lb. **Kerosene Emulsion.** (A Paste.) Ready for use by simply adding water. This is strictly an insecticide for plant lice of all kinds, rose bugs, cabbage bugs, melon insects, fowl, human and animal lice, caterpillars, tobacco flies, peach lice, red spider, green fly and all sucking insects. I-lb. can makes 10 gallons spray, 15 cts.; 5-lb. can, makes 50 gallons spray, 60 cts.; 25-lb. can makes 250 gallons spray, \$2.50; 300-lb. bbl. makes 3,000 gallons spray, \$24.00

Kno-Worms, Breck's. A famous preparation that is much used on the lawns and the putting greens of Scotch golf courses. It not only destroys the worms, but prevents their increase and reappearance. It is a concentrated liquid, and is ready to apply when diluted with 100 parts of water. It is effective against cut worms in the garden and anthills on the lawn or elsewhere. I qt. makes 25 gallons solution, 50 cts.; 1/2 gal. makes 50 gallons solution, 85 cts.; 1 gal. makes 100 gallons solution, \$1.50; 5 gals. makes 500 gallons solution, \$6.50.

London Purple. For spraying fruit trees, potatoes, etc. 1 lb., 20 cts.

Lemon Oil. An oil that is readily soluble in water. It destroys insects and parasites of all kinds without injury to plants. Much used for palms and other ornamental foliage plants. Pt. 50 cts.; qt. 80 cts.; gal. \$2.25.

Nicoticide Fumigating Compound. This liquid preparation is used for destroying green and black fly, thrip mealy bug, red spider, etc. The vapor given off by the compound does not alter the natural color or scent of the flowers. I pt. for 32,000 cubic feet, \$2.50; 1/2 pt. for 16,000 cubic feet, \$1.25; 1/4 pt. for 8,000 cubic feet, 70 cts. How to Measure the House. - To ascertain how many cubic feet there are within any greenhouse, etc., mul-

tiply the length in feet by the breadth in feet, then by the average height; the result being the number of cubic feet. **Fumigators for Vaporizing "Nicoticide."** These consist of stand, pan and lamp. The set 50 cents. In a large house one fumigator should be used for every 5,000 cubic feet, distributing them evenly over the house and using

all simultaneously.

"Nico-Fume" is especially effective against Aphides ("Green Fly" and "Black Fly"), and against all insects affected by tobacco. "Nico-Fume" is packed in special friction-top tins and is sold as follows: 24 sheets, 75 cts.;

144 sheets, \$3.50; 288 sheets, \$6.50.

Nikoteen. Packed in pint bottles; each bottle contains all the nicotine obtained from 200 pounds of tobacco stems. A cheap, clean and safe insecticide. Can be applied by fumigation, or applied locally, diluted as a spray. Pt.

Oil of Tar. Prepared from coal tar, and retains the carbolic acid of the tar in a harmless form. It mixes with water in any proportion. It is a disinfectant, perfect in action, agreeable in odor, non-poisonous, cheap and unsurpassed for use in the home, the stable, kennel, or wherever a disinfectant is required. Circulars detailing its many uses mailed free upon application. Qt. 25 cts.; ½ gal. 50 cts.; gal. \$1.00.

Paris Green and Fungiroid. Per lb. 20 cts.; 3-lb box, 60 cts.

Paris Green, Breck's Guaranteed Pure. "Towne & Farrar Brand." This is the highest grade of Paris

green it is possible to make. It is manufactured from pure material and is always of uniform quality. Be careful of cheap greens and so called new methods. These products are liable to burn and scorch the leaves. 1/4 lb. 10 cts.; ½ lb. 15 cts.; 1 lb. 25 cts.; 2 lbs. 45 cts.; 5 lbs. \$1.00.

Pyrox. A combined insecticide and fungicide for use on fruit trees, shrubs and vines, kills leaf and fruit eating insects and prevents scab, rot, mildew, etc. "It sticks like paint." 5 lbs. 75 cts.; 10 lbs. \$1.25; 25 lbs. \$2.50; 50 lbs. \$4.75. Quassaine. (A Paste.) Ready for use by adding water. This article is a non-poisonous insecticide, a specific for San Jose scale, red spider, aphis, hop lice, borers and scale insects of all kinds. 1 lb. can, makes 25 gallons spray,

25 cts.; 5-lb. can, makes 125 gallons spray, \$1.25.

Slug Shot. Not only acts as an insect destroyer, but it will be found to be an excellent fertilizer. Price, 1-lb. boxes, 10 cts.; 5-lb. pkg. 30 cts.; 10-lb. pkg. 50 cts.; in barrels of about 225 lbs., per lb. 41/2 cts.

Soap, Pinner's Tobacco. Manufactured from the essential oil of tobacco, for the destruction of all insects, para-

sites and their eggs. Per lb. 50 cts.; 1/2 lb. 30 cts.

Soap, Whale Oil and Potash. Breck's Special. For the destruction of San Jose scale and all sucking insects. Lb. 15 cts.; $2\frac{1}{2}$ lbs. 35 cts.; 14-lb. bucket, \$1.50. Special prices on kegs and casks.

Soap, Sulpho-Tobacco. (Patented). A superior insecticide and fertilizer. Non-injurious to the tenderest growth. Kills all insect life in the window-garden. Unsurpassed for rose bushes. For domestic purposes, it is valuable as an exterminator of moths, cockroaches, carpet bugs, and is a superior wash for dogs and all animals. Every insect will succumb to this Insecticide. 3-oz. cake, 10 cts.; 8-oz. cake, 20 cts.; 10-lb. can, \$3.00.

Soap, Seal Oil. One of the best general insecticides for pot plants or greenhouse use. It is especially effective on green and black fly, red spider, scale, thrip and currant worms. Directions for use on each package. 1-lb. box,

25 cts.; 5-lb. box, \$1.00.

Spanish Pink. A safe and effective article for the destruction of cabbage and web-worms, caterpillars, and other chewing insects that affect cabbage, squash, cucumbers, melons, etc. Non-poisonous. 35c. per lb. Sulphate of Copper. (Blue Stone.) Per lb. 10 cts. Net. Sulphur, Flowers of. Used to prevent and cure mildew on plants. 8 cts. per lb.; \$6.00 per 100 lbs. Net.

Tobacco Extract. Rose Leaf Brand. A perfectly pure aqueous extract, highly concentrated and always uniform in strength of nicotine poison. Destroys green fly, mealy bug, red spider, and scale. Pt. 25 cts.; qt. 45 cts.; 1 gal. \$1.10; 5 gals. \$4.50

Tobacco and Sulphur Powder. Prevents and cures mildew. Kills green and black fly and other insects. 10 cts

per lb.; \$6.00 per 100 lbs.

Pacco Dust. This article varies as much in quality as do cigars. To produce effective results the right kind, and in suitable mechanical condition, must be used. We do not offer cigar factory sweepings, but an article especially ground and prepared for our trade from selected ribs and leaves. The two kinds here offered are for different Tobacco Dust. purposes and each does the work it is intended to accomplish perfectly. When using Tobacco Dust on plants and vines outdoors its effectiveness is much increased by sprinkling it with kerosene oil before using. Only a very little oil is necessary; too much will make it sticky and difficult to apply.

Fine Ground Black. For dusting on plants, animals, in poultry houses, etc. Per lb. 5c.; 100 lbs. \$3.00. Net. Fumigating Brand. (The kind that burns.) This is used by gardeners and florists and poultrymen for fumigating greenhouses, poultry-houses, etc. It can be readily lighted and consumes itself without making a flame, throwing off great quantities of smoke. Per lb. 5 cts.; per 100 lbs. \$3.50. When ordering please state kind wanted.

Tobacco Stems. For fumigating. If used as a mulch around sweet peas and other plants they prevent the destruc-

tive work of the wire and cut worms. \$1.00 per 40 lb. sack; \$2.50 per bale. \$25.00 per ton. Net.

XL-All Liquid Insecticide. For syringing, spraying, dipping or sponging. Destroys all insects, especially effect ive against mealy bug and red spider. Can be used without injury in graperies, even when the fruit is in an ad-

WOODASON'S

PAT.

WORLD'S FAIR HIGHEST AWARDS

vanced stage of growth. Pt. 65 cts.; qt. \$1.00.

All Vaporizing Compound. This is an English preparation, that at the first glance has a high-priced appearance of the compound. XL-All Vaporizing Compound. ance. The safety with which it can be used, its never-failing effectiveness and the ease with which it can be applied as an insecticide place it at the head of the first rank. It is cheaper, results considered, than any other vaporizing compound and there is no other like it. Its action is positive on Mealy Bug, Thrip, and all kinds of Aphis. Price per bottle No. 1, \$6.50; No. 2, \$3.25; No. 3, \$1.65; No. 4, 90 cts. The smallest bottle is sufficient

to fumigate 5,000 cubic feet. **migators.** With lamp for vaporizing: large, \$1.00; medium, 85 cts.

Tough on Flies. This is the original preparation for the purpose of preventing insects attacking horses, cattle and other domestic animals. We have sold it for ten years; each year with largely increased sales. We confidently recommend it, as experience has proven it to be as represented, in every particular. Recommended by thousands using it. One gallon lasts four head of horses or cattle an entire season. Price of "Tough on Flies": Qt. cans, 50 cts.; ½ gal. cans, \$1.00; 1 gal. cans, \$1.50, and five gal. cans, \$1.40 per gal.

Victor Fly Driver.

The Rural New-Yorker says: "Fly time is with us again, and no small expenditure will bring back so large a profit as a few dollars invested in some of the good fly preparations to make the cows comfortable and happy. The result will show in the milk pail." This of course applies directly to Victor Fly Driver.

Safe to use, thoroughly effective and cheaper than any other first class preparation for the purpose on the market. Put up in 1 gal. cans only. Price 75 cts.

Insecticide Distributors.

Dusters, Tin. These have finely perforated bottoms for applying Paris Green, Slug Shot, etc. 20 cts. each. Net.

Dickey's Bug Death Shaker. The best thing in the way yet offered. Every person who has a garden will want one. Price, 25 cts. Net.

Powder Puff, Scollay's Insect. This is a large, strong rubber bulb, with long metal neck and distributer set at an angle that enables the operator

to apply either powder or liquid over or under the leaves. \$1.00 each.

Special Offer No. 3 only applies on above goods.

FERTILIZERS.

BRECK'S LAWN AND GARDEN DRESSING.

The verdict of all who have used Breck's Lawn and Garden Dressing is that it is the most complete and satisfactory Lawn Dressing ever placed upon the market. It is manufactured expressly for us and we vouch for its containing all the constituents required to produce a luxuriant growth. We believe beyond a question that ours is the only absolutely odorless Lawn Dressing. It is also so clean that the most fastidious person can apply it without offending the organs of sight and smell. It being quick in action, the effect can be seen immediately after the first rain or the sprinkling of the hose, and going directly to the roots of the grass, stimulates them to greater activity, thereby thickening the sward and producing a finer growth, which remains rich, green and velvety throughout the season. Its superiority over stable manure can scarcely be estimated, as the latter, in addition to disfiguring the lawn by its unsightly appearance, also gives out an unpleasant odor, and always

contains weeds and other undesirable seeds. Great care should be taken to distribute the dressing evenly, and in no greater quantities than recommended on the tag which accompanies each bag, as a too liberal application will injure the sward. It can be applied at any time during the year, from April to November, as often as the grass seems to need nourishment. In making new lawns apply at the same time the seed is sown and rake in with the seed. Never apply the dressing while the grass is wet with dew or rain. Any time the grass is perfectly dry will answer, but the best time to apply it is just before a shower. It is equally as suitable for flower beds and all vegetable crops as for the lawn.

BRECK'S MARKET GARDEN MANURE.

Not subject to either of our special offers, but a discount of 5% may be deducted when cash accompanies order.

A high grade, properly balanced, chemical fertilizer that is especially recommended to market gardeners and farmers for potatoes and all vegetable crops. We sold large quantities of it last year, and already we have had many testimonials, also increased orders from those who had it for use this Spring. It is beyond a question the best value offered in Chemical Fertilizers. 50 lbs., \$1.00; 100 lbs., \$1.80; ton, \$34.00.

IOSEPH BRECK & SONS.

Gentlemen: I am very much pleased with your Breck's Market Garden Manure, and wish to say that in our trials of it with other phosphates it has given us by far the best satisfaction, and we feel satisfied that it is the cheapest way of fertilizing, where barn manures are as expensive or as hard to procure as they are in this locality. We have found your Fertilizer especially adapted to the growth of Cauliflower and Potatoes.

Scituate, Mass.

7. N. TURNER & SON.

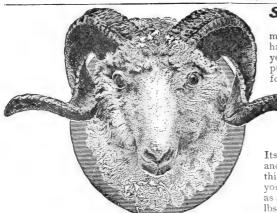

PERUVIAN GUANO.

For a number of years there has been some difficulty in obtaining a desirable grade of this article. When a good quality is to be had there is much satisfaction resulting from its use, especially on early vegetables and quick growing crops. We have made arrangements with the importer of the best brand that sells so freely in Britain and offer our patrons the genuine "Peruvian" in original bags.

Per ton, \$50.00; per 100 lbs., \$3.00 net.

UNLEACHED HARD WOOD ASHES.

Our trade in this valuable fertilizer has grown to such an extent that we have for a number of years had an experienced agent employed in Canada collecting the purest, driest and choicest grade of Hard Wood Ashes that is obtainable. We guarantee the percentage of potash and to insure against too much water we accept none that contain more than 12 per cent moisture. We quote special prices on car loads in bulk delivered anywhere. Price per ton, in sacks, f. o. b. Boston, \$16.00 net; per sack of 100 lbs., \$1.25.

Sheep Manure. — Ram's Head Brand.

Much of the *material* now offered as sheep manure is of no more value than good soil, the active and actual plant food having been leached through exposure to the atmosphere for years. The sheep manure we sell is a guaranteed fresh and pure manure, in good mechanical condition and nutritious food for plants. Its effect is immediate. It is the best of all manures

for mixing with the soil for greenhouse plants—one part manure and six parts soil. Price, in bags of 1co lbs. each, \$2.00; per ton, \$30.00. Sheep manure is net f. o. b. Boston.

Breck's Vegetable Fibre.

A chemically prepared vegetable fibre, rich in plant food. Its peculiar character especially adapts it to induce root growth and cause healthy, vigorous plants. For potting bulbs use one-third Breck's Fibre to two-thirds of the usual soil preparation and you will be surprised at the results. Breck's Fibre is unsurpassed as a medium in which to sprout seeds. Price, 5 lbs., 30 cts.; 15 lbs., 50 cts.; 25 lbs., 75 cts.; 50 lbs., \$1.00; 100 lbs., \$1.50, net.

Full directions, etc., with each package. These "Chemicals" are dry and powdered solids, dissolve easily in water and the solutions are made by the grower himself.

Scotch Soot.

This is much used by florists and gardeners, both as a fertilizer and fungicide. Mixed with Flowers of Sulphur (two thirds soot, one-third sulphur), there is nothing better to prevent and cure mildew. Used as a fertilizer, either in the dry state or in liquid, it quickly promotes growth. Per 100-lb. bag, \$2.50; 25-lb bag, \$1.00, net.

MAPES MANURES.

These Manures and Superphosphates are fine, dry, in superior mechanical condition for use in machine drills, or for application by hand. They are free from stickiness and dampness. Packed in bags weighing 100 lbs. each.

Each bag is plainly branded, besides having a tag attached, upon which is printed the Guaranteed Analysis and full directions for use.

The basis of the Mapes Manures is Bone; no Rock used.

We are the sole Boston agents, also for some other New England sections. Pamphlets giving full information in regard to the manures mailed free.

Our special offers do not apply to Mapes Manures, but we allow five per cent discount for cash payments F. O. B. Boston.

Potato Manure. Ammonia, 4.50 to 5 per cent; phosphoric acid, 8 to 10 per cent (soluble and available, 8 per cent); soluble potash, actual, 6 to 8 per cent, all as high grade sulphate and in forms free from muriates (or chlorides); magnesia, lime, etc., 77 to 81 per cent. For Irish and sweet potatoes, also for asparagus, early

vegetables, tomatoes, sugar beets, fruits, sorghum, sugar cane, sweet corn, etc. Per bag of 100 lbs., \$2.20; three bags and over, \$42.00 per ton.

Economical Potato Manure. Ammonia, 4 to 5 per cent; phosphoric acid, 6 to 8 per cent (soluble and available, 4 to 5 per cent); soluble potash, actual, 8 to 10 per cent, all as high grade sulphate and in forms free from muriates (or chlorides). Per bag of 100 lbs., \$2.00; three bags and over, \$38.00 per ton.

Fruit and Vine Manure. Ammonia, 2 to 3 per cent; phosphoric acid, 7 to 9 per cent (soluble and available, 5 to 7 per cent); soluble potash, actual, 10 to 12 per cent, all as high grade sulphate and in forms free from muriates (or chlorides). For insuring fruiting power, particularly in quality of fruit in vineyards (grapes), pears, apples, plums, strawberries, and all small fruits. Is slow in effects. Per bag of 100 lbs., \$2.20; three bags and over, \$42.00 per ton.

Vegetable Manure, or Complete Manure (for light soils). Ammonia, 6 to 8 per cent; phosphoric acid, 8 to 10 per cent (soluble and available, 6 to 8 per cent); soluble potash, actual, 6 to 8 per cent, all as high grade sulphate and in forms free from muriates (or chlorides). This is our special manure on all kinds of soils, for truck, early vegetables, onions, celery, tomatoes, also on light soils for oats, hops and barley. All vegetables require liberal supplies of soluble potash and in the proper form. Even with heavy or clay soils the natural supplies of potash are insufficient. Per bag of 100 lbs., \$2.30: three bags and over, \$44.00 per ton.

Complete Manure (for heavy soils). Ammonia, 6 to 7 per cent; phosphoric acid, 10 to 12 per cent); (soluble and available, 8 to 10 per cent); soluble potash, actual, 3 to 4 per cent, all as high grade sulphate and in forms free from muriates (or chlorides). For any soils where small quantity of potash but large quantities of ammonia and phosphoric acid are required. It is very safe for use around young plants, nursery stock, strawberry vines. It is very forcing. Special for early turnips. May be used for oats, hops, barley, also as a top dressing for grass, and as a forcing manure for all vegetables and fruits at all times. Per bag of 100 lbs., \$2.20; three bags and over, \$42.00 per ton.

Complete Manure (for general use). Ammonia, 4 to 5 per cent; phosphoric acid, 10 to 12 per cent (soluble and available, 8 to 10 per cent); soluble potash, actual, 4 to 5 per cent. A substitute for stable manure. For use on all crops and all soils with or without stable manure. Use broadcast; if any in hills, use sparingly. Special for oats, Hungarian grass, vegetables, melons, tomatoes, and seeding with or without grain. Per bag of 100 lbs., \$2.10; three bags and over, \$40.00 per ton.

Complete Manure ("A" Brand). Ammonia, 3 to 4 per cent; phosphoric acid, 12 to 16 per cent (soluble and available, to to 12 per cent); soluble potash, actual, 2.50 to 3.50 per cent. Specially adapted for use in hill or drill on all crops, particularly in connection with farm manures. Special for peas, beans, buckwheat and turnips. Per bag of 100 lbs., \$1.95; three bags and over, \$37.00 per ton.

Average Soil Complete Manure. Ammonia, 5 to 6 per cent; phosphoric acid (soluble and available), 7 to 8 per cent; soluble potash, actual, 5 to 6 per cent, all as high grade sulphate and in forms free from muriates (or chlorides). For onions, tomatoes, vegetables of all kinds, Irish and sweet potatoes, fruits and cranberries. A substitute for stable manure. Special for tobacco on heavier soils. Per bag of 100 lbs, \$2.00; three bags and over, \$38.00 per ton.

Corn Manure. Ammonia, 3 to 3.50 per cent; phosphoric acid, 10 to 12 per cent (soluble and available, 8 to 10 per cent); soluble potash, actual, 6 to 7 per cent. Also for sweet corn, fodder corn, Hungarian grass, millet, late turnips, late cabbage, and seeding to grass. Per bag of 100 lbs., \$1.95; three bags and over, \$37.00 per ton.

Cauliflower and Cabbage Manure. Ammonia, 5.50 to 6.50 per cent; phosphoric acid, 6 to 8 per cent; actual potash, 8 to 10 per cent. Per bag of 100 lbs., \$2.10; three bags and over, \$40.00 per ton.

Grass and Grain Spring Top Dressing. Ammonia, 5 to 6 per cent; phosphoric acid, 7 to 9 per cent; actual potash, 5 to 7 per cent. Per bag of 100 lbs., \$2.25; three bags and over, \$43.00 per ton.

Cereal Brand. Ammonia, 2 to 3 per cent; phosphoric acid. total, 8 to 10 per cent (soluble and available, 6 to 8 per cent); soluble potash, actual, 3 to 3.50 per cent. For wheat, rye, corn, oats, buckwheat, and all farm crops, particularly where farm manures are used. Specially adapted for use in hill or drill. Per bag of 100 lbs., \$1.75; three bags and over, \$33.00 per ton.

BRADLEY'S FERTILIZERS

Are guaranteed to contain more plant food in a better mechanical condition and of higher agricultural value than any other fertilizers in the world, and they are, therefore, as the New England Homestead affirms "the most economical to use."

Do not be misled into purchasing unknown fertilizers of uncertain value, but buy Bradley's Fertilizers which have grown large crops of superior grass, grain, and vegetables, on thousands of farms all over New England for more than thirty years.

Among their leading brands are:

BRADLEY'S SUPERPHOSPHATE

Bradley's Superphosphate, the pioneer of the fertilizer industry in the United States, has been more extensively used than any other brand of fertilizer in the world.

From its unvarying quality and uniform condition it has gained the name that more plainly bespeaks the estimate in which it is held among the farmers than volumes of praise,—"the Old Reliable."

BRADLEY'S POTATO MANURE

For Growing Smooth, Sound Potatoes of the Best Quality Without Barnyard Manure.

Bradley's Potato Manure is in no sense a theoretical or experimental mixture, but is prepared from formulas which repeated *field tests* have proven will produce the largest crops of smooth, sound potatoes.

The universal testimony of leading farmers is convincing that it gives the best of satisfaction, and at a considerable saving in cost over many of the high-priced special "potato manures" whose alleged scientific combination is their principle claim to the farmers' patronage.

BRADLEY'S COMPLETE MANURES

For Potatoes and Vegetables.—For Corn and Grain.—For Top-Dressing Grass and Grain, With 10 per cent. Potash.

These manures are the richest and most concentrated fertilizers sold, as has been abundantly proven by actual results in the field. They are manufactured from the very best plant-food materials obtainable, combined in such form and proportions as long practical experience has proven will yield the largest crops of the best quality.

Send to us for finely Illustrated pamphlets, describing all of their brands, and let us quote you prices on all of these unequalled fertilizers before purchasing elsewhere.

To Raise Healthy Chicks

Breck's Hygienic Brand Chick Food.

To Make Hens Lay
Use

Breck's Complete Poultry
Feed.

Breck's Hygienic Brand Chick Food.

A scientifically proportioned mixture which will meet every demand of the growing chick, and supply, without excess of fat, the food necessary to produce and sustain vigorous health. There is nothing in this preparation that is at all likely to induce indigestion or diarrhea, but on the contrary, it is so balanced in its constituents as to in a large measure make these troubles impossible where cleanliness and proper brooding conditions exist. It also contains the bone-forming properties that prevent leg weakness. It is high in protein, the flesh and muscle forming elements. There is sufficient mineral material to supply the needs of the bone structure of the rapidly growing chicks, while it is low in carbohydrate, the fat-forming element, which, where in excess, causes sickness and loss.

No other feed is necessary for the first eight or ten weeks. Feed dry. 50 lb. bags, \$1.35. 100 lb. bag, \$2.50.

Breck's Complete Poultry Feed.

. We have frequently been asked by many of our patrons to put up in a convenient form a complete Poultry Feed. In response to the above requests, after a great many experiments, we offer in **Breck's Complete Poultry Feed** what we believe is the best food for poultry that is on the market to-day.

Great care has been exercised in the selection and balancing of the materials of which it is composed. It is being used in large quantities by many of the most successful Poultry Raisers in New England, and is without doubt the best Food of the kind sold at the present time. **Feed dry.** 50 lb. bags, \$1.25. 100 lb. bags, \$2.25.

In placing on the market Breck's Hygienic Brand Chick Food you have filled a long felt want among chicken raisers. As the name indicates, my chickens were healthier after feeding from the Hygienic Brand than from any other kind ever used.

W. A. BLODGETT,

South Lincoln, Mass.

The "Breck's Complete Poultry Fred" which we have been buying of you, our customers tell us is producing fine results and our sales are increasing rapidly on it. We believe it to be one of the best all round Poultry Foods.

ALDERMAN & CARLISLE, North Adams, Mass.

Breck's Hub Poultry Fountain. This fountain is made of the best galvanized iron, is very strong, easily cleaned, quickly filed, and is equally serviceable for both chickens and adult fowls. (See cut.) ½ gal., 50 cents each; I gal., 75 cents each; 2 gals., \$1.25 each. Special prices per dozen or 100 upon application.

"E. H. M." Stone Fountains. Made of glazed stoneware, in two pieces; a

"E. H. M." Stone Fountains. Made of glazed stoneware, in two pieces; a saucer and an inverted cup, finished off on top to prevent roosting. Strong, cheap, easily cleaned and quickly filled. The best stoneware fountain yet offered. The one quart size is specially suitable for pigeons. I qt. 20 cts.; 2 qts. 25 cts.; I gal. 30 cts.; 2 gals. 45 cts. Net.

Stone Drinking Fountain. This fountain is of the best patent stoneware and is very desirable.

Poultry Supplies, except as marked Net, are subject to offer No. 1 in N. E. Outside of N. E. offer No. 3 only applies.

Breck's Poultry and Swine Meal. This is the original German "Thieren Mehl," or meal made from meat and animal matter. to the many imitations that have been put on the market since we introduced it, and is the most complete animal food for poultry obtainable. It is concentrated, pure, palatable, and produces satisfactory results when fed according to directions. We offered it first to the American public in 1892, but it has since that time, through merit, found its way into the yards of the most progressive poultrymen in the country. A reasonable trial will convince you that it is the best meat or animal matter meal on the market. Trial bag (a month's supply for thirty hens) \$1.00, 50 lb. bag \$1.35; 100 lbs. \$2.25 Breck's Alfalfa and White Cut Clover and Clover Meal. Eggs in

winter, when prices are high, is the aim of every poultry keeper. Failure to procure them is generally caused by lack of proper conditions in housing and a shortage of the materials from which the hens make eggs. Warm, clean houses, with good ventilation but no drafts, sufficient food which contains the ingredients of the egg and also furnishing heat and repairing daily tissue waste are required, but the food must be so balanced that there is no great excess of either heat or fat producing constituents, otherwise success will not be met with. Cut Clover or Clover Meal is an essential part of the ration because they act as a tonic and contain albuminoids, in an easily digested and assimilated form, for the production of the white and yolk as well as lime for the shell. The nitrogen, sulphur, phosphates, magnesia, soda, potash and carbon in clover, when the clover is of the best sorts, cut at the right time, cured and prepared in the correct way, give results in health and production that are unattainable when clover does not form a part of the ration. But aside from the fact of its value as a food we must bear in mind that there is as much difference in the quality of clovers as there is in wheat and corn. Recognizing the difficulty in obtaining a first-class article we were led to investigate the whole subject and as a result learned that a mixture of clovers gives better results than the Red Clover hitherto offered. Therefore, we have had grown, on suitable soil, especially for our own trade, a large acreage of Alfalfa, White and Red Clovers. The two sorts first named contain less water, less crude fibre and less fat than the red. They are higher in nitrogen and albuminoids besides being more easily digested. Combined in the proportion that a special experience of two years' feeding has shown to be best, we offer Breck's Alfalfa and White Clover preparations feeling assured that they are superior to any green feed on the market. We exercise care to have the several crops cut at the proper stage of growth and under rather than overcured. We feel sure our many poultrykeeper friends will appreciate the excellence of these clover mixtures and see when buying that spurious brands or inferior grades are not substituted. A reasonable trial only is necessary to demonstrate their superiority. When buying be sure to ask for and get only Breck's Alfalfa and White Cut Clover and Breck's Alfalfa and White Clover Meal. Every bag is branded.

Directions for feeding: - Pour on boiling hot water, cover, let steam an hour, then mix with usual morning mash at the rate of one-third clover to two-thirds the regular ground grains. Per 50 lb. bag, \$1.00; 100 lb. bag, \$1.80; 500

lbs., \$8.00. Net. Special price on larger quantities quoted upon application.

Breck's Eureka Egg Food. This preparation stands without a rival, as hundreds of those who have used it testify. It aids digestion, prevents and cures many diseases common to fowls, and although the best food known to produce eggs, it does not destroy the fertility of the egg. Sample box by mail on receipt of 25 cts. I lb. box, 25 cents each; if by mail, 40 cents each; 2½ lb. box, 50 cents each; by mail, \$1.00 each; 6 lb. box, \$1.00 each; 10 lb. box, \$1.50 each; 25 lb. kegs, \$3.50 each.

Midland Poultry Food.

These preparations are now used by practical poultry keepers, who are in the business for money, from Maine to California. THEY HAVE NO COMPETITION BECAUSE THERE IS NOTHING LIKE THEM OFFERED.

We are the Manufacturers' New England Agents. When these foods were first offered us we were somewhat sceptical regarding their value because of the many new and unusual claims made for them. We told the manufacturers to prove their claims by making us a shipment for test. This they gladly did and we sent out fifty bags to as many poultry keepers, with the result that we were soon in receipt of orders from all of them for more Midland Poultry Food. Thus assured of the merit of the goods we felt encouraged to buy in carloads and we are glad to state that we find an ever-increasing sale. Almost without exception a trial of the food has resulted in continued and larger

orders. These preparations are different from anything hitherto offered. Ten years ago Dr. Petros F. Nishkian, one of the best organic chemists in this country, who for thirteen years filled the position of analytical and organic chemist to the Armour Packing Co., began the study of this question with a determination to solve it. His duties were largely in the analysis of animal products and vegetable and grain foods and their

economic adaptation to specific uses.

After an exhaustive study and analysis of all the sources of supply and a physiological study of the fowl, accompanied with a practical application of various combinations of the different food constituents, he finally arrived at what has proved itself to be a *perfectly balanced ration*—a correct working basis—an absolute nutritive ratio for each specific purpose.

Practical poultry men were called in to assist in carrying out the work, and theory and practice made to conform.

The results of this labor are now before you in the specific foods we offer.

Our aim has been to ascertain the exact proportions of proteids, carbo-hydrates and fats absolutely necessary over and above the normal requirements in order to obtain specific results. The ratio so determined is called a balanced ration. Eleven Formulas—Each Brand a Perfect Food for a Specific Purpose.

Eclipse Leg Bands. (Made of Aluminum.) No. 1 for Bantams, No. 2 for Mediterraneans, No. 3 for American females, No. 4 for American males, Asiatic females, small turkeys, No. 5 for Asiatic males and turkeys. We number them to order. Per doz., 25 cts.; 50, 75 cts.; 100, \$1.50.

Climax Leg Bands. A thick brass wire goes around the leg which is locked securely by the attaching of the tag bearing number. All sizes. Doz., 25 cts.; 50, 75 cts.; 100, \$1.25.

Nests, Wire. Strong and clean. Each, 50 cts. Guns, Insect Powder. 2 oz. size, 15 cts. each.

Pumps, Breck's Hand Force is a double-acting portable force pump. It is made of brass, and therefore impervious to the action of acids and liquids, and will not rust or corrode. Pump is placed directly in water or other liquid, ensuring a perfect suction. It is furnished complete with malleable foot-rest and suitable nozzles for a solid stream and large spray. Pump may be used for washing windows, wagons,

Acme Sprayer. Invaluable for spraying all kinds of insecticides in a liquid or dry I home design of the powder form, iiii i aaaaaa le and for spray-

They are especially adapted to the use of poultrymen and florists, and can be used by all to advantage around

the house and place. The brass sprayer is not affected by acids, and is practically indestructible.

All Brass sprayers Our net price, each, \$1.00 " Tin

Sanitary Fountain. Square in form, made of galvanized iron, in two pieces, easily cleaned and filled. I gal., 60 cts.; 2 gals. \$1.00.

Punch, Breck's Improved Spring Lever. Works on the principle of a conductor's punch, and does perfect work. Its use enables poultrymen to identify their own

birds or any particular hatching of them. By mail 50

Lehman's Heaters. Put one of these heaters in each poultry house on cold nights and there will be no frozen combs. The use of Lehman's Heaters and Coal is no longer an experiment. Their practicability and usefulness have long since been demonstrated. The fact that 125,000 Heaters are in actual use, with an average yearly sale of 10,000 Heaters and 1/2 million pieces of coal, speaks more for their merits than thousands of testimonials.

Lehman's Heater (except No. 10) is a metallic case 71/4 inches wide, 31/2 inches deep, and from 14 to 20 inches in length. The top is oval, giving the feet a comfortable resting place. These Heaters, which are furnished with carpet coverings, have a lining of abestos cloth between the carpet and the heater, making it perfectly safe from scorching. The No. 10 Heater is especially adapted to vans and large delivery wagons and Poultry Houses where an unusual amount of heat is required.

The No. 3 and No. 4 Heaters are our standard Heaters, which we specially recommend, as they are packed with a special composition which retains the heat and makes them more durable. Net Prices.

GENUINE PRAIRIE STATE INCUBATORS AND BROODERS.

The least that can be said of these famous incubators is "they are without equal." The U. S. government uses them exclusively at the Experiment Stations at Washington, D. C. The largest poultry breeders in the country also use them exclusively, and they are the standard from which all incubators are judged.

(Our net price list. Not included in our special offers.)

We would like every party who writes us for catalogue, who is interested in Incubators and Brooders, and contemplates purchasing the same, to send us an order for at least one machine and one Brooder, as we have placed the price at a very low figure and claim there is no machine in the world that sells for so little money that will give as good satisfaction.

PRICES OF EGGS AND POULTRY.

No claims allowed for breakage of eggs in transportation. All claims for infertility must be made within ten days from receipt of eggs. Our only guarantee in selling eggs is that they shall be from pure bred stock, and fifty per cent fertile on first test. This guarantee applies only between February 15 and June 1 of each year.

Prices Quoted are net and subject to change.

BRECK'S KINDERGARTEN COLLECTIONS

Our Hindergarten Collections were such a pronounced success last season that we have decided to renew the offer this year to superintendents, teachers and pupils of schools exclusively.

The varieties we have selected are easily grown, attractive and especially adapted to children's gardens, either in the school yard or at home. They consist of ten selected varieties of flower and vegetable seeds respectively.

We send with each collection ten wooden labels on which the names of the different kinds are plainly printed, so that the young gardener may have a permanent mark beside each sort during the season of growth. We also enclose plainly printed instructions as to the best time and way to sow the seeds and care for the crops.

We call attention to the fact that the seeds here offered are all of the best quality, and that the price we name for them scarcely covers the cost; consequently this offer applies only to the collections unbroken.

FLOWER SEED COLLECTION.

PANSY, Choice Mixed German.
CALENDULA, or Pot Marigold.
CANDYTUFT, mixed colors.
CENTAUREA CYANUS, or Bachelor's
Button, mixed colors.
CHINESE PINK, single and double mixed.
COREOPSIS, mixed colors.
NASTURTIUM, tall, mixed colors.
POPPY, single and double mixed.
MORNING GLORY, Convolvulus
Major, mixed.
SWEET PEAS, choice mixture.

VEGETABLE SEEDS COLLECTION.

SQUASH, Summer Crookneck.
CORN, Early Cory.
BEANS, Dwarf Mohawk.
CARROT, Early Dutch Horn.
BEETS, Breck's Beats All.
TURNIP, Green Top Stone.
RADISH, White Tipped Scarlet Turnip.
LETTUCE, Black-Seeded Tennisball.
PEAS, Tom Thumb.
MUSKMELON, Golden Netted Gem.

Price of Each Collection, 10 cents.

If by Mail. 2 cents extra.

We append below testimonials from teachers who tried these collections last year: —

Your kindergarten collections have given excellent satisfaction, and it seems to me that you have made a very good selection of species for school gardening purposes. We hope to use more of them next year.

C. H. MORSE, Superintendent of Schools,
Medford, Mass.

The seeds purchased of you have given great satisfaction to every one, and you will find that you will get many new customers from this town.

J. W. BREHAUT, Dept Public Schools, North Attleborough, Mass.

I found your seeds very satisfactory. With the poor care that the little five-year-old children gave them, they flourished beautifully. I have a large assortment of flowers daily from those gardens, ranging from Nasturtiums, China Asters, Petunias, Pansies to Marigolds. The children are very much interested in their gardens, and have had very good success.

ELIZABETH O. HAYNES, Sleeper School, Cambridge, Mass.

I found that for the most part the distributing of the flower seeds in my room awakened new ideas in the children's minds concerning agriculture in general and a love for nature, and I heartily approve of your work.

ETHEL MARY NEWHALL, Shepard School, Lynn, Mass.

We hope that through our present effort in this matter, a lively interest will be created which later will be of material advantage to ourselves and other growers and dealers in seeds and plants, and also to the communities in which the schools are situated, but especially to the children, who are the future greatness and strength of our homes and country.

Department of Landscape Gardening and Estate Development.

We have, in connection with our comprehensive business, a Department of Landscape Gardening

under the charge of a competent party.

We undertake to advise as to the laying out of gardens, the general improvement of landed property, and the development of building estates; to provide plans and estimates, and, for a fixed sum, to carry out all the work incidental to the making of a small suburban garden, as well as to the designing and executing of the most extended estate improvement. We make no charge for plans, but they remain our property unless the work is carried out by us.

LADIES AND GENTLEMEN who intend to lay out new places, or rearrange old ones, will find

it to their advantage to consult us on the subject.

We will also be glad to advise as to selection of Trees, Shrubs, Herbaceous Plants, etc., for special purpose.

Novelties and Selected Strains

IN FLOWER SEEDS

ASTER, the Concord. These magnificent Asters are large, double and very showy, the petals over apping clear to the centre. The plants are of luxuriant growth, 18 in. high, and bear from 25 to 40 flowers on a plant. The flowers measure 4 to 5 in. across and are

of every possible color, ranging from delicate tints to the most gorgeous shades. **Concord Asters, mixed colors.** Pkt., 10 cts.

Breck's Concord Aster.

"Chide me not, laborious band,
For the idle flowers I brought;
Every aster in my hand
Goes home laden with a thought."

-Ralph Waldo Emerson.

ASTER, General Jacqueminot. An unsurpassed form of incurved aster. The plants grow to a height of 2 ft., are branching in habit and produce an immense number of globular shaped flowers, about 4 in. in diameter and of a lovely glowing scarlet crimson color. We especially recommend this as one of the very best. Pkt., 10 cts.; ¼ oz., 75 cts.; oz., \$2.00.

ASTER, Lady Washington. This is a superb class, in the way of the famous Victoria. The plants grow nearly 3 ft. high and produce from 18 to 24 large flowers. It is very attractive in the garden, suitable for cutting, and unequalled for exhibition. We offer it in 5 lovely colors and trust all those who grow asters will give it a trial this year. It will please. Pure White, Silver Gray, Rose, Scarlet, Pale Blue, or mixed. Pkt., 10 cts.; ¼oz., \$1.00; oz., \$3.00.

ASTER, Breck's Giant Japanese. The public have asked for a perfect type of Chrysanthemum flowered Aster, with long, wavy, twisted petals, and the flowers well built up in the centre, but generally the ideal form has not been received. At our suggestion a leading German grower has labored for some years to attain the desired qualities, and we are glad to now offer the result of his efforts under the name of Breck's Giant Japanese. The flowers are larger and more perfectly formed than any hitherto offered of this class. Four colors: Pure White, Peach Blossom, Scarlet, Dark Blue, also Mixed. Pkt., 10 cts.; ¼ oz., 75 cts.; oz., \$2.50.

ASTERS. We offer as acquisitions, new colors in the sorts named, as follows:—

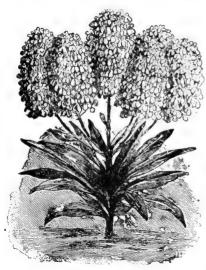

Ostrich Feather. Brilliant carmine. Terra-cotta. White, carmine-tipped. White, violet-tipped. Each color, pkt., 10 cts.; ¼ oz., \$1.00.

Christmas Tree. Dark scarlet. Dark blood-red. Each color, pkt., 10 cts. Queen of the Earlies. Dark blue. Pkt., 10 cts.; ¼ oz., \$1.00.

Lady. Pure white. Light blue. Each color, pkt., 10 cts.; ¼ oz., \$1.00.

Jewel, Sunlight. True sulphur yellow. Pkt., 10 cts.; oz., \$2.00.

For complete list of Asters see pages 91-92-93.

Breck's White Giant Candytuft.

CANDYTUFT. Breck's White Giant. The finest large flowered white Candytuft yet produced. It is as suitable for forcing as for out-door culture. The spikes of bloom are pure white, broad and of immense size. Pkt., 5 cts.; oz. 50 cts.

CARNATIONS. Chabaud Perpetual Double. They are equal in size and beauty to those grown by the florists, and are recommended on this account as well as because they come into bloom within six months of the time of sowing the seed. For winter blooming they may be sown in April, grown to sturdy plants in the open air, potted in August for growing indoor during winter. Three colors — Marie Chabaud, pale yellow, Maria Immacula, pure white, McKinley, bright scarlet. Separate or mixed. Pkt., 20 cts.

COSMOS, BRECK'S EARLY FLOWERING. This new early-flowering strain begins to bloom scatteringly in June, the quantity increasing gradually until August, and from that time until frost the plants are a mass of flowers. The flowers are smaller and the plants are dwarfer than the late flowering Cosmos. They form compact bushes only 4 feet high. Mixed colors. Pkt., 10 cts.

Shasta Daisy.

CHRYSANTHE - MUM. Leucanthemum hybridum. The fact that this is one of Luther Burbank's productions is

a guarantee of its value. Shasta Daisies are a selection through a period of years of a cross between the common field Marguerite and some of the European large flowering species. The claims made finished acquisition are: Hardiness: they can be grown in any climate that will not kill an oak tree. Perennial: bloom throughout the season of growth, and year after year. Easy of propagation: multiplied by division of root. Flowers very large and beautiful, frequently 4 inches or more in diameter, with three or more rows of petals of the purest white, on single, strong stems, nearly 2 feet in length. Seed in sealed packages. Pkt., 15 cts.; 3 pkts., 40 cts.

CHRYSANTHEMUM SEGETUM—Evening Star. A charming, continuous, summer flowering chrysanthemum. The flowers measure from 3 to 4 inches across and are of a pure golden yellow color. It withstands rainy weather successfully and is splendid for cutting. As a pot plant both for florists and private growers it will prove popular. Pkt., 15 cts.

I am glad to say that the purchases made of you have given good satisfaction. I am only too glad to recommend your firm to anyone needing anything in the line of seeds and implements. Yours truly,

JOHN L. CHAPMAN, Gardener to Peter B. Bradley, Esq., Hingham, Mass.

Shasta Daisy.

Gyclamen Persicum Grandiflorum.

BRECK'S IMPERIAL SELECTION. Hitherto we have offered this unequalled strain in mixture only. The demand from many of our friends who have grown it for a number of years, for separate colors, has induced us to offer it in the three leading colors, WHITE, PINK, and ROSY PURPLE, as well as in the usual mixture of many shades. It is almost needless for us to say that this is undoubtedly the very finest type of Cyclamen on the market. The habit of the plant is perfect, the flowers are as large as the Giganteum type but produced in much greater abundance, are better shaped and sweetly fragrant. Plants as a whole are beautiful both in bloom and foliage. This particular strain has been awarded more first prizes both in the United States and England than all others combined. Per 1000 seeds, \$11.00; 100 seeds, \$1.25; pkt., 50 cts.

GYCLAMEN PERSICUM GRANDIFLORUM. Royal Violet. All the Cyclamen hitherto described as violet have really been reddish purple. We are happy to offer here a new one that is a true violet color. It will be warmly welcomed by all lovers of this favorite and prove a real acquisition. Pkt., 75 cts.

Breck's Imperial Selection Cyclamen.

"The Day of the Dahlia."

Cactus Dahlia Cactus Dahlias

CAPSTAN. Delicate brick red. Early. MARY SERVICE. Pretty mixture of yellow and salmon pink.

NIGHT. Deep chestnut red, shaded black.

QUEEN WILHELMINA. Rich deep chestnut. **PRIMROSE DAME.** Exquisite primrose-yellow. LAVERSTOCK BEAUTY. Delicate red; yellow at base of petals.

MRS. H. A. NEEDS. Rich crimson, suffused with purple.

STANDARD BEARER. Bright fiery scarlet.

MISS A. NIGHTINGALE. Large, deep yellow, heavily tipped with bright red. Semidouble.

PERLE DE LA TETE D'OR. Fine large white, fringed flower.

F. BARTELS. Scarlet, shaded with violet. COUNTESS OF LONSDALE. Blending of

salmon-pink and amber. Price, 15 cts. each; \$1.50 doz.

GLADIOLI. BŘECK'S SPEČIAL GROFF'S HYBRIDS. The size, form and variety of colors make Groff's Hybrid Gladioli exceedingly attractive and desirable, yet there is in these, as in most things, the "good" and the "best." Those we offer as Breck's Special are the best and embrace the newest forms and colors including the rare blue, lilac and heliotrope shades. The diversity of color and markings is so great in this wonderful selection that it is scarcely possible to get any two of them alike, and all of them are so beautiful and varied in their tints and combinations that it would be practically impossible to describe them. We recommend our customers to include some of these in their purchases. There is no chance of disappointment. Each 8 cts.; doz. 75 cts.; 100 \$5.00. For complete list of Gladioli see page 126.

For more than fifty years the Dahlia has been a general favorite. The florist's skill in improving and creating new types has resulted in an increased demand for

Decorative and Cactus Dahlias

We offer here one dozen each of what we consider the best of these two popular and beautiful sorts.

Decorative Dahlias

FRANK L. BASSETT. Bright royal purple, rather dwarf. BEAUTY OF BRENTWOOD. Beautiful rosy crimson, shaded carmine. Grand.

CLIFFORD W. BRUNTON. Clear canary yellow. Immense

EUREKA. Fine deep rose, with quilled petals. Perfect form. GRAND DUKE ALEXIS. Large and unique; the petals are rolled up so that the edges overlap each other. Pure white, tinged delicate pink.

PATRICK HENRY. Very large, pure white, borne on long

LYNDHURST. One of the very best bright scarlets, perfectly full centres.

MAID OF KENT. Cherry red, tipped white. Sometimes it comes a superb solid red.

MISS A. NEWHALL. Fine dark crimson, shaded maroon.

OBAN. Rosy lavender, overlaid with delicate, silvery fawn. An early and continuous bloomer.

AFRICA. Fine large crimson maroon. ZULU. "The Black Dahlia." Jet 1 Jet black, changing to blackmaroon as the flowers expand.

Breck's Special Groff's Hybrid Gladioli.

Breck's Superb Strain Gaillardia.

GAILLARDIA, BRECK'S SUPERB STRAIN. This beautiful annual is worthy of more general cultivation, being showy, free flowering and of brilliant coloring—suitable alike for bedding and bouquets. It thrives best in a good light soil and in an open sunny situation, and grows I to 2 feet high with large flowers 2 to 3 inches across. The seed we offer was grown for us by a European specialist and includes the newest and choicest shades. Mixed colors, pkt. 10 cts.

GODETIA. BRECK'S "SNOWFLAKE."

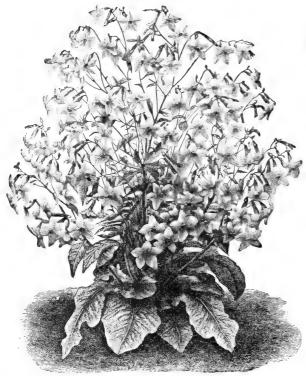

A magnificent variety of this most desirable annual. The plant is completely covered with widely opened flowers of glossy white. We strongly recommend this variety for beds and borders and for growth in shady places. Pkt. 10 cts.

LARKSPUR. New Dwarf Bee. This will be a favorite because of its dwarfer habit than the old popular tall growing sort. The flowers vary in all shades of color, from the lightest blue to the darkest indigo. The flower spikes do not usually exceed 2½ feet in height. Pkt. 10 cts.; 3 pkts., 25 cts.

MARIGOLD. Dwarf French Striped.
"Grandiflora." The flowers are as large as
the finest Scotch tall striped, but with the dwarf
habit of the dwarf French; one foot in height,
with beautifully striped flowers. Pkt. 10 cts.

Breck's Snowflake Godetia.

Nicotiana Sanderæ.

New Hardy Annual, Nicotiana Sanderæ Carmine Tuberose-flowered Nicotiana.

We consider this a valuable novelty. Among Nicotiana we know nothing approaching it in point of floriferousness, nor in its graceful and copiously branching habit. The whole plant is laden with flowers from base to summit - literally ablaze with most handsome carmine-red blossoms, thousands of which are

produced on a single plant.

Such an intensely glowing rosy-carmine color is unknown in any plant of similar character and either in flower beds, shrubbery borders, or in the wild garden - in fact, in any position among annuals of any color or kind of foliage, whether in the background or in the open, this incomparably beautiful plant is charming. Seed sown in January, pricked out in the ordinary way that hardy annuals are treated, transplanted in May in the position where it is intended to flower, is all that is There is no plant that is easier to grow. necessary. The care given to the most ordinary annual will suit this new Nicotiana admirably, and for a minimum of care a maximum wealth of its Calanthe-like blossoms can be had in the garden all the summer and autumn. Pkt., 25 cts.

PETUNIA. Howard's New Star. The ground color is a dark crimson maroon, with a rich velvety texture, justly pronounced equal to that of the pansy. Showing through the ground color are violet veinings. From the centre start the points of a five-rayed star, which broadens half-way up, narrowing to a point at the margin of the flower. Pkt., 15 cts.

PANSY. Madame Perret. This creation, because of its distinctness and rare beauty, will, when known, become a general favorite with all lovers of pansies. The flowers offer al possible lines of red, from the light pink, the lovely white-edged red, to the deep purple of splendid magnificence. The size of the flowers is extraordinary, being from 3 to 4 inches in diameter. The plants come into bloom earlier than other sorts, and continue through a long season.

PRIMULA OBCONICA GRANDIFLORA. This Primula is in many ways fully as desirable and attractive as the popular P. Chinensis. As a pot plant, it is as easily grown, and produces more bloom through a longer season, while for cutting it is simply splendid, and keeps a long time in water. We offer several new colors, not elsewhere obtainable, that secured the Royal Horticultural Society's Reward of Merit. Pink, dark red, purple, deep lilac; pkt., each color, 50 cts. Bright carmine,

Pkt., 30 cts.; ¼ oz., \$2.50.

SWEET PEA. Gladys Unwin. Gladys Unwin has a very large and bold flower; not hooded, but with a very striking upright crinkled or wavy standard and broad wings. Color, a pale rosy pink. A striking feature is that about 75 per cent. of the long flower stems are with four blooms, which is a most unusual thing in sweet peas. It was first raised four years ago, viz., in 1901, and has kept perfectly true and fixed in character each year since. Pkt., 25 cts.

SWEET PEAS. BRECK'S BOSTON MIXTURE. The very best mixture offered at any price. It includes in good proportions over sixty of the choicest kinds. Oz., 10 cts.; ¼-lb. 25 cts.; lb., 75 cts.

SALPIGLOSSIS. BRECK'S MULTI-COLORED. The Salpiglossis is a beautiful garden annual. The strain we offer under the name of Multi-Colored is a wonderful improvement over all other varieties of this very desirable plant. The magnificent flowers, large and funnel-shaped, present an extremely pleasing variety of colors in mottled, veined and self-colored forms. They require good, rich soil, and will amply repay in glorious effect good care and liberal treatment. We feel confident in saying to those of our patrons who try it that they will not be disappointed. Pkt. 10 cts.

Breck's Multi-colored Salpiglossis.

Breck's Giant Perfection Ten-Week Stock. Artemise, soft rose pink; fine.

Baron J. Rothschild, pink, semi-double, sweet.
Baron T. Rothschild, rose outside, centre salmon, sweet.
Duchess de Nemour's, rose pink, large, sweet.
Duchess d'Orleans, salmon pink.
J. Descaine, white, yellow centre.
Fulgida, dark crimson, showing golden anthers.
Prince de Talyndike, dark purple, good form; distinct and choice.
Delacheii. dark crimson, late.

Lamartine, bright crimson.

Humei, pink, one of the best late pinks.

Francis Ortegal, purplish crimson, fine.

The following 12 double sorts 75 ct

The following 12 double sorts, 75 cts. each; \$8.00 per doz.

Alba Sulphurea, creamy white, sulphur centre, sweet. Auguste Lemonier, deep purplish red.

Ceres, flesh, yellow centre.

Don Juan, deep purple.

Elegans Superbissima, outside petals dark pink, salmon centre, fine and sweet.

Henry Demay, brilliant crimson.

Jeanne d'Arc, rose pink, white centre, fine.

Magnifica, flesh white.

Madame Chaumy, bright pink, tinged flesh; large.

Nivea Plenissima, pure white.

Pearl, white, shaded flesh, fine flower.

Whitleyic Plena, light blush white with cream centre, fine.

Stokesia Cyanea

(Corn Flower Aster.)

A beautiful hardy perennial easily grown from seed. "The plant grows from 18 to 24 inches high and produces the Centaurea-like 4 to 5 inch in diameter lavender blue flowers from early in July until late in October, even after frost has destroyed nearly all other out-door flowers. It is of easiest culture, succeeding in any open, sunny position; not only is it desirable as a single plant in the mixed border, but it can also be used with good effect in large, solid masses, and at the same time is invaluable as one of the finest cut flowers. We have no hesitancy in saying that the Stokesia is the one most desirable hardy plant in our list." Pkt. 15 cts.

Stocks. Breck's Giant Perfection Ten-week. These are very early and produce unusually large spikes of double flowers. So far our grower has only secured three distinct colors in this giant class. We hope, however, in the near future to offer the improved type in all the colors and shades peculiar to this family. Meantime we recommend our friends to try and prove the superiority of Breck's Giant Perfection over the existing strains of Large Ten-Week Stock.

White, Dark Carmine, Canary Yellow, Pkt. 15 cts.; 1/4 oz., \$1.50.

Herbaceous Pæonies.

The most popular hardy plants of the day. We are only beginning to get acquainted with them and realize their possibilities. They surpass the rose in size, equal it in range of color and fragrance, are not troubled with insect pest, require no particular care to carry them through the winter and have beautiful and attractive foliage throughout the growing season. They do well in any good, rich, deep soil, and prefer a sunny situation, although they thrive almost equally well in a partially shaded location. A liberal supply of water should be given them during the growing season. They are perfectly hardy, requiring no protection whatever even in the most severe climate.

The following 25 fine double sorts 50 cts. each; \$5.00 per doz.

Amabalis Grandiflora, white, large fringed petals; fine, sweet.

Amabalis Speciosa, rose shading to pink; large, sweet.

Mme. Breon, dark, brilliant purple.
Mme. Lebon, deep cherry, flowers in clusters.
Officinalis Rubra.
Officinalis Rosea.
Pottsi, purple crimson, very showy.

Perfection, rose lilac, inside salmon, sweet. Jules Lebon, bright crimson.

Caroline Mather, dark crimson, rose scented. Centifolio Rosea, cherry rose.

Triumph du Nord, rose shaded crimson, large fine fower.

Rosea Magna, rose and white.

Stokesia Cyanca.

Hardy Perennial Phlox.

(PHLOX DECUSSATA).

Hardy Phlox.

The Phlox is an old-fashfoned favorite which is becoming more popular every year.

It is hardy, and does well in all situations. By a selection of varieties they can be had in bloom from July until the middle of September; or by "cutting back" the plants early in the season, they will bloom throughout September. They will grow on a gravel bank, but do best in a warm, mellow soil, made deep by cultivation. We have selected twelve kinds as the best for general cultivation in this country, feeling sure they will give good satisfaction. They are all clean, distinct flowers, healthy plants, and bright colors.

Amphitryon. Lilac, suffused with white, large flower.

Chas. Darwin. Bright salmon pink, crimson centre, very large pyramidal spike.

Coquelicot. Bright orange scarlet, dark crimson centre.

Le Mahdi. Very bright deep purple, velvety appearance, large spike.

Lumineux. Pure light red, shaded lighter toward centre, bright crimson eye. Very large flower.

Pink Beauty. Pale pink, enormous spike.

R. P. Struthers. Light crimson pink, slightly tinted orange, distinct dark centre, very fine.

Candeur. Pure white, very dwarf, good-sized flower and spike.

Esperance. Large flower, magenta lilac shaded to white centre, one of the best.

James Bennett. Light pink, tinted salmon, large crimson centre.

Le Feu Du Monde. Bright reddish pink, dark centre.

Saisons Lierval. Pure white, distinct crimson eye, very fine. 20 cts. each; \$2.00 per doz.

Rambler Roses.

THE NEW EVER-BLOOMING DWARF CRIMSON RAMBLER ROSE. Baby Rambler.—The best of all roses for pot culture and bedding. It is a true ever-bloomer, and identical with Crimson Rambler except in habit. It is of bushy, compact growth, forming plants about 18 inches high in a 6-inch pot. Plants from 2½-inch pots, 50 cts. each. Plants from 4-inch pots, 60 cts. each.

CRIMSON RAMBLER. Too well known to require comment.

DOROTHY PERKINS. Soft, light pink.

LEUCHTSTERN. Bright rose, with large white eye, large *single* flowers, produced very freely.

PURPLE EAST. Rosy, carmine-purple. Semi-double, medium-sized flowers, produced in clusters.

QUEEN ALEXANDRA. Rosy pink flowers, produced in large pyramidal clusters; similar to Crimson Rambler, except in color.

RUBIN. Deep crimson; flowers larger and fuller than Crimson Rambler.

THE LION. Rich crimson, single flowers.

THE WALLFLOWER. Rosy crimson flowers produced all along the shoots from base to tip.

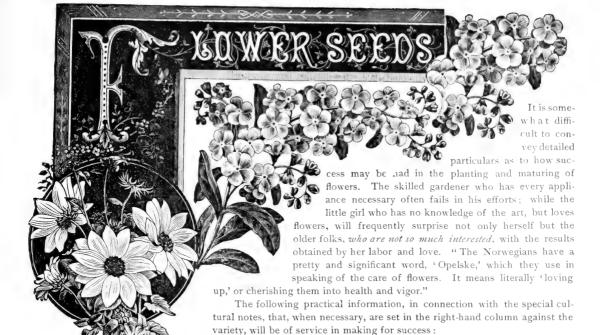

50 cts. each, \$4.00 per doz., except where noted.

Violets.

Hardy Annuals (hA.).—This class require no artificial aid, but grow and flower freely in the open air, mature their seeds and die in the same year Before sowing the seeds in the open border, the soil should be thoroughly enriched with fertilizer or stable manure, dug and raked until firm, level and smooth. If possible, the location should be free from shade, although some sorts do

well where they do not have the sun for more than half the day.

Seed should be sown in spring as soon as the ground is dry enough to work freely. After the seed is sown shake over it fine soil sufficient to cover, lighter or heavier, according to its size; a good rule is, say, to cover to twice the depth of the diameter of the seed. Very fine seed, such as *Portulacas*, requires no covering at all, but should be merely pressed into the soil with a piece of board or the palm of the hand. A second sowing ought always to be made in from two to four weeks after the first, in order to provide for a succession, as well as to insure against failure.

When it is desired to sow hardy Annuals and carry them along indoors until they can be planted out for early effect, there is nothing better than shallow boxes, two or three inches deep, filled with sandy loam. Take especial care until the plants are up and during their early stages of growth to give plenty of air and moisture, and yet not too much water, or they will "damp off." When they are well out of the seed leaf they should be planted in rows in other shallow boxes; or in two-inch pots, setting from three to six plants around the edges. If they begin to crowd one another before the weather is suitable for setting out, a second transplanting, more thinly or into larger pots, may be necessary. When first set out in the garden, or during very dry weather, until well established, they should be watered frequently. Keep down all weeds, and loosen the ground occasionally, so that the plants may receive the full benefit of rains and dews, which will not be the case if the ground is allowed to become hard or crusted.

Half-Hardy Annuals (hhA.).—These, in the latitude of Boston, should not be sown out-doors until about the middle of May. A good rule, followed by a successful gardener, is to sow these, and even some of the tender Annuals, at the same time he makes his sowings of cucumbers and melons. With half-hardy Annuals, however, it is generally best to sow them under the same conditions as advised for hardy Annuals in-doors.

Tender Annuals (tA.).—To get strong plants and an early bloom, sow the seed in shallow boxes or pots in March, and place them in a warm greenhouse, or plunge in a moderate hot-bed, shade from the strong sun and water only with a very fine rose. A very light, sandy soil and good drainage are essentials. Be particular that the finer seeds are not covered over deep, but have the soil pressed closely about them. Water frequently, especially if the greenhouse or hot-bed is very warm. When the plants are out of the seed leaf, transplant into shallow boxes or small pots. When sufficiently strong and the weather is suitable, set out in the flower beds, but not before the end of May.

Hardy Biennials (hB.) and Perennials (hP.).—These require the same conditions as hardy Annuals. Those marked with a dagger (†) if sown early, in boxes, as directed for hardy and half-hardy Annuals, will bloom the first year. All, however, may be sown in the open border in August or September; in which case it is a good plan at the commencement of frost to give them a light covering of straw, leaves or

(CORPORATION).

dry litter. When the frost is out of the ground in spring remove the covering, loosen the soil around the plants, and when large enough transplant them to where they are permanently to remain.

Half-Hardy Biennials (hhB.) and Half-Hardy Perennials (hhP.).—These may be sown in the open border as directed for hardy Annuals, but, when practical, it is generally better to start them in-doors, as recommended for half-hardy Annuals.

Tender Biennials (tB.) and Tender Perennials (tP.)-Accord these the same treatment as recommended for tender Annuals.

Those to whom a greenhouse or hot-bed is not available will meet with good success by placing the boxes or pots in the open sunlight in the windows of the dwelling house, and keep the temperature from 65 to 75 degrees during the day and 10 degrees less at night. If the soil was in proper condition at planting time, a slight sprinkling once a week will be sufficient until the plants begin to grow nicely.

Greenhouse Seeds .- Some of these may be sown at almost any season of the year. Leaf mould, or peat, with some fine sand added, is the most suitable soil, and the shallow pots or boxes before recommended can be used. The smaller seeds of greenhouse plants are somewhat difficult to germinate unless extra care be taken with them; they require to be slightly watered occasionally, and sheltered from the hot sun until large enough to transplant. Press the soil firmly down into the pot or box and make perfectly level, so that no unequal settlement takes place through water-The seeds should be sown thinly and covered very lightly with finely sifted spaghnum moss. A pane of glass placed over the pot or box until the little plants get well started is of decided benefit, but care should be taken to air occasionally, when excessive moisture is shown by water globules on the under side of the glass. When the young plants have two leaves they should be transplanted into a similar soil, in other pots or boxes. To do this do not pull them out one by one, but, if in a pot, remove the entire contents and break up gently; if in a box, loosen by running a trowel around the side and take out a mass at a time, thus preserving the little roots which are so essential to their future welfare. After transplanting, keep in a shady part of the greenhouse and water sparingly until established, when they may be removed to the light.

It is well to know that Poppies delight in a rich, sandy loam, that Eschscholtzias will do best in a poor soil; or of Pansies, give them abundance of old manure, the richest earth you can find, plenty of water and partial shade; that you need not be anxious if it is not convenient to carry water for Nasturtiums in a dry time, for their habitat is dry Chili, and they will thrive in a dryer soil and atmosphere than almost any other plant; or that Zinnias like a heavy, cool clay; Sweet Peas a deep, rich soil and plenty of water, while such gross feeders as Roses, Sunflowers, Hollyhocks, Dahlias and Asters cannot be planted in too rich a situation; yet,

"To raise your flowers, various arts combine, Study these well, and fancy's flight decline: If you would have a vivid, vigorous breed Of every kind, examine well the seed: Learn to what elements your plants belong; What is their constitution, weak or strong:

Be their physician, careful of their lives, And see that every species daily thrives; These love much air, these on much earth rely: These, without constant warmth, decay and die; Supply the wants of each, and they will pay For all your care through each succeeding day."

EXPLANATORY.

Our General List of Flower Seeds, it will be found, is divided into the following groups, viz.: Annuals, Perennials and Biennials; Climbers; Greenhouse Plants; Everlastings; Ornamental Grasses, etc. The botanical and common names are arranged in alphabetical order, and a very complete index will be found in front of book. The dash (___) designates the repetition of the name above it as applying to the variety to which the dash is prefixed; the first column, following the name, denotes hardiness and duration; the second column, height in feet; the third column, color or predominating colors; the fourth and fifth columns show the price per ounce and packet respectively; the sixth columns gives brief descriptions or special notes on culture. To this arrangement and the following abbreviations we have given the most careful attention, and we trust that their simplicity will not only find favor with our customers, but prove valuable to them as a handy reference.

KEY TO ABBREVIATIONS.

hA designates Hardy Annuals—Lasting but one year.
hhA "Half Hardy Annuals—Lasting but one year.
tA "Tender Annuals—Lasting but one year.
hB "Hardy Biennials—Lasting two years.

The abbreviations of colors are-

blk.-black. br.—breva. tri.—tricolor. car.-carmine. crim.—crimson. cul.—sulphur. lav.—lavender. pur.-purple.

var.—variegated. scar.—scarlet. strip.-striped. ver.-vermilion.

In some instances when the flower is of two colors, these are indicated by the initial letters only,—for example, b&w—blue and white; &&y—scarlet and yellow; w&p—white and pink.

LIST OF FLOWER SEEDS

of the rising plantlets will break the crust on hard soils; and in the thinning which follows, only strong and promising plants are allowed to remain. Better effects are also often secured when the flowers are in masses, especially if the flowers are thrown into the bays of heavy shrub borders.

"Plants continue to bloom for a longer period if they are not allowed to produce seed. The flowers should be picked, if possible, as soon as they begin to fade."

Ageratums.

In many respects this is one of the most desirable summer flowering plants we have. It may be used alone for beds and borders, or planted in connection with geraniums, coleus, cannas, etc. The colors include many

shades of blue as well as white, rose and a pale yellow. The plants grow well almost anywhere, but flower most generously in a deep, rich soil. If the seed is started in a box in the house, or in a hot-bed, in the beginning of April

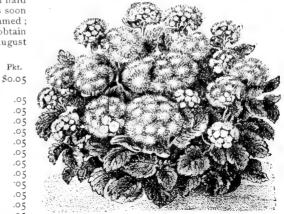

Pkt.

.05 .05

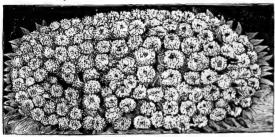

ΙO

and transplanted to where they are intended to bloom about the end of May, an abundance of flowers will be produced until hard frost. Seed of all, however, can also be sown outdoors as soon as the ground warms up, excepting the four sorts first named; these are tender perennials and should be sown early to obtain successful flowering the first summer. Seed sown in August will produce plants for winter flowering.

Ageratum.

Sweet Alyssum.

The Sweet Alyssum is so well-known and such a general favorite that it is scarcely necessary to call special attention to it here. It is of the easiest culture both indoors and out and is suitable alike for beds and edging in summer or for growing in pots and boxes for winter blooming. It will stand considerable cold in the open ground and may be sown early; it blooms throughout the entire season until destroyed by hard frost. For winter flowering sow the seed in August or September. When bloom begins to fail cut back the plants and they will promptly come into flower again.

Antirrhinum.

Antirrhinum (Snapdragon).

If sown in March or April and set out when strong enough, these plants make a display that is unequalled for duration and brilliancy. The tall sorts are fine in borders. The dwarf make splendid beds. They prefer a light, warm, but well enriched soil. Seed sown outdoors in May will produce satisfactory results. It is not unusual, however, when very strong plants are desired, to sow seed in August or September and cover the plants with a mulch on the approach of cold weather. Plants raised from autumn sown seed may be grown on in pots and will produce an immense quantity of bloom throughout a very long season. If grown indoors they require about the same temperature and treatment as carnations. Most of the varieties are fairly hardy and will live through a New England winter if well covered. Antirrhinum is a specialty with us, and we have done much to improve the plants in height, habit, flower and color. We consider our strains superior to any obtainable in size and brilliancy of flowers.

This family is one of the most beautiful and popular among hardy perennials. The different varieties present an unusual wealth of color and form. They are all of elegant habit and bloom throughout a very long season. For growing in borders or filling up bays in shrubbery they are unsurpassed. Seed sown in pans or boxes and placed in a cold frame, or in the house, in March will frequently produce bloom the same year. It is best, however, to sow seed out of doors when ground warms up. Any ordinary garden soil is suitable for their growth, but a light sandy soil is preferable. The flowers are all fragrant.

The results I have obtained for years from your flower seeds have been unvaryingly satisfactory. Last season I planted and have grown under the same conditions, several strains of Cyclamen with yours. These strains embrace all the best offered in Boston, including the much lauded Sutton's.

Plants from your seed have produced more flowers, larger flowers, better and purer colors,—so that I feel constrained to say that your strain of Cyclamen not only excels anything I have grown, but anything I have seen.

> ALFRED R. CROSS, Supt. for Col. A. Pope.

Cohasset, Mass.

Breck's Special Asters.

These rank among the most popular and satisfactory flowers that are suitable alike for the amateur and professional gardener to raise from seed, and a very long season of bloom may be had - from July until end of September by successive sowings. When the Aster was introduced from China, about the year 1730, it was of the single flowered type and there were only three colors. Now there are nearly 300 varieties to choose from. The most desirable sorts are Comet, Branching, Truffaut's Perfection, Victoria, Washington, Mignon, Jewel and Triumph. There is a very great difference in the quality of the flowers and most of the cheap Aster seed offered is sure to disappoint those who sow it. The seed we sell is in every instance raised especially for us by the leading Aster specialists and has been brought to the highest possible state of perfection by selection and breeding.

The demand for Breck's Asters from the leading commercial and private growers all over the United States, however, warrants the labor and expense incurred, and is a sufficient recommendation of their superiority. We welcome a comparison of the product of Breck's seeds with that of the most highly lauded. Our prices speak for themselves.

Cultivation. - Those who wish Asters in flower throughout the season should make the first sowing about the middle of February and every two weeks thereafter until the middle of June. Sow in fine soil, and cover lightly in shallow boxes, which should be set in the greenhouse or a sunny window. Keep moderately moist until the plants are well up, then transplant, either into other shallow boxes three inches apart or into small pots. Cactus Flowered, Snow White. A new

Calendula (Pot Marigold).

"The Marygold of Shakespeare's time." One of the most popular and easily grown hardy annuals. The plants are strong, free flowering and do well in almost any situation, although they prefer a warm, loose soil. They bloom the whole season, particularly if the flowers are picked. It is usual to sow the seeds where the plants are intended to stand, but they will bear transplanting. Calendula make good pot plants and flower freely during winter.

The seeds and all the roses that I got at your place last spring turned out very satisfactory,

THOMAS McCORMACK,

Hingham, Mass.

as they always have done. I have taken several prizes at the fairs this autumn from your seeds.

Candytuft (Iberis).

Candytuft (Iberis).

Very showy, branching annual plants that produce flowers which embrace nearly all shades of red, purple and white. The seed may be sown any time indoors and the plants set out where wanted to bloom, when the weather is suitable. A succession of sowings lengthens the season of bloom. Seed sown outdoors in spring will produce flowers from July until September. Candytuft is very effective for beds, borders, etc., and useful for pot culture during winter. It is grown extensively by florists for cutting.

Gentaurea (Gornflower).

C. Cyanus is the favorite Bachelor's Button, or Ragged Sailor. This class is of the easiest culture and produces an abundance of bright colored and beautifully formed flowers throughout a very long season. The strain of seed we offer is a very much improved one and embraces everything desired in color and form. Sow seed early outdoors and thin out the plants to 6 or 8 inches apart, or in boxes in the house, and transplant when large enough. The flowers when cut and placed in water increase in size.

Chrysanthemums, Annual or Summer Flowering.

All the summer flowering chrysanthemums are very effective and showy plants for beds and borders, besides affording an immense material for cutting. The flowers are very beautiful both in form and coloring and are produced abundantly all summer. Sow seed where the plants are wanted to bloom and thin out to 9 inches apart; or stronger, earlier flowering plants can be had by sowing early in a cold frame or in a box in the house, and transplanting when large enough.

Cockscomb (Celosia).

The Cristata sorts have become very popular for bedding; their beautifully formed, highly colored flowers being very attractive and effective. The Plumosa class is splendid in both foliage and flower, very suitable for vases, borders, etc. The "Ostrich Feather" produces large plumes, beautifully curved and curled.

Seed should be sown in a hotbed in March or April, and transplanted to pots when large enough. The size of the combs of the Cristata are greatly increased by several transplantings before the combs form.

A genus of very showy annual and perennial plants that are invaluable for garden decoration and cutting. They enhance the color of the garden by their wealth of bright yellow flowers, which is strengthened in some sorts by disks of rich crimson, maroon and various shades of brown. All are of the easiest culture. The seed may be sown where the plants are wanted to bloom, or they may be transplanted. The perennials are all hardy border plants and well worthy a place in every garden. The flowers last well when cut.

Cosmos (Cosmea).

We especially recommend Smith's Massachusetts grown Cosmos as the most desirable and most satisfactory for growing in New England. Under ordinary cultivation they will begin to bloom in July and continue up to frost. The flowers are of good size and delicate shades.

Sow seeds of Smith's Early Flowering varieties in open ground, in light warm soil, early in May and cover not more than half an inch deep. The seed germinates in about ten days. The Cosmos must have the full sunshine, as it will not succeed in shade or in low damp ground. Stable manure and a rich soil will produce too much plant growth at the expense of flowers. High-grade fertilizer, rich in potash, such as Breck's Lawn and Garden Dressing, gives best results. Seeds of the later varieties should be sown early in March in a hot-bed or box in the house. When plants are 2 inches high transplant into 2-inch pots, when well established repot into 4-inch pots and water moderately. Transplant to open ground in June. When necessary tie to stakes to prevent injury from wind storms.

Eschscholtzia (California Poppy).

Large showy flowers in shades of yellow, orange, rose and white. The foliage is bluish green and very attractive. For a display in beds and borders as well as for cutting, these flowers are very satisfactory. The plants are fairly hardy and seed may be sown quite early where wanted to bloom. They are somewhat impatient of transplanting.

Breck's Silver Medal Hollyhocks (Althæa Rosea).

The fungi disease, that for a time made Hollyocks unpopular, has to a great extent been overcome by propagating healthy plants through several generations, and saving seed from them only. It is still advisable, however, to spray the plants once or twice during spring, and again before coming into bloom, with Bordeaux Mixture.

Breck's Silver Medal strain of seed is American grown, and is, we believe, superior to any obtainable in vigor of growth, texture, quantity and range of color of flowers.

Although Hollyhocks are perennials, young plants produce larger flowers and fresher colors than old ones, therefore we recommend the sowing of seed every year. Plants will flower the same year from seed sown in the greenhouse in January and grown on in pots until time for setting outdoors. Sowings can also be made from May to August for the following year's flowering; when the plants are large enough, transplant to a rich, cool soil, giving each at least a foot of space for growth. The permanent border or location in which they are set should be dug deep and well manured. Abundance of water should be supplied throughout the entire season of growth.

Hollyhocks.

Larkspur (Delphinium),

Larkspurs thrive in any good garden soil, but are of much better color and texture of flower when grown in a deep, rich, sandy loam. Both the annual and perennial sorts are easily raised from seed, but as it is somewhat slow in germinating fall or very early spring sowing is recommended. The perennial sorts are also propagated by cuttings and divisions of roots. Seedlings should be given plenty of room by transplanting; they may be set out where they are intended to flower any time in May or June. The tall sorts are very suitable for setting among shrubbery and in borders; the dwarfer kinds are effective for beds. Two crops of flowers can be had each season by cutting away the flower stems of the first crop as soon as the flowers have faded

Tagetes Signata Pumila.

-collection 12 distinct varieties, .40. Signata Pumila. Brown and

Marigolds (Tagetes). (See also Calendula.)

For adding shades of yellow to the garden effect in late summer and autumn the African and French Marigolds are unsurpassed. They make nice beds when grown together, the French sorts being used for edging; both sorts are also very desirable for borders or for brightening up any bare or colorless spots. The seed we offer is Scotch grown especially for us and produces flowers that cannot be equalled. Sowings should not be made outdoors until danger from frost is passed.

Breck's Rainbow Nasturtiums (Tropæolum).

Many people are disappointed in the Nasturtiums they raise. A great variety of soft and pleasing colors were looked for, but only old hard reds and yellows were produced. This result is chiefly due to importing cheap seeds in mixture from Europe. The seed we offer is an American product. All the different sorts and colors are grown separately, so that we have opportunity to choose only the really beautiful kinds. These we mix ourselves in proper porportion so that our customers may be assured of having all the effective shades of pink, rose, scarlet, crimson, brick, claret, chocolate, brown, garnet, orange, primrose, yellow and white. Seed may be planted, one inch deep, early in April, where wanted to bloom or in any convenient place, and the plants when large enough transplanted to the beds, etc.

NASTURTIUMS - Continued.

Lobb's Nasturtiums (Tropæolum Lobbianum) are more delicate in flower and foliage than the others, and equally desirable.

Pansy (Viola Tricolor).

The Pansy is one of our specialties. For size and form of flowers, variety and brilliancy of colors and markings, there is nothing approaches those we offer. *Breck's Boston Prize* is an American strain and is superior to any European mixture. The flowers are immensely large and wonderful in their coloring

The English and South Prize Pansies are remarkably fine, they are from the finest collections in these countries

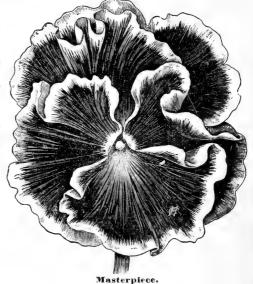

Our Trimardeau Pansies embrace the cream of that type, and

will give perfect satisfaction in every particular.

Pansies repay good treatment in profusion and size and brightness of flower, as well as in large, handsome foliage. They delight in a cool, moist soil and a situation that protects them from cutting winds as well as the midday sun. To obtain large flowers early in spring, seed should be sown in July or August and the plants protected with a frame during winter. Spring sown seed does very well although the flowers produced are not so large.

Shirley Poppies.

Poppy (Papaver).

These beautiful varieties of poppies are so well known that it is needless to say anything in their favor. Quite a number of the perennial varieties bloom the first year from seed if sown early. The Alpinum sorts are of low growth and constant bloomers. Cardinal hybrids embrace several shades of rose. chamois, and brick red. Chinese have double feathery flowers. Danebrog, bright scarlet, with a white spot at the base of each petal. Lævigatium single, scarlet, black spots and white margin. Mephisto, scarlet and black spots. Mikado, feathery petals, white fringed with crimson. The Nudicaule are all charming sorts that bloom very early. Oriental, one of the best, dark scarllet with a purple spot at the base of each petal. Pavonium, scarlet, with a black horseshoe-shaped blotch at the base of each petal. Shirley is fine for cutting, having long stems. The new strain we offer produces softer and more pleasing shades than we have offered hitherto. Yellow Rose, carnation-flowered sort. with pale vellow and rose flowers. Boston Peerless embraces a choice assortment of single and double sorts.

Sowings made in August, and again several times during spring, will produce a continuous bloom from early summer until frost. The seed should be sown where the plants are wanted to bloom, as Poppies do not take kindly to transplanting. Cover only very lightly, and firm the soil with a flat board. When large enough, thin out the plants to about a foot apart. A sandy loam and early spring sowings pro-

Extract from letter written by DANIEL WEBSTER TO HIS FARMER, JOHN TAYLOR, September 14th, 1851.

If you have not the right seed send for it to Mr. Breck. . . . Be careful on this point.

Sweet Peas (Lathyrus edoratus), Eastern Grown.

Sweet Peas.

We have endeavored to simplify the selecting of Sweet Peas by reducing our list of varieties, and by specifying those sorts that, in the opinion of leading specialists, are most representative and desirable for persons who desire to grow the named kinds but who have not facilities for, or do not care to bother with, the very long list of sorts now offered.

We were the first seedsmen in America to make a specialty of Sweet Peas, and can in all modesty claim to have done much to improve and popularize these gems of beauty and fragrance. We still maintain our position, with the largest stock of the best strains of the kinds that give satisfaction to planters, and our customers will find here catalogued as full a representation of colors and forms as necessary.

A large proportion of the seed we offer was grown in New York State, consequently is of more vigorous habit and healthier than much of the seed generally offered that is produced in milder climates; neither is this Eastern grown seed as liable to fungi attack and blight as the other. We caution our friends to be wary of low priced Sweet Peas as these are generally "volunteer" or spontaneous crops that have come up in fields where Sweet Peas were formerly planted. There is reach health variety crossitying sleet the planted. There is rarely health, variety or anything else the Sweet Pea lover wishes for in such seeds.

Seeds should be sown as early as possible, in drill six inches deep. At the time of sewing cover only with one inch of soil and fill in the drill as the young plants grow, taking care not to cover the top of the plants. A deep, rich soil and a sunny situation is best

BRECK'S BOSTON MIXTURE. The very best mixture offered at any price. It includes in good proportions over sixty of the choicest kinds. Oz. 10 cts.; ½ lb., 25 cts.; lb. 75 cts

ECKFORD'S MIXTURE. Oz. 10 cts.; lb. 60 cts.

THE BEST NINE SWEET PEAS.

THE BEST TWENTY SWEET PEAS. Blanche Ferry, Blanche Burpee, Emily Eck-

ford, George Gordon, Gorgeous, Jeannie Gordon, Lady Mary Currie, Lady Grisel Hamilton, Lottie Eckford, Lovely, Salopian, Mrs. Eckford, Miss Wilmott, Navy Blue, Othello, Prince Edward of York, Princess of Wales, Queen Victoria, Royal Rose, Senator.

THE COLLECTION OF TWENTY 75 cts.

SWEET PEAS GENERAL LIST. 10 cts. per oz.; 5 cts. per pkt.

America. Striped red and white.

Blanche Ferry. Extra early, fine pink and white. Blanche Burpee. Large fine white.

Black Knight. Deep maroon.

Blushing Bride. Bright rose and white.

Captain of Blues. Standard purplish mauve, wings lavender purple

Coccinea. Bright cherry red.

Coquette. Primrose yellow, shaded pale lavender.

Countess Cadogan. Reddish mauve.

Countess of Radnor. Light lavender, faint purplish

Crown Jewel. Primrose ground, veined with violet rose.

Dainty. White with pink edge.

Dorothy Eckford. Large new white.

Dorothy Tennant. Rosy mauve.

Duke of Sutherland. Deep claret and indigo blue. Earliest of All. Pink and white, ten days earlier than

Emily Eckford. Reddish mauve standard, wings blue. **Emily Henderson.** Pure white, blooms early.

Firefly. Fiery shade of scarlet.

George Gordon. Claret red changing to purple. Gorgeous. Salmon orange, wings softer and deeper. Gracie Greenwood. Shaded pink, with deeper pink edging.

Harvard. True Harvard crimson.

Hon. Mrs. Kenyon. Deep primrose.

Jeannie Gordon. White ground, veined with bright rose. Lady Mary Currie. Orange pink, shaded rosy lilac.

Lady Grisel Hamilton. Clear light lavender.

King Edward. Intense bright crimson.

Lord Roseberry. Rosy magenta.

Lady Nina Balfour. Delicate mauve.

Little Dorritt. Pink standard, white wings.

Lottie Eckford. White, edged lavender blue.

Lovely. Soft shell pink.

Maid of Honor. White, edged blue.

Miss Wilmott. Deep rich orange pink

Modesty. Delicate shade of pink.

Mont Blanc. Pure white, early as Earliest of All. Mrs. Eckford. Beautifully shaded primrose yellow.

Navy Blue. Deep violet blue. Othello. Deep glossy maroon.

Prince Edward of York. Standard scarlet, wings rose.

Princess of Wales. Bright rose. Prima Donna. Soft shade of pink.

Queen Victoria. Primrose overlaid with soft purple.

Royal Rose. Deep rosy pink.

Salopian. Fine scarlet.

Sadie Burpee. Large fine pure white. Senator. Striped brown and chocolate.

Shahzada. Deep maroon shaded purple. Stella Morse. Primrose flushed pink.

Sue Earl. Primrose edged with mauve. Venus. Salmon buff shaded rosy pink.

Sunflowers (Helianthus).

Most Sunflowers being of coarse growth are not suited for beds or ornamental locations near the house, but are very desirable for growing in shrubberies, against fences, or making backgrounds for, and mixing in borders. They do well in any kind of land, from light sandy to swampy; they, however, do not grow to perfection if heavily shaded. Seeds may be sown where the plants are wanted, or indoors in March and April, and transplanted when weather is suitable. Argophyllus has beautiful silvery foliage. Californicus, large double orange colored flowers. Cucumerifolius is of branching habit and covered with small dark centred flowers. Early Double Flowered produces flowers from July until frost. Folia aurea variegata and nana variegata have beautiful yellow splashed foliage. The multiflorus are showy perennial varieties. Golden Bouquet and Stella are particularly desirable on acount of their early blooming qualities. Lenticularis of graceful branching habit.

Breck's Zinnias.

Breck's Defiance is without exception the finest strain of large Double Zinnias offered. The plants are of vigorous branching habit and produce freely immense double flowers in an endless variety of splendid colors; not the old hard red, but innumerable delicate and velvety shades. The separate colors are saved from the same collection, which is admitted to be the finest in Europe. Seed sown early in heat will begin to bloom in June and continue until frost, or seed may be sown outdoors where the plants are intended to bloom.

WILD GARDEN SEEDS.

Any one who has cultivated flowers in neatly laid out beds, or carefully planned ribbon borders, is aware of the amount of labor and constant attention necessary to produce the desired effect. To those who cannot give this care, we offer "Wild Garden Seeds," a mixture of over one hundred varieties of hardy flower seeds. No one who has not seen such a bed can form an idea of its possibilities, the different seasons of bloom insuring something new almost every day. Half-oz. packets, 20 cts.

Breck's Collections of Flower Seeds.

Collection "A," price 25 cts., contains one packet each of Mignonette; Alyssum, white; Sweet Peas, fine mixed; Phlox Drummondi, fine mixed; Portulaca, fine mixed; Chinese Pink, fine mixed.

mondl, fine mixed; Portulaca, fine mixed; Chinese Pink, fine mixed.

COLLECTION "B," price 50 cts., contains the varieties in Collection "A," with the following in addition: Nasturtium, Tom Thumb, fine mixed; Candytuft, finest mixed; Aster, German, fine mixed; Pansy, finest mixed; Eschscholtzia, fine mixed; Morning Glory, fine mixed.

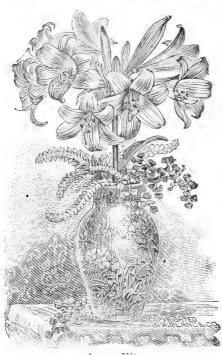

COLLECTION "C," price 75 cts., contains the varieties in Collection "A," and "B," with the following in addition: Coreopsis, fine mixed; Balsam, fine mixed; Zinnia, fine mixed; Mourning Bride, fine mixed; Petunia, finest mixed; Calendula, "Meteor," vellow.

Collection "D," price \$1.00, contains the varieties in Collections "A," "B," and "C," with the following in addition: Tall Nasturtium, fine mixed; Marigold, French, striped; Larkspur, dwarf Rocket; Poppy, double mixed; Convolvulus, dwarf mixed; Chrysanthemum, fine mixed; Antirrhinum, finest mixed.

COLLECTION "E." This assortment produces a fine effect in the garden and all the sorts are suitable for bouquets. Price 50 cts. Abronia, Ageratum, Amaranthus Bicolor, Aquilegia, Aster Chrysanthemum-flowered, Calliopsis Collinsia, Dianthus Chinensis, Codetia, Mignonette, Phlox Drummondi, Zinnia.

COLLECTION "F." The following kinds are specially suitable for growing in vases or hanging baskets. Price 25 cts. Alyssum Maritimum, Convolvulus Mauritanicus, Dwarf Nasturtiums, Lobb's Nasturtiums, Lobeña Gracilis, Mimulus Moschatus.

BULBS and PLANTS

Amaryllis.

ACHIMENES. Free flowering plants of easy cultivation. The bulbs should be potted early in a mixture of loam and leaf mould. Keep warm and water carefully. Assorted colors, 5 cents each; 50 cts. doz AGAPANTHUS. African Lily. These are fine for tubs, pots, etc.

-Umbellatus, Lily of the Nile. Blue, 35 cents each.

—Umbellatus albus. White, 35 cents each.

AMARYLLIS. Lovely lily-like plants that produce flowers in almost every shade of color, ranging from pure white to deep crimson.

Atamasco. Pink and white. Showy for borders. 15 cents each: \$1.50 per dozen.

Belladonna major. Rosy pink, fragrant, 15 cents each. Crispa. Deep pink. 25 cents each.

Defiance. Carmine with white stripes. 50 cents each.
-Equestre. The flowers measure five or more inches across, and are bright, sparkling orange-red, with a green and white star at the centre. 50 cents each; \$5.00 per dozen.

-Formosissima (Jacobean Lily). Blooms freely out of doors; flow-

ers deep velvety crimson. 15 cents each; \$1.75 per dozen.

—Hippeastrum Hybrids. A very fine new race of Amaryllis, being superior in size, form and colorings to previous introductions. 50 cents each; \$5.00 per dozen.

Johnsonii. Large crimson and white flowers. 40 cts. ea.; \$4.00 doz. -Lutea (Sternbergia). Showy yellow, autumn flowering variety. 10 cents each; \$1.00 per dozen.

-Vallotta purpurea. Crimson-scarlet flowers, borne in clusters of five or six on a long stem. A fine sort for pot culture. 3c cents each; .\$3.25 per dozen.

HALLI (The Hardy Amaryllis). Produces in early summer strong stems about eighteen inches long on which are borne large clusters of beautiful rose-colored flowers. The bulbs are perfectly hardy, and when planted in the border require no protection during winter. 50 cents each; extra strong bulbs, \$1.00 each.

Caladium.

APIOS TUBEROSA. A pretty, hardy native climber. Flowers resemble the popular Wistaria; very fragrant. 10

cents each; \$1.00 per dozen. BEGONIA. Tuberous Rooted. These are desirable plants for bedding. flowers are not destroyed by rain storms, but seem to shine more brilliant after every shower. The colors are varied and beautiful. Our bulbs are from the same source as our seed and are superior. Single flowered sorts, Red, Crimson, Scarlet, Rose, Pink, White, Yellow, Gold and Bronze, Striped and Flaked. 5 cents each; 50 cents per dozen; \$3.75 per hundred.

-Single Flowered, Mixed colors, 4 cents each; 40 cents per doz.; \$3.00 per 100.

—Double Flowered Sorts. Same color as the single kind. 10 cents ea.; \$1.00 doz. —Double Flowered Mixed. 8 cents each; 85 cents per dozen.

BESSERA ELEGANS (Coral Drop). Bright scarlet flowers, borne on stems about two feet high. Will bloom from shortly after planting until frost. 5 cents

each; 50 cents per dozen.

CALADIUM ESCULENTUM. Beautiful ornamental foliage plant. The leaves are of immense size, light green with darker veins. Will grow in any good garden soil, to a height of five feet. Dry bulbs according to size, 10, 15 and 20 cents each; \$1.00 to \$2.00 per dozen. Growing plants from pots, 20 and 25 cents each; \$2.00 to \$3.00 per dozen. Special Offer No. 3 only applies to Caladiums.

CALLA LILIES. White. 20 cents each; \$2.00 per dozen.

-Little Gem. 20 cents each; \$2.00 per dozen.

CINNAMON VINE. Hardy climber, shining green foliage, fragrant white flowers. 5 cents each; 50 cents per doz. CRINUM. Amaryllis-like bulbous plants, suitable for pot or open ground culture.

-Capense. Bright rose. 25 cents each.

-Kirkii. Large white, purple-striped flower borne on dark purple-colored stems, two feet high. 30 cents each.

-Ornatum. Delicate blush with a pink stripe through the centre. Very fragrant. 35 cents each. CYCLAMEN. Suitable for pot culture only. Plant the bulbs in a light rich soil, and water sparingly till started.

Persicum giganteum. Mixed colors or white and shades of red. 20 cents each; \$2.00 per dozen. Started plants in pots 50 cents to \$1.00 each.

CYCLOBOTHRA FLAVIA. This golden gem is of great beauty and easily grown; the habit of plant and bloom is similar to Bessera; the color is clear golden-yellow, with intense black spots on each petal. 8 cts. each; 80 cts. doz. CACTUS. These plants require absolutely no care. They grow for months in the house or garden without watering, and increase in value yearly. Their flowers are of exquisite beauty and fragrance, and their curious forms render them exceedingly interesting. In winter they require scarcely any water. Ten fine plants \$1.00, or five for 50 cents.

CHRYSANTHEMUMS. Hardy Pompon. Suitable for garden cultivation. The flowers are smaller than the popular Japanese sorts, but the form is perfect and the range of color much greater than hitherto obtainable: Ada, yellow and bronze; Agalia, lemon-yellow; Blushing Beauty, white, edged pink; Canovia, bronze-yellow; Eagle d'Or, yellow; Ivanhoe, pink; Jack, deep pink; Marconi, pure white; Pet, pink and white; Rhoda, rose; Santiago, bronze, tipped yellow; St. Crousse, deep brick red.

20 cents each; \$2.00 per dozen.

CHRYSANTHEMUMS-Continued.

CHRYSANTHEMUMS. This list is the cream of the large flowering chrysanthemums. The stock we offer is raised by one of the most successful growers in the country and is free from disease. If what you want is not included in

the sorts here named, send us your list. We can furnish every desirable variety.

WHITES, Early.—Polly Rose, Bergeman, Ivory, Willow Brook. Medium Season.—Timothy Eaton, White Bonnaffon, Western King, Mirza, Late, — Yanoma, Merry Christmas, Mrs. Jerome Jones.

YELLOWS, Early.—Robert Halliday, Harry Hurreld. Medium Season.—Pennsylvania, Major Bonnaffon. Late.—H. W. Reiman, W. H. Lincoln.

PINK, Early.—Glory Pacific, Pink Ivory. Medium Season.—Mrs. Perrin, Francis B. Hayes. Late.—

S. T. Murdock, Maud Dean.

RED, Early, - Mons. B. Gerond. Medium. - John Shrimpton. Late. - Cullingfordii, BRONZE, Kate Broomhead. 15 cts. each; \$1.50 per doz.

CARNATIONS. For blooming in the garden we can furnish three colors that will flower if set out after the middle of May, from July until frost.

-Scarlet, Crimson, White. Extra strong plants from pots. 25 cts. each; \$2.50 per doz.

-Mound Pinks. These old favorites, if given enough room, form a pretty mound of bluish-green foliage and

produce freely beautiful, blush-pink, fragrant flowers. 20 cts. each; \$2.00 per doz.

-Margaret. This is the new class that blooms from seed in about four months. About 90 per cent of the flowers are double. All very sweet scented and they embrace a great variety of delicate shades. They are exceedingly useful for cutting. Strong plants, 15 cts. each; \$1.50 per doz.

FLOWERING CANNAS.

The Cannas here offered are all started plants, not dry bulbs — that will come into bloom shortly after being set out.

3 ft.; flowers, golden-yellow; foliage, green. 20 cts. each; \$2.00 per doz. President McKinley. 3 ft.; fine scarlet; foliage, green. 30 cts. each; \$3.00 per doz.

Victor Hugo. 4 ft.; flowers, scarlet; foliage, quite dark.

Price 15 cts. each; \$1.50 per doz., except as noted. Cannas are not subject to any of our Special Offers.

Single. Double and Cactus Dahlias.

GLOXINIA BULBS.

Our stock of these is very choice. The bulbs should be potted in the spring in light sandy loam, and they will commence growing and blooming at once. In the fall, dry them and store in a warm place through winter. Strong flowering bulbs, mixed colors, per

bulb, 15 cts.; \$1.75 per doz.

GLADIOLI. To keep up a continuous bloom from June until frost, plantings should be made every two weeks. Plant six inches apart in rows, four inches deep. After frost lift and cut off near the bulb,

The increasing demand for these beautiful fall blooming plants has stimulated growers to produce improvement in size, form and colors. We offer the following named sorts which embrace some of the old standard varieties as well as the newer approved kinds. Planting should not be made until danger of frost is past in May. The bulbs should be lifted as soon as foliage is injured by first frost in fall, dried, packed in sand and stored during winter in a warm place.

SHOW AND FANCY DAHLIAS.

Miss Hansard. Straw, tipped violet. Lucy Fawcett. Lemon, splashed brown. Incomparable. Straw, tipped red. Striped Banner. Crimson scarlet, tipped white. Penelope. White, flaked lavender. Magnificent. Fine dwarf yellow.

Snow. Large pure white. Saturn. Rich cardinal red.

I was so well pleased with the plants I received from you last spring that I wish to get more this fall, so enclose the following order.

LAURA ROBINSON,
Fitchville, Ohio.

WATER LILIES AND AQUATIC PLANTS.

These have become a permanent class of decorative plants and as indispensable as hardy perennials. The ease with which they are cultivated and the certainty of grand results the first season after planting and the continuous display until the close of the season place them foremost on the list of flowering plants. The magnificent flowersof large dimensions - embracing all shades of color, are delicately fragrant. Some varieties open their flowers during the day, others at night; they are most interesting, fascinating and popular.

To obtain best results they should be planted in ponds, natural or artificial; in the latter they are best grown in large boxes as they require plenty of rich soil and ample space for leafage. Where space is limited very satisfactory results may be obtained by using tubs, planting the moderate growers such as Nymphæa odorata and its varieties, N. Laydekeri and varieties.

Hardy Nymphæas.

These are all equally as hardy as our native Pond Lily and may be planted as soon as vegetation commences in spring and any time during the season until the end of August.

- -Alba. The hardy white English pond lily. each.
- Gladstoniana. A giant among water lilies, white. 50 cts. each.
- -Laydekeri Purpurea. Rosy crimson, dark centre. \$1.00 each.
- -Marliacea Carnea. Delicate pink. 75 cts. each. -Chromatella. Large, clear yellow. 50 cts. each.

The Marliacea varieties are the strongest growers, the most free and continuous flowering and sweet scented of the hardy water lilies.

-Odorata. Our native white pond lily. 20 cts. each.

- -Odorata Sulphurea. Large yellow fragrant flowers. 50 cts. each.
- -Rosea. Cape Cod pink pond lily. 50 cts. each.
- The Chinese miniature white water lily. -Pygmea. 30 cts. each.
- Small sulphur yellow flowers, very free Helvola. flowering. 30 cts. each.
- -Tuberosa. The large Western white pond lily. 20 cts. each.
- -Richardsoni. A superb double form of N. tuberosa, very choice. 50 cts. each.

Hardy Nelumbiums, or Lotus.

These are noble aquatic plants, perfectly hardy when established, producing gigantic foliage standing from 3 to 6 ft. above the water, the flowers standing above the foliage and frequently a foot across. Tubers should not be planted before warm, settled weather. In Northern sections, where season is retarded, it is best to set out established plants.

- Speciosum, Egyptian or Sacred Lotus. 75 cts. ea. -Album striatum. Large white, striped and tipped rosy carmine. \$1.50 each.

- Kermesinum. Bright rosy pink, early. \$1.00 each.
- -Kinshiren. White, shaded and veined pink. \$1.50 each.

Miscellaneous Aquatic Plants.

Eichhornia azuria. (Blue water hyacinth.) 25 cts. each. Lymnanthemum Indicum. (Water snowflake.) Beautiful white fringed flowers, fragrant. 20 cts. each.

Limnocharis Humboldti. (Water poppy.) Large yellow poppy-like flowers. 15 cts. each.

Myriophyllum Proserpinacoides. (Parrot's feather.) Beautiful trailing plant, light green feathery. 10 cts.

Papyrus antiquorum. Egyptian paper plant. 25 cts. each.

Plants for House, Lawn and Piazza.

Areca Lutescens. (Ostrich Feather Palm.) A majestic palm. Its dark glossy green leaves are gracefully curved on slender stems. The trunk and stems are golden yellow, irregularly spotted with bronzy green. In 3½-inch pots, 75 cts.; 5-inch pots, \$1.00; 6-inch pots, \$2.00; 7-inch pots, \$3.00 each.

Asparagus Sprengeri. The beautiful green feathery sprays, which drop gracefully, are often 3 to 4 feet in length. Excellent for hanging pots. 25 cts. to \$1.00

Kentia Belmoreana. (Curly Palm.) Recognized as one of the best for all purposes, being able to withstand more ill usage perhaps than any other. The foliage is dark glossy green, the segments wide and gracefully recurved. In 4-inch pot, 75 cts. 5-inch

pot, \$1.00; 6-inch pot, \$1.75; 7-inch pot, \$3.50 each. Latania Borbonica. (Fan Palm.) This is a typical palm and is more targely used than any other. It is of strong, healthy habit, and especially suitable for window culture. In 31/2-inch pots, 50 cts.; 4-inch pots, 70 cts.; 5-inch pots, \$1.00; 6-inch pots, \$1.50; 7-inch pots, \$2.50 each.

Nephrolepsis Exaltata Bostoniensis. (Boston Fern.) A very popular window plant. It bears well with heat, dust and neglect, and always has a bright, fresh appearance. Strong plants, 50 cts. to \$200 each.

Pandanus Utilis. (Screw Palm.) Very decorative and useful for the window garden. The large leaves in leaving the stem, form a continuous spiral. It is a native of the Hawaiian Islands, where the natives use its fibre for making cloth. In 4-inch pots, 50 cts.; 6-inch pots, \$1.00; 7-inch pots, \$2.00 each.

Rubber Plant. (Ficus Elastica.) We can furnish nice,

healthy plants of this favorite at from \$1.00 to \$5.00

each, according to size.

NURSERY DEPARTMENT.

Our connection with the oldest and largest Nursery in New England places us in a position to supply home grown stock of satisfac-

tory quality promptly and at reasonable prices

We emphasize the fact that all our Fruit Trees, Shade and Orna mental Trees, Evergreen and Flowering Shrubs, Vines and Herbaceous Plants are New England grown, consequently of sturdy constitution, well rooted, hardy and much more likely to give satisfaction to planters than the large plants of softer and unripened growth that are easily produced in considerable quantities under the milder climatic conditions of the South, and generally offered by Nurserymen and Dealers.

We shall be glad to advise intending buyers as to selection, and also furnish plans and estimates for laying out and planting ornamental grounds. See particulars of Landscape Department in colored

While we exercise the greatest care to have all Nursery stock pure and reliable, we sell no Trees, Plants, Shrubs or other Nursery stock with warranty, express or implied, in any respect. If the purchaser does not accept these goods on these terms, they must be returned at once, and the money that has been paid for them will be refunded

Roses.

The list of varieties is revised, and contains nothing but the really most desirable and distinct kinds.

PLANTING. If possible select a position sheltered from high winds, but open to sunshine. If the soil is not naturally suitable improve it by the addition of rich loam and decomposed cow or stable manure, well worked in; where stiff and heavy good drainage and rough stable manure are the essentials.

When planting, carefully prune all dead or bruised roots or branches, spread the root fibres as much as possible. and set deep enough to cover the junction of the bud and stock, thereby preventing suckers, and enabling the rose to make roots.

During the growing season, frequent waterings with liquid manure are an advantage. It is easily made by mixing cow manure with water in an old tub or barrel.

Hybrid Perpetual Roses should be pruned in April, when the sap begins to flow. Crimson and other Rambler Roses are best pruned as soon as flowering is past.

Extra Strong Plants, 50 cts. each; \$4.00 per dozen. Strong Plants, 30 cts. each; \$3.00 per dozen.

Hybrid Perpetual Roses.

Alfred Colomb. Bright flery red, large. Anna de Diesbach. Intense carmine.
American Beauty. Bright rose carmine. Augustine Guinoisseau. White, tinted flesh. Baron de Bonstettin. Intensely rich plum. Baroness de Rothschild. Palest flesh. Charles Lefebvre. Brilliant velvety crimson. Clio. Flesh, shaded with rosy pink.

Duchess of Albany. Deep pink, form of La France. Fisher Holmes. Crimson, shaded with violet. General Jacqueminot. Scarlet crimson. John Hopper. Brilliant rosy crimson. La France. Lilac rose, centre silvery white. La Rosiere. Velvety crimson. Madame Caroline Testout. A deeper colored La France. Madame Plantier. Pure white.

Madame Gabriel Luizet. Fine satin rose. Magna Charta. Pink, suffused with carmine. Margaret Dickson. White, centre petals pale flesh. Marshall P. Wilder. Cherry red, mingled with carmine. Mrs. John Laing. Soft pink. Mrs. R. G. Sharman Crawford. Deep rosy pink, shaded pale flesh. Prince Camille de Rohan. Dark red.

Paul Neron. Cerise rose. Ulrich Brunner. Cerise red.

Climbing Roses.

Crimson Rambler. Crimson, famous.

Pink Rambler (Psyche). Bright rose, a fitting companion to the famous Crimson Rambler. Each 65 cts.; \$6.00 doz.

Yellow Rambler (Agalia). Small bright yellow flowers in large clusters, White Rambler (Thalia). White, large umbels.

Dawson. Pink, semi-double, fragrant. Queen of the Prairie. Bright red.

Baltimore Belle. Blush, changing to white. Gloire de Dijon. Buff, orange centre, tea scented.

50 cts. each; \$4.00 per doz., except as noted.

Austrian Roses (Yellow).

Harrisonii. Fine golden yellow. 50 cents each. Persian Yellow. Deepest yellow. 50 cents each.

Soleil d'Or. A perpetual flowering yellow rose, perfectly hardy; the shades are golden yellow and orange; the flowers average 3 inches over, and are very full. 65 cts. each.

ROSES — Continued.

Moss Roses.

Crested Moss. Rose. Little Gem. Crimson. Reine Blanche. White. 50 cents each.

Tea, or Everblooming Roses.

For the home and greenhouse cultivation these are unsurpassed. They bloom all season out doors and will come safely through an ordinary winter if laid down in the month of November and covered with about 9 inches of soil.

Bridesmaid. Brilliant pink.

Clothilde Soupert. White carmine centre. Kaiserin Augusta Victoria. White.

Small Plants, 15 cts, each; \$1.50 per doz.

La France. Silvery rose shaded pink.

Mam. Cochet. Pink.

Madame Caroline Testout. Pink.

Large Plants, 30 cts. each; \$3.00 per doz.

Miscellaneous Roses.

Beautiful in foliage, bud, full flower and fruit, planted in clumps, they are attractive throughout the entire year.

Rugosa alba. White, single. - Rubra. Crimson, single.

50 cts. each; \$4.00 per doz.

Sweet Briar. Fragrant foliage and pink flowers. 50

Low trailers suitable for covering banks, rockeries, etc.

Trailing Wichuriana. Glossy green foliage, white flowers, single.

— Manda's Triumph. Pure white double.
— Universal Favorite. Bright pink double.
30 cts. each; \$3.00 per doz.

Carolina. (Wild Swamp Rose.) 25 cents each; \$2.00 per dozen.

Hardy Herbaceous Perennials.

These plants grow in beauty, size and value year by year. They require less care than most desirable flowering plants, and are adapted for nearly every condition. The months named indicate the time of flowering of each.

Achillea (The Pearl). Pure white, double. June. 2 ft., 15 cts. each; \$1.50 doz.

Alyssum Saxatile Compactum. Beautiful yellow flowers in spring. 6 in., 20 cts. each; \$2.00 per doz.

Anemone Japonica Rosea. Dark pink flowers in August and September. 2 ft., 15 cts. each; \$1.50 per doz.

-Alba. Beautiful white. 2 ft., 15 cts. each; \$1.50 per doz.

Anthemis Tinctoria (Yellow Marguerite). Flowers May and June. 2-3 ft., 15 cts. each; \$1.50 per doz. Anthericum Liliastrum Major (St. Bruno's Lily).

White. June. $2\frac{1}{2}$ ft., 20 cts. each; \$2.00 per doz. Aquilegia Chrysantha. Rich yellow. July. 3 ft., 15

cts. each; \$1.50 per doz. Cœrulea Hybrida. Shades of blue, white, pink,

yellow, etc. 2-3 ft., 20 cts. each; \$2.00 per doz.

- Munstead White. Creamy white. July. 2½ ft., 20 cts. each; \$1.75 per doz

Armeria Laucheana (Sea Pink). Bright rose. May to frost. 9 in., 15 cts. each; \$1.50 per doz.

Arabis Alpina Plena (Alpine Rock Cress). (Perennial, White Alyssum.) White. May. 6 to 9 in., 20 cts. each; \$2.00 per doz.

Asclepias Tuberosa (Butterfly Weed). Bright orange. July. 1-2 ft., 15 cts. each; \$1.50 per doz.

Aster Esme. Pure white. September. 2 ft., 25 cts.

each; \$2.50 per doz.

-Nova Angliæ. Bluish-purple. September. 4 ft., 15 cts. each; \$1.50 per doz.

-Nova Angliæ Rosea. Pink New England Aster. 3

ft., 15 cts. each; \$1.50 per doz. Baptisia Australis (False Indigo). Dark blue. July.

I-2 ft., 15 cts. each; \$1.50 per doz.

Boltonia Latisquamæ. Clear lilac. September. 4 ft.,

15 cts. each; \$1.50 per doz. Campanula Grandiflora (Platycodon). Very dark blue.

August to September. 2-3 ft., 20 cts. each; \$2.00 per

- Persicifolia Grandiflora (Peach-leaved Bell Flower). Porcelain Blue. June to August. 2-3 ft., 25 cts. each; \$2.50 per doz.

Campanula Persicifolia Moerheimii. Pure white; 3 in. across, large, double. June. 2-3 ft., 35 cts. each; \$3.50 per doz.

Campanula Carpathica. Clear blue. Summer. 3-4 ft., 20 cts. each; \$2.00 per doz.

Centaurea Montana. Colors red, white, blue and pink. Summer. 1 1/2 ft., 20 cts. ea.; \$2.00 per doz. Coreopsis Grandiflora. Golden-yellow. Summer. 2

ft., 15 cts. each; \$1.50 per doz. Delphinium Chinensis. Intense blue. Summer. 2 ft.,

20 cts. each; \$2.00 per doz. Formosum. Blue, white centre. Summer. 3 ft., 20

cts. each; \$2.00 per doz. Dianthus Plumarius (Scotch Pink). Fragrant pink

flowers. June. 1 ft., 20 cts. each; \$2.00 per doz. Dicentra Spectabilis (Bleeding Heart). Pink. Spring.

2 ft., 20 cts. each; \$2.00 per doz.

Dictamnus Fraxinella (Gas Plant). May-June. 2 ft., 25 cts. each; \$2.50 per doz. -Alba. A white form of the preceding. 25 cts. each;

\$2.50 per doz. Digitalis Purpurea (Foxglove). Pink, and white. June.

3-4 ft., 10 cts. each; \$1.00 per doz. Eulalia Japonica Variegata. A stately grass with green and white leaves. 6 ft., 25 cts. each; \$2.50

per doz.

Euphorbia Corrollata (Flowering Spurge). Pure white. July. 1-2 ft., 10 cts. each; \$1.00 per doz.

Funkia Variegata (Plantain Lily). Blue with variegated foliage. July. 1-2 ft., 15 cts. each; \$1.50 per doz.

Gaillardia Grandiflora (Blanket Flower). Red and yellow. July. 2-3 ft., 15 cts. each; \$1.50 per doz.

Gypsophila Paniculata. Small white flowers in great profusion. Summer. 2 ft., 15 cts. each; \$1.50 per

doz.

Helenium Autumnale Superbum. Bright yellow. August. 5 ft., 25 cts. each; \$2.50 per doz.

Bolanderii. Bright yellow, dark brown center. June.

2-3 ft., 15 cts. each; \$1.50 per doz.

Helleborus niger (Christmas Rose). Large white.

December. Frame culture. 25 cts. each; \$2.50 per

Helianthus Decapetalus. Bright yellow. Summer.

5 ft., 25 cts. each; \$2.50 per doz.

-- Mollis. Yellow flowers, downy, silvery foliage. 3 ft., 15 cts. each; \$1.50 per doz.

HARDY HERBAGEOUS PERENNIALS—Continued.

Helianthus Multiflorus fl. pl. (So called Hardy Dahlia). Double yellow. August to September. 3 ft., 15 cts. each; \$1.50 per doz.

Heliopsis Pitcherii. Golden-yellow. July to October. 6 ft., 20 cts. each; \$2.00 per doz.

Hemerocallis Disticha Plena. Double terra-cotta flowers. Summer. 3 ft., 30 cts. each; \$3 00 per doz. -Dumortieri. Orange. Summer. 2 ft., 30 cts. each;

\$3.00 per doz. Heuchera Sanguinea. Bright red flowers. Handsome

foliage. Summer. 1½ ft., 25 cts. each; \$2.50 per doz. Hibiscus Moscheutos, Crimson Eye. White, with crimson eye. August to September. 3-4 ft., 20 cts. each; \$2.00 per doz.

Iberis Corræfolia (Perennial Candytuft). Flowers white, foliage evergreen. May-June. 6-12 inches,

20 cts. each; \$2.00 per doz.

Iris Germanica. Named sorts. White, Purple, marbled, etc. June. 2 ft., 15 cts. each; \$1.50 per doz. -Kæmpferi (Japanese Iris). Named sorts. Beauti-

ful colors. June to July. 2 ft., 35 cts. each; \$3.00 per dozen.

-- Mixed. 15 cts. each; \$1.50 per doz. --- Pumila. White, blue, yellow. June to July. 6 inches, 20 cts. each; \$2.00 per doz.

— Mixed. 15 cts each \$1.50 per doz. Lathyrus Latifolius (Perennial Pea). Bright red. Summer. 5 ft., 25 cts. each; \$2.50 per doz.

- Albus. White, otherwise like above. 30 cts. each;

\$3.00 per doz.

Lavendula Vera (English Lavender). July. 1-2 ft., 15 cts. each; \$1.50 per doz.

Lespedeza (Desmodium) Sieboldii (Bush Clover). Rosy-purple, pea-shaped flowers. September. 3-4 ft., 20 cts. each; \$2.00 per dozen.

Liatris Pycnostacha. Lavender-purple. Summer. 6

ft., 20 cts. each; \$2.00 per doz.

Lupinus Polyphyllus. Blue, pea-like flowers. 4 ft., 25 cts. each; \$2.50 per doz. -Alba. White, form of preceding. 25 cts. each;

\$2.50 per doz.

Lychnis Chalcedonica. Brilliant scarlet. 2-3 ft., 20 cts. each; \$2.00 per doz.

- Diurna Rubra Plena. Deep purplish-red. Summer.

2-3 ft., 35 cts. each; \$3.50 per doz. **Lythrum Roseum Superbum.** Rosy-red. Summer.

2-3 ft., 20 cts. each; \$2.00 per doz.

Monarda Didyma. Brilliant scarlet. Foliage sweetscented. Summer. 2-3 ft., 15 cts. each; S1.50 per doz.

Myosotis Palustris Semperflorens (Forget-me-not). Light-blue. Summer. 15 cts. each; \$1.50 per doz.

Enothera Youngii. Clear yellow. 2 inches in diameter. June to August. 2 ft., 25 cts each; \$2.50 per doz. Panaver Orientale (Oriental Ponto)

- Royal Scarlet. Scarlet. Small blotches. 2 ft., 35 cts.

each: \$3.50 per doz.

Phlox Subulata (Moss Pink). Various colors. May. 6 inches, 10 cts. each; \$1.00 per doz.

Decussata. In variety. Many colors. Autumn bloom-

ing. 2-3 ft., 25 cts. each; \$2.50 per doz.

Pentstemon Barbatus Torreyii (Beard-tongue). Bright

red. July. 4-5 ft., 15 cts. each; \$1.50 per doz. **Physostigia Virginiana Alba.** Spikes of tubular shaped, white flowers. August. 3-4 ft., 10 cts. each; \$1.00 per doz

Polemonium Richardsonii (Jacob's Ladder). blue with golden anthers; sweet-scented. All Summer. 11/2 ft., 25 cts. each; \$2.50 per doz.

Potentilla Grandiflora (Five-finger). Bright vellow.

June. 2-3 ft. 25 cts. each; \$2.50 per doz

Primula Acaulis Hybrida (English Primrose). Shades of white, yellow and red. Spring. 1 ft., 25 cts. each; \$2.00 per doz.

Elatior (English Cowslip). Shades of white, yellow, red and brown. 1½ ft., 15 cts. each; \$1.50 per doz.

Pvrethrum Roseum Hybridum. Colors range white to dark crimson. Summer. 2 ft., 25 cts. each; \$2.50 per doz.

Ranunculus Acris Plena (Double Buttercut). Bright

yellow. 15 cts. each; \$1.50 per doz.

Rudbeckia Fulgida. Orange-yellow, brown centre.
August. 2-3 ft., 15 cts. each: \$1.50 per doz.

Rudbeckia, Golden Glow. Double golden-yellow. August to September. 5 ft., 15 cts. each; \$1.50 per doz. Scabiosa Caucasica. Lilac-blue. Summer. 2 ft., 25 cts. each; \$2.50 per doz.

Sedum Spectabilis (Showy Stonecrop). Rosy purple. September. 2 ft., 15 cts. each; S1.50 per doz.

Silphium Perfoliatum (Compass Plant). Light yellow.

July. 5-6 ft., 15 cts. each; S1.50 per doz.

Spiræa Palmata. Crimson flower. Palm-like foliage. Summer. 3 ft., 20 cts. each; \$2.00 per doz. - Filipendula Plena. Fern-like foliage, creamy white

flowers. 2 ft., 15 cts. each; \$1.50 per doz.

Tritoma Maria Grandiflora. Red and vellow. August to October. 3 ft., 20 cts. each; \$2.00 per doz.

Veronica Longifolia Subsessilis. Blue flowers. gust to September. 3 ft., 25 cts. each; 82.50 per doz. Yucca Filamentosa (Adam's Needle). Early growth, drooping white flowers. 6 ft., 25 cts. each; \$2.00

per doz.

Pæonies.

These are peers of the rose in color and fragrance, besides being larger in size and more floriferous. They should be in every garden. When once established they require but little care and improve in size and quality year They prefer a rich, well drained, sunny situation, where they can be well supplied with water during the early summer.

Double White. Double Crimson. Double Scarlet. Double Pink. 50 cts. each; \$5.00 per dozen.

Double mixed, our selection, 25 cts. each; \$2.75 per dozen. Single mixed, exceedingly beautiful, both in flower and foliage.

The shades of color embraced are many and delicate, while the form and fragrance is delightful. 50 cts. each; \$5.00 per dozen.

Clematis.

Elegant, hardy free-flowering climbers. Paniculata. The beautiful autumn flowering, hardy, fragrant white Clematis, now so popular. Plants 25 cts. to \$1.00 ea.; \$3.00 to \$10.00 doz. Miss Bateman. White; chocolate-red anthers. 50 cts. to \$1.00 each. Flammula. (European Sweet Clematis.) Flowers small, white and very

fragrant, 25 cts. each. Deep lavender, 7 inches in diameter. 75 cts. each. Gem.

CLEMATIS — Continued.

Henryi. Immense, single, creamy white flowers. 75c. each. Imperatrice Eugenie. Large, beautiful, pure white

flowers. \$1.00 each.

Jackmanni. Large intense violet-purple flowers. 50 to 75 cts. each.

Lawsoniana. Large, rosy-purple, darker veins. 75 cts.

Mme. Edouard Andre. Bright crimson. \$1.00 each. Virginiana. (Amer. White Clematis.) A profusion of white flowers in August. 15 cts. each.

HARDY CLIMBING PLANTS.

Actinidia Polygama. A strong, clean vine from Japan. 50 cts. each.

Akebia Quinata. Of rapid growth, with shining foliage and bluish clusters of fragrant flowers. 35 cts. each. Ampelopsis Englemanni. A variety of the Virginia Creeper, with bright foliage; fine color in the autumn; the tendrils enable it to support itself like A. Veitchii. 25 and 35 cents each.

-Quinquefolia. (Virginia Creeper.) Well known climber; very vigorous. 25 cts. each.
Ampelopsis Veitchii. (Boston Ivy, Japanese Ivy.) Well-known,

particularly around Boston. It grows rapidly and clings to a wall or fence with the tenacity of ivy; the foliage is handsome in the summer, and changes to a crimson scarlet in autumn.

For the ornamentation of brick or stone structures, it can be especially recommended. 25 cents each; \$2.50 per doz.

Aristolochia Sipho. (Dutchman's Pipe.) Rapid grower, magnificent foliage 10 to 12 inches across, and curious, piped shaped, yellowish-brown flowers. 50 cts. each; \$5.00 per doz.

Bignonia Radicans. (Trumpet Vine.) A quick growing vine, bearing large scarlet flowers, very brilliant. bearing large scarlet flowers, very brilliant. 35 cts. each. Celastrus Scandens. (Roxbury Wax Work.) A vigorous vine

with conspicuous orange-scarlet berries in autumn, 35 cts. each. Euonymus Radicans. Var. Variegata. Retains its glossy green and bright foliage through the winter; nice plants, 35 cts. each. Honeysuckle. Hall's Japan. Abundant, vigorous foliage retained until early winter, flower white and yellow, fragrant. 25 cts. each.

Dutchman's Pipe.

Wistaria.

Honeysuckle, Scarlet. Strong, rapid grower, bright scarlet. 25 cts. each.

— Belgica. Dutch monthly, very sweet scented, red and buff. 35 cts. each.

- Chinese Twining. (Lonicera Japonica.) A well known vine, holding its foliage nearly all winter. Blooms in July and September. Sweetly scented. 50 cts. each; \$4.00 per doz.

Lycium Barbatum. (Matrimony Vine.) Useful for covering screens or ledges. A fast grower. 25 cts. each; \$2.75 per doz. Wistaria Chinensis. One of the most elegant and rapid growing of all climbing plants, bearing long pendulous clusters of pale blue flowers in May and June. 50 cents each.

- Alba. White, otherwise similar to preceding. 75 cts. each.

RHODODENDRONS.

There are no evergreen shrubs more desirable than Rhododendrons. They are hardy, and grow to spread several feet in diameter, giving annually a large mass of showy flowers in many colors. The leaves remain green throughout the winter, making the plant attractive and showy. They do best in a partial shade, and when set, a good-sized hole should be dug and filled with leaf-mold from the woods, or pulverized muck. In fall, a mulch with leaves or stable manure will be found very beneficial.

\$1.50 to \$2.00 each; \$15.00 to \$18.00 per doz.

Album Elegans. Blush, changing to white; fine shape. —Grandiflorum. White and blush; foliage fine.

Bicolor. Rose-pink; fine in bloom and foliage.

Blandyanum. Rosy crimson; excellent foliage; fine form and very abundant bloomer.

Candidum. A good blush.

Everestianum. Rosy lilac; spotted and fringed; an excellent bloomer; fine foliage.

Grandiflorum. Deep rose colored. Roseum Pictum. Yellow, spotted rose.

-Elegans. Rose-colored flowers; an old and general favorite.

Superbum. Clear rose color.

Purpureum Elegans. Very fine purple.

-Grandiflorum. Of excellent habit; color same as above.

HARDY FLOWERING SHRUBS.

The month after each sort indicates the time of flowering.

Almond (Prunus Jap. Rubra fl. pl.) Double pink flowers. 50 cts. May. - (Prunus Jap. Alba fl. pl.) Double white flowers, beautiful, 50 cts. May. Althæa Purpurea Plena (Rose of Sharon). Hibiscus. 35 and 50 cts. October.

Striata. Carnation striped. 35 and 50 cts.

Althæa. Double variegated. 35 and 50 cts.

—Double white. 35 and 50 cts.

IMPLEMENTS, SUNDRIES, ETC.

Breck's "Colonial" Lawn Mower.

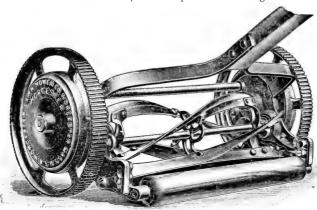

Latest and Best.

Breck's Colonial Lawn Mower is made with 10-inch wheels, 4-bladed wiper, and parallel self-oiling bearings. Every valuable improvement used in the latest pattern mowers of other manufacturers, and many new features are embodied in the Colonial, making it the most desirable and up-to-date machine made. Our long experience in handling lawn mowers entitles our judgment to consideration; therefore, we positively guarantee satisfaction to every purchaser.

Worcester Ball Bearing Lawn Mower.

10-inch wheel. 4-bladed wiper. Ball bearings.

Ball Bearing Mowers in the past have been imperfectly constructed, and very difficult to keep in order. We were unable to recommend them for this reason. From careful and exhaustive trials we have found the Worcester Mower free from the defects of earlier machines, and from our knowledge of its construction and its perfect work, we have no hesitation in offering it to our customers as the highest grade Ball Bearing Mower yet produced. Like the "Colonial," the "Worcester" is guaranteed to give satisfaction.

The "Cricket" Lawn Mowers.

Best Low Priced Machines Made. Far better than the mowers sold by dry goods and department stores.

8-in. wheel, 3-blade wiper, plain bearing.

10-in. wheel, 4-blade wiper, ball bearing.

Coldwell Gasoline Motor Mower.

Descriptive Circulars mailed on application.

The Coldwell Motor Mowers will be on exhibition at the Automobile Show, Boston, Mass., March 13-18, 1905, where we will be pleased to meet prospective purchasers.

The use of the Gasoline Motor in connection with a Lawn Mower is the result of several years experimenting, We can safely recommend the Coldwell as the only successful machine using Gasoline as the motive power. This mower is built in two sizes; 35 and 40 inches. The 35-inch weighs about 1200 lbs. and consumes 5 to 10 gallons gasoline per day. The 40-inch weighs 1600 lbs. and consumes 8 to 12 gallons gasoline per day.

Descriptive Circulars mailed on application.

Coldwell Steam Motor Lawn Mower.

This Mower will do more and better work than three horse-mowers. Cuts and rolls over an acre per hour.

Our net price, complete \$1500.00

Descriptive Circulars mailed on application.

We sharpen and repair all kinds of Hand and Horse Lawn Mowers at reasonable prices. Send us your machines early and avoid the rush when the season opens.

Horse and Motor Mowers not included in our Special Offer.

"Boss" Cast Iron Garden and Lawn Rollers.

The benefit derived from the use of a Roller on the lawn, especially in the spring, is not fully understood. The action of freezing and thawing causes the ground to heave, and if the sod is not firmly pressed back with a Roller before the hot weather begins, the grass is apt to be killed or injured, leaving the lawn full of bare spots.

The "Boss" Roller is a strictly high grade Roller at a moderate cost. This Roller is turned perfectly smooth on the outer surface, has bevelled edges, turned steel axles and is in fact far superior to any other we have seen

"Boss" Lawn Roller, with Weight Box.

No. 25, 24 in. díam., 30 in. length, 3 sections, 10 in. face, weight 550 lbs. \$37.75 \$34.00

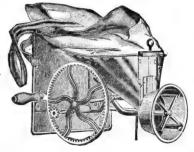

Cahoon's Broadcast Seed Sower.

The acknowledged superiority of these machines over all others has already placed them in the front rank of labor-saving agricultural implements. A saving of four-fifths of the labor and one-third of the seed is effected by their use, and a person entirely unused to sowing by hand can use this machine with perfect success.

THEY ARE WARRANTED TO GIVE PERFECT SATISFACTION

And to save their cost in less time than any other farm implement vet introduced. They are substantially built, and with ordinary care will last many years.

Cahoon Broadcast Seed Sower . \$4.50

English Water Ballast Rollers.

For keeping golf greens, lawns and tennis courts in perfect order these Rollers are invaluable, and have been adopted by the English clubs in preference to all others. When the ground is soft they may be used empty and in dry weather, when all others are useless, they can be filled with water and worked effectually.

The advantage of having in one Roller either a heavy or light implement at pleasure must be obvious to every one.

Q. P. Woven Hammocks.

The Q. P. hammocks contain the largest amount of first-class stock of any in the market, being made of heavy cotton yarn. All hammocks have our combined hook and ring.

The spreader is impossible to displace, but allows the hammock to adjust itself to any position of the body, making a perfect hammock and bed. The strain being evenly distributed causes it to wear longer and prevents wearing out in the middle. Manufactured in neat and tasty designs in colors and plain white.

Automatic Lawn Swings.

These swings are perfectly automatic and furnish a delightful and healthful exercise for persons of all ages, as the smallest child can operate them with absolute ease and safety. As a promoter of health, strength and vitality, this swing has no equal, as with it either gentle or vigorous exercise may be taken at will.

No. 2 Fairfield Swings (first quality) are made from selected hard wood nicely finished. They are very durable

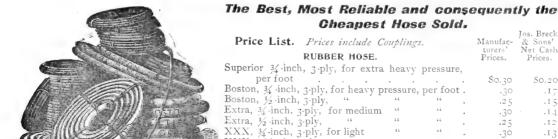

and highly ornamental.

give satisfaction.

No. 6 Favorite Swings (second quality) are offered to meet the demand for a cheaper swing than the Fairfield. They have the same general appearance although the lumber is not so carefully selected. The Double Swings are built with the view of sustaining a greater weight and are admirably adapted for parks, picnic grounds, etc.

Breck's Combination Sprinkler.

20,00

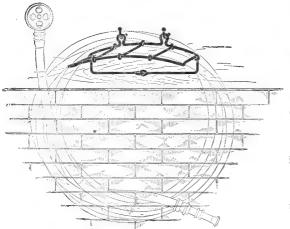

This Sprinkler is made of solid brass, with holes of the right size to throw a copious and gentle stream on the plants or lawn. The washing up of the soil is avoided by using the "Breck." The face being flat and the holes bored straight, the spray is thrown without spreading, making it invaluable for hot-house work.

Our reels are made from selected stock, nicely painted and finished.

Cooper Hose Mender.

No mechanical skill required to mend your hose. Cut out defective place in hose with sharp knife, leaving ends as square as possible, thus insuring close union. Dip ends in water if not already wet. Insert mender a short distance at one end, then take the other piece of hose and do likewise. Take hold of each piece and push them on together, having them meet at centre of mender. Do not expect it to go on too easily as there is great difference in the stability of hose, according to length of time it has been in use, and also the quality.

Hudson's Hose Menders.

This device is put up in boxes and is especially adapted for family use. It is made in two sizes, for $\frac{1}{2}$ in. and $\frac{3}{2}$ in. hose. Each box contains 1 pair phers, 6 tubes and 20 bands.

Boxes ½ in. or ¾ in. Our net price, per box, So.75. By mail, add for postage, 15 cts. per box. Extras, additional. Pliers, 18 cts. each; bands, 12 cts. per dozen; ½ in. tubes, 36 cts. per dozen; ¾ in. tubes, 45 cts. per dozen.

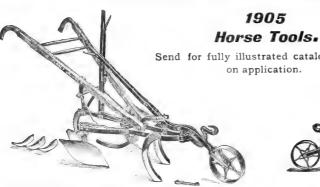

One Horse Sprinkling Cart.

These carts are intended for sprinkling lawns and private grounds or country places, and for truck gardens and flower gardens, cemeteries, yards and drives. They are very handy sprinklers around railroad shops and mills and lumber yards, and all places where a one-horse sprinkling cart of moderate capacity is useful. They will sprinkle wide or narrow. They can be used for laying dust or for watering grass as the wide tires prevent any injury to the sod. The valves work separately from the driver's seat so that either side can be used. A hose-threaded brass bib faucet is placed in the rear of the barrel, to which a regular three-quarter inch garden hose can be attached for watering plants and filling barrels.

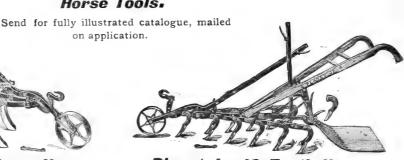

Not included in our special offers,

Sprinkling cart as shown. Our net price, \$90.00.

"Universal" Bread Maker and Raiser.

The Universal Three Minute Bread Maker is mixer, kneeder and raiser, all combined.

The hands do not touch the dough, which is mixed and kneaded thoroughly in three minutes by this machine.

Three minutes in this easy and pleasant way. Twenty to thirty minutes by the old method.

No housekeeper who has once used it will ever be content to go back to the old, laborious, disagreeable way of making bread by hand.

Special Offer No. 1, only, applies to Bread Makers.

Our Garden Bordering fills a long desired want for some simple and

inexpensive means of protecting lawns, flower beds, etc., from the invasion of human beings and animals.

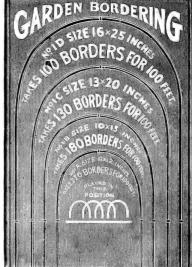

Illustration shows clearly how these are placed, and the number required for one hundred feet of border.

They are made from the best quality steel, nicely painted, and will last indefinitely

Dry Powder Guns.

The distribution of the powder can be so easily regulated that a half pound or a pound of Paris Green may be evenly distributed over an acre of Potatoes. By leaving only a slight opening in the slats at the bottom of the reservoir, the faintest smoke of powder can be forced from the gun. Hellebore insect powder, etc., can be distributed better and more economically than in any other way.

Sand, Gravel and Coal Screens.

All wire in these screens is made of the very best Bessemer steel and is drawn to a temper most adapted to wear and stand the longest in the screen. It is an extra heavy grade and the wires double crimped.

The woodwork is done over with a heavy coat of clear raw linseed oil, adding greatly to the preservation of the screen when exposed to the weather. Any size of mesh desired. With iron leg. Our net price, each, \$7.50.

The Eureka Seed Drill.

Don't try to do without this little planter another season. Your garden will smile approbation all through the season if you use the EUREKA.

By using this Drill you save seed, you save time, you stand in an upright position, the work is easy, you get a better stand, you get better plants.

Our net price, each, \$100.

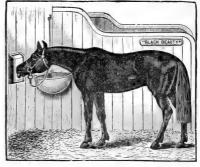

I. X. L. Galvanized Steel Chain Pump.

There has never been a better device for raising water from the well than the old-fashioned chain pump with rubber buckets. The galvanized tubing does not make the water taste, it cannot rust, and will not rot or accumulate filth. This pump is antifreezing and can be used in wells that are fifty feet deep or under successfully, giving sixteen gallons of water per minute.

I. X. L. Curbs comp., each, \$5.00 adopted Galvanized Tubing, per ft., .10 It e wheneve I. X. L. Rubber Buckets, each, .10 Salt Brid Galvanized Pump Chain, per ft., .04 Feeders

Buckley's Patent Watering Device.

The above illustration shows the general application of this system, but a brief description will be necessary to demonstrate its **importance**, **usefulness and simplicity**. On application will mail descriptive catalogue with testimonials, etc.

No. 2 Stanchion Basin with Valve, our net price, each, \$1.50. Not included in our special offers.

Breck's Improved Swing Stanchion.

This Stanchion gives as perfect freedom to cattle as it is possible to have and have them fastened at all. The cattle when standing can lap themselves as when loose, and when lying down they can rest the head upon the body as when in pasture.

There is no friction on the neck, as the Stanchion turns with the head. It keeps them as clean as the firm Stanchion and there is no possible way they can get hurt; neither can they get to the right or left to gore each other.

The cattle cannot waste their feed and do much better than when tied with any other Stanchion. No getting choked or getting unfastened.

Thousands are in use. Every dairyman who has used them approves them and adopts them exclusively.

Useful for cutting under strips of sod as they are being rolled.

One extra point given with each plow.

Scientific Grinding Mills.

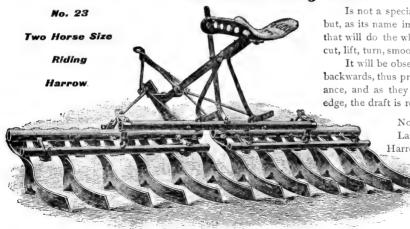

The Scientific Grinding Mills are the standard of excellence in grinding machinery the country over. Our Double Action Mill is worthy of the special attention of all who are interested in Grinding Mills. It adds a new principle in grinding grain and does the work much easier and better than with other general horse-power mills. We can also furnish Horse Powers, etc., all these machines being improved and perfected by the light of practical experience and observation.

Complete descriptive catalogues of the Scientific Mills, giving much valuable information regarding Corn Meal, etc., mailed on application.

Gas and Gasoline Engines.

To those interested we will on application mail complete Catalogue giving full information. We offer only high grade Engines, which our experience teaches us are the most economical to buy. If contemplating purchasing a Gas Engine don't fail to write for our Engine Catalogue.

Is not a special too! as some have supposed, but, as its name implies, a general purpose harrow that will do the whole business, viz.: it will crush, cut, lift, turn, smooth and level, all in one operation,

It will be observed that the Coulters all slope backwards, thus presenting the least possible resistance, and as they are beveled and ground to an edge, the draft is reduced to a minimum.

Not included in our special offers.

Large illustrated catalogue of Acme
Harrows mailed on application.

National Reversible Sulky Plow.

The National has been especially designed to meet the wants of Eastern farmers, and succeeds not only upon level farms, leaving them without tracks or dead furrows, but is equally adapted to stony, rough side hill farms, turning the land with the slope, and not up the hill, as is the case with all one-way sulky plows.

Neck yoke, evener, whiffletrees which answer for two or three horses

abreast, are sent with each plow.
Our net price \$47.00

Farmer's Handy Wagon.

All thrifty farmers have for some time felt the necessity for a low-down, wide-tire, short-turning, broad-platform wagon for general use upon the farm. This demand, until the first "Handy Wagon" was built, had never been met. This wagon has been on the market for eight years, and it has reached as high a state of perfection as ingenuity and the criticism of its many users can effect. The No. 9 Farmer's Handy Wagon is the latest, and we believe it to be the best general purpose two-horse farm truck made. It, in connection with our platform, combines all the advantages which are sought in a farm truck.

No. 9 Farmer's Handy Wagon Our net price, \$40.00

Complete descriptive catalogue mailed on application. Not included in our special offers.

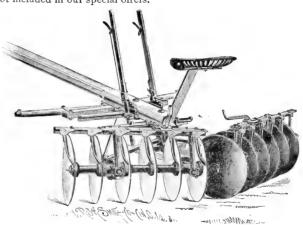

The "Model B" Disc Harrow.

The most practical disc harrow on the market. The bearings are of chilled iron and are fitted with steel balls running against chilled surface to take end thrust of disc gang. Box is cast solid in one piece, and chilled on inside, and is provided with dirt proof oil cups leading into an oil chamber, which effectually lubricates the bearings at all times.

No. 1. Twelve 16-inch discs, cut 6 feet, complete, with whiffletrees, evener, neck yoke and scrapers.

Mfrs. price, each, \$30.00. Our net price, \$26.00

Also a full line of Spike and Spring Tooth Harrows. Circulars and prices mailed on application.

High Pressure Spray Pumps. "Auto-Spray." Flg. 42.

Will do better work and do it easier than any other similar article. Useful with Bordeaux and all solutions, also in applying cold-water paints or whitewash. Holds four gallons. Illustration shows our new "Auto-Pop" attachment which doubles the efficiency by saving half the solution and labor. Our "Anti-Choke" Nozzle, cleaned at every operation of "Auto-Pop," can never clog. Tank made of galvanized steel or brass. High grade hose. Heavy self-contained pump, all brass. Nipple connections, nozzle, etc., turned from solid brass rod with full threads. A few strokes of plunger compresses enough air to cover a quarter acre of potatoes or similar crop. The operator simply holds the nozzle. A practical machine for potatoes, tobacco, small fruits, vineyards, poultry houses, greenhouses, etc. Extension pipes useful for spraying tall trees.

No. 2 A "Auto-Spray." Fig. 7.

Fig. 7.

Pump. All brass but handles — cylinders extra heavy, I-in., seamless, brass ball valves. Directions for use with each pump.

Uses. Auto-Spray "2 A" may be used for all spray purposes such as application of insecticides, fungicides, whitewash or cold-water paint — also for washing windows and buggies.

Prices. Auto-Spray "2 L" complete with 3 ft. of 3-ply hose, Auto-Spray nozzle, binder and tie rods, but no pail or bucket, \$4.50.

No. 3 C "Auto-Spray." Fig. 12.

Tank. Extra heavy, galvanized steel — holds 8 gallons and has reinforced cover.

Pump. All brass but handle fittings—cylinders extra heavy, 1½ in. in diameter, both air and pump—ball valves and 3-ply hose.

Uses. Suitable for spraying insecticides and fungicides on trees, shrubs and vines, as well as the application of whitewash or cold-water paints and will do the work of five men with brushes.

Fig. 12.

Price. Complete with 8 ft. of hose, 8 foot iron extension and one Vermorel nozzle suitable to all classes of spraying, \$12.00.

Hydraplex Spray Pump. Fig. 76.

Guaranteed to excel all other hand power pumps in force, capacity, efficiency and durability. Cast iron base and air chamber. Air chamber large. Long fulcrum. Vertical handle lever. Weight of operator helps pumping operation. Develops 80 to 120 lbs. constant pressure. Valves and cylinders brass. Valves exposed. Lever shut-off at pump, relieving strain on hose. May be repacked in fifteen minutes. Packing usually lasts two years. Pump will last a lifetime. Diameter of pump cylinder, 2 in. Stroke of plunger, 6 in. Capacity, 2 leads of hose and 4 nozzles each lead. Suction, I in.; discharge, ½ in. One man can operate this pump all day without fatigue, and would prefer to pump rather than hold the nozzles. This can be said of no other pump. Suitable for all hand service in apple, peach, pear and plum orchards, also in orange groves.

Hydraplex with Pressure Gauge, 8 ft. Suction Hose, Couplings and Strainer;

two 8-ft. extensions with Vermorel nozzles, \$30.00.

Fort Ogden, Fla., September 17, 1903.

The "Hydraplex" Spray Pump which we bought of you some time ago was duly received, and we are happy to say it has given perfect satisfaction in every respect. We have tried many different kinds of spray pumps, but they were all too hard to pump. We could never get a man to do the pumping longer than one day. As we have 50 acres in orange grove to spray it was necessary for us to have a sprayer easy to pump and at the same time durable. The "Hydraplex" fills the bill and our men prefer pumping now to holding the nozzles.

RUSSELL & WINDSOR, Props. Lawndale Grove.

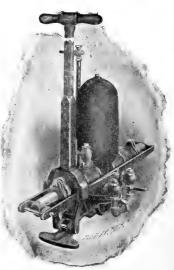

Fig. 76.

Potato. Small Fruit. Truck and Orchard Sprayer, Fig. 70. ONE HORSE FOR FOUR OR SIX ROWS.

Made for the purpose throughout. Pump "Siphonette" pattern, with exposed valves, outside packing stroke adjustment. Wheels 3 ft., 8 in. in diameter. Axle 1½ in. cold rolled steel, 6 ft., 6 in. long and stroke adjustment. Frame and bindings oak. Tank cypress with draw bolts or irons.

Spray nozzles adjustable vertically and horizontally for any size of vine or width of row. Track of wheels adjustable to variation in width of row. Ratchet drives in both wheels preventing side draft. Auxiliary handle for use in developing power before starting. Auxiliary pump handle permits use in orchard. Develops 80 to 120 lbs. pressure and delivers spray as mist or fog. Tank capacity 65 gals. Weight 500 lbs. Sprays four or six rows equally well. Six row attachment recommended. For potatoes, cucumbers, melons, celery, beans, cabbage, small

coat, striped and varnished.

Fig. 70. NET PRICE LIST.

For 4 rows with brass piping . . . \$70.00 For 6 rows with brass piping. \$72.50 Not included in our special offers.

Also Posts, Gates and Fittings for Union Lawn Fence, and several styles of Field, Farm and Park Fencing. Catalogues and estimates on application.

Union Lock Poultry Fence.

The Union Lock Fence, as the name implies, is securely locked at every intersection, so that it is impossible to pull it apart at the joints. All widths have 1 1/2 in. mesh from the bottom to the seventh cable, so that the smallest chicks may be confined. It will not sag or slack as poultry netting does, and is the neatest, most durable and economical fence on the market.

Not included in our Special Offers. Special prices for large quantities or for export.

The purpose of the Cream Separator is the quick and complete separation of cream from milk in the most practical and profitable manner possible.

The number of De Laval machines in use now nearly approaches 200,000 and their use and prestige and conceded superiority are world-wide.

Horse Mowers, Rakes and Hay Tedders.

Our limited space does not permit of a lengthy description of this class of machinery. We are agents for the celebrated Worcester Buckeye Mowers, Worcester Horse Rakes and Bullard Tedders. While the prices at which these machines are sold are a trifle higher than those asked for Western makes, it must be borne in mind that these machines cost more, as they have to be built heavier and of the very best material, for use on our New England farms, consequently, after ten years of service they are practically as good as new, while the Western machines are worn out or are costing an exorbitant price for repairs. Descriptive circulars and prices on application.

Hay Carrier Outfits.

The rapidity with which the hay crop is made ready for storing renders it necessary to provide means for handling it quickly in the barn. This is done by the use of a Hay Carrier system, which is easily put into any barn and at a reasonable price.

Estimates furnished on application. In inquiring for prices, please state if wood or steel track is wanted, length of barn, number of rafters, height from pole to ridgepole, and send rough sketch of barn showing location of doors and bays.

Descriptive circulars mailed free.

Ruddy Harvester Oil is made especially for mowing machines, reapers and other kinds of farm machinery and has never failed to give satisfaction. The oil is pure, free from grit, and is warranted not to gum or injure the finest machinery. Beware of the so-called mowing machine oils usually offered by agents. By using them you will damage your machinery.

Ruddy Harvester Oil is put up in convenient cans ready for use, as follows:

Ross Ensilage and Fodder Cutters.

For 50 years the Ensilage and Fodder Cutters built by the E. W. Ross Co., of Springfield, Ohio, have stood ahead of all others for effectiveness, durability and quality. Many improvements have been made, and at the present time there does not seem to be a great deal of room for further improvement. They are built in all sizes, from the small hand machine to the immense machines requiring 10 to 15 horse power to run them, and having a capacity of 35 tons of ensilage per hour. Be sure to see them before purchasing.

> Cutters at all prices ranging from \$4.00 to \$500. Descriptive catalogue mailed on application.

Mann's Bone Cutter.

The Mann's Green Bone Cutter is offered to the poultry world on a warranty to produce a perfectly edible poultry food, with no waste, from any average lot of butcher's

bones with less labor and less annoyance than any other bone cutter.

Green Mountain

The silo is beyond the experimental stage and is recognized to-day as the best

investment in reach of the farmer. It has been demonstrated that it will yield larger dividends and pay for itself quicker than almost any other practical aid to successful farming. A silo will increase by 20 per cent. yearly the profit on each milch cow wintered.

If you are interested in the silo question, we have a catalogue giving silo facts and comparisons, and listing sizes, which we will be glad to mail you on application.

The Green Mountain Silos are perfect in construction, only the very best material being used.

Not included in our Special Offers. Correspondence solicited.

Acme Sprayer.

Invaluable for spraying all kinds of insecticides in a liquid or dry powder form, and for spraying cattle with kerosene.

They are especially adapted to the use of poultrymen and florists and can be used by all to advantage around the house and place. The brass sprayer is not affected by acids, and is practically indestructible. Our net price, each, \$1.00

All Brass sprayers . .50

Ruberoid Roofing.

Ruberoid roofing has been the standard prepared roofing for twelve years. It is used on prominent buildings throughout the world. Expert architects everywhere specify it because of its well-known reputation for unequaled durability and efficiency.

Ruberoid roofing is ready to apply when sold. With each roll we supply sufficient nails, tin caps and cement for laying. No experience is required to apply it. Its convenience in this respect makes it particularly valuable in isolated districts where a professional roofer cannot be had.

Outlasts tin, iron or shingles. Lives indefinitely with but ordinary care. The first ruberoid roofs laid, twelve years ago, are still giving satisfactory service under severe conditions.

If you cut or injure the galvanizing on a wire it lets in rust. Consequently the wire is weakened and breaks at this point. The *Never Slip* stretcher has an iron jaw, but no teeth. When it gets a hold it never lets go, but hangs on with a deathlike grip to all kinds of wire. Our net price, \$1.00 each.

Small's Calf Feeders.

This article was designed and has been perfected by the inventor for feeding milk to young calves in a natural way before they are old enough to eat and drink otherwise.

The original Small's Calf Feeder is shown in the right hand cut. The Fountain Feeder was designed by the same inventor to meet the competition of several cheap feeders now offered the public which have no particular merit, whereas the Fountain retains all the merits of the Original.

Five extra Nipples for either feeder, by mail

A freezer to make two flavors at one time has been wanted ever since ice cream became so popular. In families some members prefer one flavor, others another; some prefer ice cream, others can only enjoy a water ice or sherbet, so some had to be dissatisfied no matter what was made in the old-style freezer. Much time and ingenuity have been spent in trying to devise some means to freeze two flavors at one time, but without any practical results. Now that it is an accomplished fact, one wonders why it should have been so long delayed, when it is so simple.

Although two flavors are frozen at once and with less exertion, no more time is required than in old style freezers.

The American Twin Freezer is past the experimental stage. A large number have been in practical use during the past summer. While severe tests and criticism of freezer were invited, the results have been altogether favorable. Every machine fully guaranteed.

PLEASE READ THIS BEFORE MAKING UP YOUR ORDERS.

SPECIAL OFFERS.

Carriage Paid or 10 Per Cent. Discount Allowed.

We make the following offers on all orders made up from our ANNUAL CATALOGUE FOR 1905, at the net cash prices therein stated (except as noted), SENT US BY MAIL OR EXPRESS, ACCOMPANIED BY CASH

OFFER No. 1.

We will send GOODS PREPAID by Mail, Express, or Freight, as we may deem advisable, TO ANY CITY OR TOWN IN NEW ENGLAND.

OFFER No. 2.

We DELIVER ALL MAILABLE goods (except those marked net), including Vegetable and Flower Seeds quoted, by packet, ounce, pound, pint or quart; also Bulbs (except Caladiums), to any POST-OFFICE in the United States.

OFFER No. 3.

WHERE CUSTOMERS PAY TRANSPORTATION CHARGES THEMSELVES we will allow A DISCOUNT OF TEN PER CENT on all goods except those marked net.

PLEASE REMEMBER.

That orders sent in early SECURE THE PIRST SELECTIONS.

That our SPECIAL OFFERS are POSITIVELY LIMITED to ORDERS BY MAIL or EXPRESS ACCOMPANIED BY CASH, postal note, draft on New York or Boston, stamps, express or post-office money order.

That "Special Offers Nos. 2 and 3" are especially advantageous to PARTIES LIVING OUTSIDE of New England; when goods are not mailable, in a majority of cases the 10 per cent. discount will offset transportation charges.

PLEASE NOTE.

We ofter such extraordinary inducements for orders sent us by mail or express, accompanied by cash, because we can execute them in the quiet of our mail order department with promptness, dispatch, and with goods of the highest excellence, and increase the volume of our business without impairing the efficiency of its service.

BAGS.—Persons remitting with their orders should include a sufficient sum to cover cost of bags necessary to contain purchase. Prices are: 2 bu., 18 cts; 1 bu., 15 cts; 1-2 bushel, 12 cents; 1-4 bushel, 8 cents; 1-8 bushel, 6 cents. The amount charged will be refunded if bags are returned in good condition free of expense to us, within one mouth from date of purchase.
